DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PRE-CLEANING — To avoid unnecessary depletion of the GCO-10-LM, pre-cleaning of heavily fouled systems is recommended. Mechanically remove as much scale buildup as possible with brushes and high pressure hose. Prevent loosened sludge from plugging equipment by placing a screen fence around the opening for the return line. Flush loosened matter out by drain. Pump or bucket sludges from sumps and hot/cold well systems.

COOLING TOWERS/OPEN REIRCULATING SYSTEMS: INTERMITTENT OR SLUG TREATMENT — After pre-cleaning, turn off bleed for 4 to 12 hours. Do not use any other treatment during period of applying biocide. Initially slug feed GCO-10-LM to tower basin at 36 to 90 fluid ounces per 1000 gallons of system water. Repeat dosage if necessary to achieve control. When control is evident, open bleed off valve and return to normal treatment. Maintain control with subsequent GCO-10-LM treatments using GCO-10-LM at 9 to 90 fluid ounces per 1000 gallons of water. Frequency of treatment depends upon the system.

CONTINUOUS FEED METHOD — Initial Dose: When the system is noticeably fouled, add 36 to 90 fluid ounces of GCO-10-LM per 1000 gallons of system water. Subsequently, maintain this level by pumping a continuous feed of 9 to 90 fluid ounces of GCO-10-LM per 1000 gallons of water in the system lost by blowdown.

AIR WASHERS — GCO-10-LM is used to control bacteria and slime in industrial air washers that are equipped with effective mist eliminators. After pre-cleaning, slug feed GCO-10-LM to sump or washer basin at 30 to 225 fluid ounces per 1000 gallons of system water. Repeat dosage if necessary, to achieve control. Maintain system with subsequent treatments every 1 to 5 days using 30 to 225 fluid ounces per 1000 gallons of water. Frequency of treatment depends on system conditions. Alternatively, GCO-10-LM may be continuously fed to the system at the rate of 30 to 225 fluid ounces per 1000 gallons of water in the system lost by blowdown.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Do not reuse empty container. Keep container closed when not in use.

PESTICIDE DISPOSAL: Washes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility. Open emptying is prohibited.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available.

IF SWALLOWED:

Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES:

Hold eye open and rinse slowly and gently with water for 15-20 minutes.

IN CASE OF EMERGENCY, CALL A POISON CONTROL CENTER OR DOCTOR FOR TREATMENT ADVICE.

IN CASE OF EMERGENCY, CALL A POISON CONTROL CENTER OR DOCTOR FOR TREATMENT ADVICE.

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Harmful if swallowed. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into wastewater systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.
