Hartz® UltraGuard PLUS® Flea & Tick Collar for Cats & Kittens

Directions for Use:

1. Collar: Place the collar around your cat’s neck. Adjust for proper fit, and buckle in place. The collar must be worn loosely to allow for growth of the cat and to permit the collar to move about the neck. Generally, a properly fitted collar is one that, when fastened, will snugly permit the collar to move about the neck. Generally, a properly fitted collar is one that, when fastened, will snugly

2. Effects: The collar will begin to kill fleas and ticks immediately. For continuous flea and tick protection under normal conditions replace the collar every 5 months. The collar kills ticks for 5 months and aids in their control an additional 2 months. Under conditions where cats are exposed to severe flea and tick infestations it may be necessary to replace the collar more frequently; however, do not replace the collar more frequently than every 5 months. Wetting will not impair the collar’s effectiveness or the pet’s protection. If the cat is out in the rain it is not necessary to remove the collar. The collar may be worn with a regular collar. It is recommended that the pet’s bedding or sleeping quarters be treated for flea and tick control with a product registered for this use such as Hartz® UltraGuard PLUS® Flea & Tick Home Spray.

3. Precautions:
   - Consult a veterinarian before using this product on debilitated, aged, medicated, pregnant or nursing animals.
   - Sensitivity may occur after using ANY pesticide product for pets. Some animals may become irritated by any collar if it is applied too tightly. If this occurs, loosen the collar. If irritation continues, remove the collar from the cat. If signs of sensitivity occur, remove the collar and bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. Do not use this product on cats simultaneously or within 30 days before or after treatment with or exposure to cholinesterase inhibiting drugs, pesticides, or chemicals. However, flea and tick collars may be immediately replaced.
   - This collar is intended for use only as an insecticide generator. The collar will begin to kill fleas and ticks immediately. For continuous flea and tick protection under normal conditions replace the collar every 5 months. The collar kills ticks for 5 months and aids in their control an additional 2 months. Under conditions where cats are exposed to severe fleas and ticks infestations it may be necessary to replace the collar more frequently; however, do not replace the collar more frequently than every 5 months. Wetting will not impair the collar’s effectiveness or the pet’s protection. If the cat is out in the rain it is not necessary to remove the collar. The collar may be worn with a regular collar. It is recommended that the pet’s bedding or sleeping quarters be treated for flea and tick control with a product registered for this use such as Hartz® UltraGuard PLUS® Flea & Tick Home Spray.

4. Storage:
