PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Keep away from children, domestic animals and pets.

Personal Protective Equipment (PPE):
All handlers (including applicators) must wear long pants, shoes, socks and barrier laminated gloves. Any person who retrieves carcasses or unused bait following application of this product must wear barrier laminated gloves.

User Safety Requirements
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions are available, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of barrier laminated gloves before removing. As soon as possible, wash hands thoroughly after applying the bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to mammals, birds and other wildlife. Dogs, cats and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not allow bait to be exposed on soil surface. Do not apply where water run-off is likely to occur. Do not contaminate water when disposing of equipment wash water or rinse.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for the sites, pest, and application methods described on this label.

IMPORTANT: Do not expose children, pets or other non-target animals to rodenticides.

To help prevent accidents:
1. Store product not in use in a location out of reach of children and pets.
2. Apply bait to locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals. In areas where children are known or expected to be present, secure bait stations or use the most secure bait stations available.
3. Dispose of product container, and unused, spoiled, and un consumed bait as specified on this label.

Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used if children, pets, non-target mammals, or birds may access the bait.

USE RESTRICTIONS:
This product may only be used to control the following rodents pests in and around mammal structures: House mouse (Mus musculus), Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys humulis), Golden mouse (Ochrotomys nuttalli), Polynesian rat (Ochrotomys nuttalli), Golden mouse (Ochrotomys nuttalli), Cotton rat (Polystomys armatus), and Meadow vole (Microtus pennsylvanicus). This product must be used in and within 6 feet of man-made structures constructed in a manner so as to be vulnerable to commercial rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles, (ships, trains, aircraft), docks and port or terminal buildings and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to food or feed crops. Baiting with Ramik Green Bait Packs is prohibited. Do not sell this product in individual containers holding less than four (4) pounds of bait.

SELECTED OF TREATMENT AREAS:
Determine areas where rats, mice or meadow voles will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain or snow. Remove as much alternate food as possible.

APPLICATION DIRECTIONS
RATS: Place 1 to 4 bait packs per placement. Space placements at intervals of 15 to 30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until there are no signs of new feeding by rats.

MICE AND MEADOW VOLES: Open space and apply 1 to 2 ounces bait (1-2 kev table-spoon(s) of bait at each placement location. Spaces placements at 6 to 12-foot intervals. Larger placements (up to 2 ounces) may be needed at points of very high mouse or meadow voles activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until there are no longer signs of new feeding by mice or meadow voles.

FOLLOW-UP: Replace contaminated or spoiled bait immediately. Using barrier laminated glove clover and dispose of all dead, exposed animals and leftover bait property. To discourage reinfection, limit sources of rodent food, water and harborage as much as possible. If reinfection does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL: Dispose of wastes resulting from the use of this product in trash, at an approved waste disposal facility.

PESTICIDE AND CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container.

Plastic Containers: Triple rinse (or equivalent) then either for recycling or reconditioned, and dispose of in a sanitary landfill, or incineration.

Paper Containers: Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration.

Item No. 116307

KILLS RATS, MICE AND MEADOW VOLES

This product may only be used inside and within 100 feet of buildings or inside of transport vehicles (ships, trains, or aircraft).

ACTIVE INGREDIENT:
Diphacinone ........................................ 0.005%
OTHER INGREDIENTS: .......................... 99.995%
TOTAL: ............................................ 100.00%

KEEPS OUT OR REACH OF CHILDREN

CAUTION

FIRST AID
HAVE LABEL WHEN OBTAINING TREATMENT ADVICE.

If Swallowed:
Call a poison control center, or doctor, at 1-800-498-5743 immediately for treatment advice.

If in Skin or Clothing:
Take-off contaminated clothing.

If in Eyes:
Hold eye open and rinse slowly and gently with water for 15-20 minutes.

NOTE TO PHYSICIAN
If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K, intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

TREATMENT FOR PET POISONING
If animal eats bait, call veterinarian or 1-800-498-5743 at once.

NOTE TO VETERINARIAN
Anticoagulant Diphacinone: For animals ingesting bait and/or showing coagulation signs (bleeding or elevated prothrombin times), give Vitamin K,

For 24-hour emergency information on this product, call 1-800-498-5743 (US & Canada) or 1-661-923-0136 (all other areas).
