ENVIRONMENTAL HAZARDS
This product contains ingredients that may be hazardous to aquatic organisms and birds. Dogs, cats, and other pestiferous and/or scavenging mammals and birds might be poisoned if they ingest baits. This product is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Rainfall may be hazardous to aquatic organisms in water adjacent to treated areas. Do not commingulate water when dispensing of equipment wash water or rinse-out.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all directions and use precautions. Use only for the stated uses, pests, and application methods described on this label.

Do not expose children, pets, or nontarget animals to rodenticides. To reduce exposures:
- Store product not in use in a location out of reach of children and pets.
- Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations.
- All bait stations must be secured or otherwise immobilized. Even strongly built stations are necked in areas open to birds, raccoons, bears, or otherwise potentially destructive, or, in areas prone to vandalism.
- Dispose of product container, and unused, spilled, and unneeded bait as specified on this label.

Note: Bank stations are mandatory for outdoor above ground use. Tamper resistant bait stations must be used if children, pets, non-target mammals or birds may access the bait.

USE RESTRICTIONS
This product may only be used to control Norway rats, roof rats and house mice to within 100 feet of agricultural buildings and man-made structures connected in a manner so as to be susceptible to communal rodent infestations. Do not bait in or near high traffic areas where poison may be hazardous to animals, birds, pets or children.

This product may also be applied to active rodent burrows to control Norway rats and roof rats harboring or attracting rodent infestations. Fence and perimeter baiting beyond 100 feet of from and agricultural structure as defined above is prohibited. This product must not be applied directly to food or feed crops. Do not Breakfast from stations when they are filled, units must be secured or otherwise immobilized. Even strongly built stations are necked in areas open to birds, raccoons, bears, or other potentially destructive animal, or in areas prone to vandalism.

Keep out of reach of children, pets, spilled, and unneeded bait as specified on this label.

Note: Bank stations are mandatory for outdoor above ground use. Tamper resistant bait stations must be used if children, pets, non-target mammals or birds may access the bait.

SELECTION OF TREATMENT AREAS
Determine areas where rats and/or mice will most likely find and consume the bait. Generally, these areas are along walls, through gapped openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been observed. Remove as much alternative food as possible.

APPLICATION DIRECTIONS

Norway and Roof Rats
Apply 1 to 4 oz of bait per placement. Large placements (up to 2 mr) may be needed at postures or points at high mouse activity. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of rat activity cease.

House Mice
Apply 1 to 4 oz of bait per placement. Large placements (up to 2 mr) may be needed at postures or points at high mouse activity. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of mouse activity cease.

Follow-up
Replace contaminated or spilled bait immediately. Collect and dispose of all dead animals and leftover bait properly. To prevent reinfection, limit sources of rodent food, water and harborage as much as possible. Where a continuous source of infestation is present maintain permanent bait stations and replenish with census too as needed.

TREATMENT FOR PET POISONING
If animal ingests bait:
- Keep animal calm.
- Consult a veterinarian immediately.
