Nonionic and Organosilicone Surfactant Blend

PRINCIPAL FUNCTIONING AGENTS
Alkylphenol ethoxylate, polyether modified polysiloxane, propylene glycol.................................................99%
Constituents ineffective as spray adjuvants .................................................. 1%
TOTAL..................................................................................................................100%

All ingredients are exempt from the requirement of a tolerance under 40 CFR 180

CA Reg. No. 7001-50015

KEEP OUT OF REACH OF CHILDREN
WARNING
Harmful if swallowed. Causes substantial but temporary eye injury. Do not get in eyes, on skin or on clothing. Wear eye protection when mixing or handling product. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.
Personal Protective Equipment: Wear protective eyewear (goggles or face shield), chemical-resistant gloves, long-sleeved shirt and long pants, and shoes plus socks.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.
STORAGE: Do not store near heat or open flame. Store in original container. Store above 32°F.
PESTICIDE/DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER: Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

NET CONTENTS:
4 x 1 Gallons (13.92 Liters) / 1 Gallon (3.48 Liters)

**GENERAL INFORMATION**

FOR PROFESSIONAL USE ONLY. NOT FOR AQUATIC USE.

SPRAY-FAST is a superior nonionic wetting agent designed for water based herbicide applications in horticulture, industrial, turf and forestry operations. It is designed for fast spreading, uniform distribution and absorption of spray on leaf and stem surfaces.

SPRAY-FAST may be used with most pesticides and fertilizer products. Optimum application and consequent effects can be influenced by many factors. It is recommended that the spray be observed and adjuvant rates be adjusted accordingly. During application, ensure thorough coverage without excessive runoff.

SPRAY-FAST is also recommended for use with non-selective herbicides and other pesticides including those used to desiccate or defoliate.

**FIRST AID**

Call a poison control center or doctor immediately for treatment advice.

If Swallowed: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. If in Eyes: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye. Have the product container with you when calling a poison control center or doctor, or going for treatment.

**MIXING**

Spray mixing and application equipment must be cleaned according to cleaning directions on prior pesticide label before application. To minimize and help prevent foaming, fill tank 2/3 to 3/4 full of water. Add pesticides and/or fertilizers as directed by label or in the following sequence: 1) Micronutrients and fertilizer; 2) Dry flowables and dispersible granules; 3) Flowables; 4) Water soluble pesticides; 5) Emulsifiable concentrates. While agitating, add SPRAY-FAST and mix for 1 to 2 minutes with lower than normal agitation. Continue filling tank maintaining minimal agitation. For most effective results, apply within 36 hours after mixing.

**DIRECTIONS FOR USE**

Suggested rates for use with the various categories of chemicals are as follows:

<table>
<thead>
<tr>
<th>Chemical Group</th>
<th>Ounces of SPRAY-FAST to add per 100 gallons of spray mixture</th>
</tr>
</thead>
<tbody>
<tr>
<td>Insecticides, Miticides &amp; Fungicides</td>
<td>6 - 32 oz.</td>
</tr>
<tr>
<td>Herbicides</td>
<td>12 - 64 oz.</td>
</tr>
<tr>
<td>Glyphosate formulations w/o added surfactants</td>
<td>12 - 64 oz.</td>
</tr>
<tr>
<td>Defoliants &amp; Desiccants</td>
<td>12 - 64 oz.</td>
</tr>
<tr>
<td>Fertilizers &amp; Micronutrients</td>
<td>4 - 32 oz.</td>
</tr>
</tbody>
</table>

**NOTE:** Carefully read and follow the specific directions contained on the label of the chemical used. Before adding SPRAY-FAST to spray tank mixes or before using with a pesticide or fertilizer where a nonionic adjuvant is not specifically recommended but not prohibited by the manufacturer, the user or application advisor must have experience with the combination or must have conducted a phytotoxicity trial of their own. For local recommendations, consult a competent agricultural authority.

**Water Penetration of Hard-to-Wet Soils:** For most efficient water penetration of hard-to-wet soils and the even distribution of applied moisture, use 1 pint per 100 gallons of water as a spot or area treatment.
