Oxivir® Five 16 Concentrate

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.
PESTICIDE STORAGE: Do not reuse empty container. Keep from freezing.
PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinse is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container.
Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available.

PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wear chemical splash-proof goggles or face shield. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

Made in Canada

Oxivir® Five 16 Concentrate
One Step Disinfectant Cleaner

*VIRUCIDAL • FUNGICIDAL • BACTERICIDAL • MILDEWICIDAL • DEODORIZER

ACTIVE INGREDIENT:
Hydrogen Peroxide.......................... 4.25%
OTHER INGREDIENTS:...................... 95.75%
TOTAL........................................ 100.00%

FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.
IF SWALLOWED: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IN CASE OF EMERGENCY, CALL A POISON CONTROL CENTER OR DOCTOR FOR TREATMENT ADVICE.
1-800-851-7145
Have the product container or label with you when calling a Poison Control Center or doctor or going in for treatment.

Note to Physician: Probable mucosal damage may contraindicate gastric lavage.

Net Contents:
3.78 L / 1 U.S. Gal.

**Oxivir™ Five 16 Concentrate**

This product is a one-step disinfectant cleaner designed for general cleaning, disinfecting, deodorizing, and killing mold and mildew on hard, non-porous environmental surfaces. It cleans quickly by removing dirt, grime, mold, mildew, body oils and other common soils found in hospitals, nursing homes, office buildings, schools and colleges, medical offices, transportation facilities, airports, cruise ships, athletic facilities, locker rooms, clubs, exercise equipment, veterinary clinics, pet shops, animal life science laboratories, hotels, motels, public areas and restrooms.

It is designed for use on the following hard, non-porous environmental inanimate surfaces: vinyl, painted surfaces, plastic surfaces, glass, mirrors, glazed ceramic, glazed porcelain, chrome, stainless steel, aluminum, laminated surfaces and baked enamaled surfaces associated with floors, walls, cabinets, tables, chairs, countertops, telephones, fixtures, athletic equipment, exercise equipment, glazed tile, sinks, sink basins, faucets, tubs, shower rooms and locker room areas — any hard, non-porous washable surface where disinfection is required. Do not use on glasses, dishes and utensils.

When used as directed, this product is highly effective against a wide variety of pathogenic microorganisms including bacteria, antibiotic-resistant bacteria, viruses, fungi, mold and mildew. At 1:16 dilution, in the presence of 200 ppm hard water, 7% serum feed and 5 minute contact time, unless otherwise noted, this product kills the following on hard, non-porous inanimate surfaces: Pseudomonas aeruginosa, Salmonella enterica (formerly known as Salmonella choleraesuis), Staphylococcus aureus, Acinetobacter baumannii, Pseudomonas aeruginosa, Pseudomonas aeruginosa, and S. aureus (MRSA). Escherichia coli Extended Spectrum Beta-lactamase resistant (ESBL), Klebsiella pneumoniae Carbapenemase-resistant (KPC), Enterococcus faecium (Resistant to Vancomycin [VRE]). At a 1:16-1:64 dilution, in the presence of 200 ppm hard water, 5% serum feed and 5 minute contact time, unless otherwise noted, this product kills the following on hard, non-porous inanimate surfaces: *N. menetrior* (Feline Calicivirus as the surrogate)/VR-732).

See reference sheet for a complete list of organisms and additional directions for use.

**Bacterial Stability of Use-Dilution — Tests show this product as a disinfectant, when diluted at 1:6 dilutions in 200 ppm hard water, in the presence of 5% serum, remains effective against Staphylococcus aureus, Salmonella enterica (formerly known as Salmonella choleraesuis) and Pseudomonas aeruginosa for up to 90 days in storage as long as the bottle remains sealed. If the use-solution becomes visibly dirty or contaminated, it must be discarded and a fresh product prepared. Always use clean, dry containers when diluting this product. Treated surfaces must remain wet for 5 minutes.**

**DIRECTIONS FOR USE:**

1. If it is a violation of Federal Law use this product in a manner inconsistent with its labeling.
2. This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the blood stream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.
3. Not recommended for use on copper, brass, granite, marble or zinc.

**To Prepare Use Solution:**
- Add the product at 8 oz. of product per gallon of water (1:16).

**For Use as a Daily One-Step Cleaner/Disinfector:**
- Pre-clean heavily soiled areas. Apply Use Solution by hand pump coarse sprayer to hard, non-porous environmental surfaces. Spray 6 - 8 inches from surface; making sure to wet surfaces thoroughly. All surfaces must remain wet for 5 minutes. Wipe surfaces and let air dry.

**Note - Rinse is not necessary unless soils are to be coated with finish or refinisher. When cleaning floors position wet-floor sign around area to be cleaned. Floors will be slippery when wet or contaminated with foreign materials. Do not use on glassware, utensils, or dishes.**

To Use To Clean and Disinfect Shower Rooms, Locker Rooms and Other Large, Open Areas with Floor Drain(s): Pre-clean heavily soiled areas. Apply Use Solution to floors, walls and ceilings, making sure not to over spray. To disinfect, all surfaces must remain wet for 5 minutes. Scrub using a deck brush or other coarse material as necessary. Rinse surfaces thoroughly and let air dry.

**Note:** When cleaning floors position wet-floor sign around area to be cleaned. Floors will be slippery when wet or contaminated with foreign materials.

**For use as a Virucide:** Dilute at 2-8 oz. of product per gallon of water (1:16-1:64). Pre-clean heavily soiled areas. Apply Use Solution until thoroughly wet. Let stand for 5 minutes. Wipe surfaces and let air dry.

*This product kills HBV, HCV and HIV-1 on pre-cleaned environmental surfaces/object previously soiled with blood/body fluids in health care settings (hospitals, Nursing Homes) and other settings in which there is an expected likelihood of soiling of inanimate objects/surfaces with blood or body fluids, and in which the surfaces objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Hepatitis B Virus (HBV), Hepatitis C Virus (HCV) and Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS).

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HBV, HCV and HIV-1 of SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.**

**Personal Protective Equipment:** Disposable latex or vinyl gloves, gowns, face mask, and eye coverings as appropriate. Must be worn during all cleaning of body fluids, blood, and decontamination procedures.

**Cleaning Procedures:** Blood and body fluids must be thoroughly cleaned from surfaces and objects before application of this product.

**Contact Time:** Allow surface to remain wet for 1 minute to kill HIV-1, 5 minutes to kill HBV & HCV, 10 minutes to kill HBV & HCV and 5 minutes to kill all other organisms cited on the label.

**Disposal of Infectious Materials:** Blood and other body fluids must be autoclaved and disposed of according to Federal, State, and local regulations for infectious waste disposal.

To Kill *Canine Parvovirus* (1:16)
- Pre-clean heavily soiled areas.
- Apply Use Solution until thoroughly wet.

**For Use as a Cleaner/Deodorizer:** Dilute product at 0.5-1.0 oz. of product per gallon of water (1:128-1:256). Apply to hard, non-porous surfaces. Wipe surfaces and let air dry.

**For Use as a Deodorant:** Dilute product at 1.0 oz. of product per gallon of water (1:1:2). Apply to hard non-porous surfaces. Let stand for 3 minutes. Wipe surfaces and let air dry.
