PCS is recommended for use on hard (non-porous) surfaces such as dishes, glasses, or food processing equipment or utensils, including dairy and brewery equipment and utensils.

PCS is a powder that can be used to sanitize and deodorize equipment and facilities. It is a chlorine-based disinfectant that is effective against bacteria, viruses, and fungi. When used properly, it can be a useful tool for maintaining a clean and safe environment in food processing facilities.

First Aid

For eye exposure, flush with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes. Call a physician or poison control center for treatment advice.

For skin or clothing, take off contaminated clothing, then wash the skin with soap and water.

Inhalation, if breathed, can cause irritation or blockage of the airways. If breathed, remove the person to fresh air and give breath support if needed. If breathing stops, give artificial respiration immediately. Call a physician or poison control center for treatment advice.

Ingestion, if swallowed, can cause nausea, vomiting, or abdominal pain. Do not give anything by mouth to an unconscious person. If breathing stops, give artificial respiration immediately. Call a physician or poison control center for treatment advice.

Precautionary Statements

Hazard: To avoid injury from overexposure, use only in well-ventilated areas.

Preparation: Use a neutralizing agent to remove any remaining solutions from the surface.

Precautionary Statements

Hazardous materials: If inhaled, remove to fresh air. If swallowed, wash out with water. If on skin, wash off with soap and water.
