When used as directed, this product demonstrates effective disinfection against **Pseudomonas aeruginosa**, **Salmonella cholerasuis** and **Staphylococcus aureus**. Efficacy tests have demonstrated that 881 Foaming Germicidal Cleaner (this product) is an effective one-step cleaner/disinfector in the presence of organic soil (5% blood serum). Kills **Trichophyton mentagrophytes**, the cause of Athlete's foot fungus, on hard, non-porous surfaces found in bathrooms.

This product is fungicidal against pathogenic fungi (T. mentagrophytes) when used as directed on hard surfaces found in the bathroom, shower stall and locker room, or other hard, non-porous surfaces commonly contacted by bare feet.

This product is designed for tough cleaning, disinfecting and sanitizing of non-porous, hard surfaces. Cleans, shines, deodorizes, disinfects and sanitizes non-porous, hard surfaces such as kitchen counter tops, tables and sinks in homes, restaurants, cafeterias and bars. May be used on other non-porous surfaces such as fiberglass, chrome, plastic, baked enamel and glazed porcelain, non-abrasive.

**DIRECTIONS FOR USE:**

1. **SHAKE CAN WELL BEFORE AND DURING USE.**
2. **Hold can 6 to 8 inches from surface, spray area until it is covered with a white foam.** To disinfect, allow foam to penetrate and remain wet for 10 minutes. To clean surface only, wipe foam away after 1-2 minutes.
3. **Wipe with wet cloth or sponge.**
4. For heavily soiled areas, remove excess soil before treatment.

**Note:** This product features an adjustable spray-anyway tip. May be sprayed upright, upside down or from most angles. For best effects, check that arrow on tip is turned to mark on rim before spraying.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

**MOLD & MILDEWSTAT:** To control mold and mildew on pre-cleaned hard non-porous surfaces such as floors, walls, and table tops, spray the surfaces to be treated. Make sure to wet completely. Let air dry. Repeat application at weekly intervals or when mold growth reappears.

**KILLS HIV ON PRE-CLEANED ENVIRONMENTAL SURFACES AND OBJECTS PREVIOUSLY SOILED WITH BLOOD OR BODY FLUIDS**

In health care settings or other settings in which there is an expected likelihood of soiling of inanimate surface or object with blood or body fluids, and in which the surfaces and objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS).

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV ON SURFACES AND OBJECTS SOILED WITH BLOOD OR BODY FLUIDS:**

**PERSONAL PROTECTION:** Specific barrier protection items to be used when handling items soiled with blood or body fluids are disposable latex gloves, gowns, masks or eye coverings.

**CLEANING PROCEDURE:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of the disinfectant.

**DISINFECTION, DEODORIZATION, AND CLEANING:**

1. **SHAKE CAN WELL BEFORE AND DURING USE.**
2. **Hold can 6 to 8 inches from surface, spray area up until it is covered with a white foam.** To disinfect, allow foam to penetrate and remain wet for 10 minutes. To clean surface only, wipe foam away after 1-2 minutes.
3. **Wipe with wet cloth or sponge.**
4. For heavily soiled areas, remove excess soil before treatment.
