PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS

Caution: May be harmful if swallowed, inhaled or absorbed through the skin. Causes moderate eye and skin irritation. Avoid contact with eyes, skin or clothing. Avoid breathing vapor. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

FIRST AID STATEMENT
IF SWALLOWED: Call a Poison Control Center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a Poison Control Center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing call 911 or an ambulance then give artificial respiration, preferably mouth-to-mouth if possible. Call a Poison Control Center or doctor for further treatment advice.

IF ON SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a Poison Control Center or doctor for advice.

IF IN EYES: Hold eye(s) open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue rinsing. Call a Poison Control Center or doctor for advice.

HOT LINE NUMBER
Have the product container or label with you when calling a Poison Control Center or doctor, or going for treatment. You may also contact 1-866-326-6737 for emergency medical treatment information.

ENVIRONMENTAL HAZARDS
For terrestrial uses: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wastewater or runoff.

PHYSICAL OR CHEMICAL HAZARDS
Flammable. Contents under pressure. Keep away from fire, sparks and heated surfaces. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal. PESTICIDE STORAGE: Store container in cool, dry area away from heat or open flame. PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved disposal facility. CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Remove from cabinet, wrap empty container in newspaper and discard in trash or at an approved waste disposal facility. Do not puncture or incinerate. If can is empty offer for recycling.

WARRANTY
Suterra, LLC warrants that this material conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use. To the extent consistent with applicable law, Suterra neither makes nor authorizes any agent or representative to make, any other warranty of fitness or of merchantability, guaranty or representation, express or implied, concerning this material. To the extent consistent with applicable law, Suterra’s maximum liability for breach of this warranty shall not exceed the purchase price of this product. To the extent consistent with applicable law, buyer and user acknowledge and assume all risk and liabilities resulting from the handling, storage and use of this material contrary to label instructions.

PRODUCT INFORMATION
For ORGANIC PRODUCTION
Lasts up to 200 Days
For the Control of Oriental Fruit Moth in Almond, Apple, Apricot, Cherry, Nectarine, Peach, Pear, Plum, Prune and Quince Oranges

CheckMate® Puffer OFM-O is an aerosol canister containing behavior modifying biochemicals (pheromones) that disrupt the mating behavior of oriental fruit moth, Grapholita molesta. It is intended for use in almond, apple, apricot, cherry, nectarine, peach, pear, plum, prune and quince orchards and other areas where the oriental fruit moth is a pest.

CheckMate Puffer OFM-O is designed for use with the CheckMate Puffer Aerosol Cabinet, an automatic metered dispenser, so that one puff of pheromone is delivered every 15 minutes throughout the night to disrupt the nocturnal mating behavior of oriental fruit moths.

Active Ingredients*
(2)-8-Dodecanoyl Aceate 11.63%
(3)-8-Dodecanoyl Aceate 0.75%
(2)-8-Dodecanol 0.12%
Other Ingredients 87.50%
Total 100.00%
*(Contains 45,004 g. a.i. per container; 4.81 mg for 40 microliter puff)

KEEP OUT OF REACH OF CHILDREN
See sideback panel for First Aid and Precautionary Statements

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING
Do not apply more than 150 grams of active ingredient per acre per year.

METHOD OF APPLICATION: For use in almond, apple, apricot, cherry, nectarine, peach, pear, plum, prune and quince orchards and other areas where the oriental fruit moth is a pest. In the spring, start applications prior to moth emergence and continue throughout the crop’s susceptible period, typically 60 to 180 days. Use a cabinet to automatically dispense the CheckMate® Puffer OFM-O canister. One puff of product is delivered every 15 minutes for a period of 12 hours, starting at 5 PM. Placing cabinets in orchards and replacing canisters are to be done when cabinets are inactive, typically during daylight hours between 5AM and 5PM. To avoid accidental spraying, ensure that canister nozzles are pointed away during the performance of these tasks.

One CheckMate Puffer OFM-O canister will last approximately 200 days. Where effective disruption of oriental fruit moth mating occurs indicating longer application periods, replace used canisters before the 200 day period is reached.

Product Placement: Suspend a filled cabinet from a limb in the upper third of the tree canopy. Place cabinet where spray is directed away from foliage, fruits or nuts, if possible.

For the best results, use in orchards greater than or equal to 40 acres. In orchards less than 40 acres will lead to less than optimal results unless properly managed. Use in combination with other effective mating disruption products around the entire orchard perimeter for oriental fruit moth when adjacent orchard(s) is not simultaneously treated with oriental fruit moth mating disruption.

Orchards Greater than or Equal to 40 Acres: For best results place cabinets around the orchard perimeter or in a grid pattern to achieve a density of at least 1 puff or canister per acre, use up to 2 puffers per canister in heavily infested orchards. In situations with a prevailing wind place additional cabinets along the upwind edge to achieve uniform pheromone distribution within the interior of the orchard.

Orchards Smaller than 40 Acres: Improved effectiveness is achieved when adjacent orchard(s) is simultaneously treated with oriental fruit moth mating disruption, and the resulting total treated area is 40 acres or greater. Improved effectiveness is also achieved by placing puffier canisters at a density of up to 2 CheckMate Puffer OFM-O canisters per acre. Place cabinets around the orchard perimeter or in a grid pattern, with a prevailing wind placed additional cabinets along the upwind edge to achieve uniform pheromone distribution within the interior of the orchard.

APPLICATION NOTE: For best results apply at the time or shortly before the oriental fruit moths begin to emerge in the spring. This product only affects adult male moths and will have no effect on female moths, eggs or larvae. If application occurs following foliage (the first date moths are found consistently in monitoring traps) or during the growing season, the field must be treated with insecticides that will effectively control hatching larvae. Baits are not compatible with this product and will cause mortality of the larval stage. Use appropriate protection measures for necessary personnel. This is a supplemental insecticide and does not replace registered insecticides. This product cannot be used in a manner inconsistent with its labeling.
