**Product Information**

**Product**: Arena 50 WDG Insecticide

**Form**: 1666-C

**Name**: Arena 50 WDG Insecticide

**Kind**: Composita Booklet

**Date**: 07/26/10

**Product Size**: 40 oz

**Base Label Size**: 4-1/4" W x 4-1/4" H

**Closed Booklet Size**: 3-1/2" W x 4-1/4" H

**Open Booklet Size**: 7" W x 4-1/4" H

**UCC-EAN**: (01) 0 06 53204 08328 9

---

**Product Description**

For foliar and systemic control of insects in commercial and residential landscapes and interiorscapes, non-bearing fruit and nut trees, residential apple and pear trees, turfgrass and other sites where plants are grown for ornamental, aesthetic and climate modification purposes.

---

**Active Ingredients**

*Clothianidin* ........................................... 50.0% By Wt.

Other Ingredients ...................................... 50.0%

Total .................................................. 100.0%

*(E)-1-(2-Chloro-1,3-thiazol-5-yin-methyl)-3-methyl-2-nitroguanidine*

**EPA Reg. No.**: 59630-152

**EPA Est. No**: 39578-TX-01© 67545-AZ-01©

Superscript is first letter in lot number.

---

**Net Weight**: 2 Pounds 8 Ounces

---

**Keep Out Of Reach Of Children**

**Caution**

See inside booklet for additional precautionary statements.

---

**Group**: 4A Insecticide

---

**Form**: 1666-C

---

**Contact Information**

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION
Causes moderate eye irritation. Harmful if swallowed, absorbed through skin or inhaled. Avoid contact with eyes, skin or clothing. Avoid breathing spray mist.

FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

If swallowed: Call poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow.

If on skin or clothing: Rinse skin immediately with plenty of water for 15-20 minutes.

If inhaled:

Do not induce vomiting unless told to do so by the poison center control center or doctor. Do not give anything by mouth to an unconscious person.

If on skin or clothing:

Rinse skin immediately with plenty of water for 15-20 minutes.

If inhaled:

Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 800-992-0859 for emergency medical treatment information.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some of the materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category A on an EPA chemical-resistance category selection chart.

Applicators and other handlers must wear:

- Long-sleeved shirt and long pants, shoes and socks, and chemical-resistant gloves made of any waterproof material such as polyethylene or polyvinyl chloride (PVC).

Follow the manufacturer's instructions for cleaning/maintaining PPE. If there are no such instructions for washable available, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENGINEERING CONTROLS

When handlers use closed systems or enclosed tanks in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 171.140) (604-61), the handler PPE requirements may be reduced or modified as specified in the WPS.

IMPORTANT: When reduced PPE is worn because a closed system is being used, handlers must be provided all PPE specified above for "applicators and other handlers" and have such PPE immediately available for use in an emergency, such as a spill or equipment breakdown.

USER SAFETY RECOMMENDATIONS

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS

This product is toxic to aquatic invertebrates. Do not apply when weather conditions favor drift from treated areas. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Do not apply where runoff is likely to occur. Do not apply directly to water, or to areas where surface water is present or to intermittent areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of empty containers or rinsate.

This product is toxic to bees exposed to treated and for more than 5 days following treatment. Do not apply over blooming, pollen shedding, or nectar-producing parts of plants. Bees may forage on plants during this time period.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

Do not apply this product in any way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 171. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries and greenhouses and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions on this label about personal protective equipment (PPE), notification to workers and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry into treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water in: coveralls, shoes and socks, chemical-resistant gloves made of any waterproof material.
NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standards for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Keep children and pets off treated area until dry.

DISCLAIMER, RISKS OF USING THIS PRODUCT, LIMITED WARRANTY AND LIMITATION OF LIABILITY

IMPORTANT: Read the entire label including this Disclaimer, Risks of Using this Product, Limited Warranty, and Limitation of Liability before using this product. If the terms are not acceptable then do not use the product; rather, return the unopened product within 15 days of purchase for a refund of the purchase price.

RISKS OF USING THIS PRODUCT

The Buyer and User (referred to collectively herein as "Buyer") of this product should be aware that there are inherent unintended risks associated with the use of this product which are impossible to eliminate. These risks include, but are not limited to, injury to plants and crops to which this product is applied, lack of control of the target pests or weeds, resistance of the target pests or weeds to the product, injury caused by drift, and injury to rotational crops caused by carryover in the soil. Such risks of crop injury, non-performance, resistance or other unintended consequences are unavoidable and may result because of such factors as weather, soil conditions, disease, moisture conditions, irrigation practices, condition of the crop at the time of application, presence of other materials either applied in the tank mix with this product or prior to application of this product, cultural practices or the manner of use or application, or a combination of such factors all of which are factors beyond the control of Valent. The Buyer should be aware that these inherent unintended risks may reduce the harvested yield of the crop in all or a portion of the treated acreage, or otherwise affect the crop such that additional care, treatment and expense are required to take the crop to harvest. If the Buyer chooses not to accept these risks, THEN THIS PRODUCT SHOULD NOT BE APPLIED. By applying this product Buyer acknowledges and accepts these inherent unintended risks AND TO THE FULLEST EXTENT ALLOWED BY LAW, AGREE THAT ALL SUCH RISKS ASSOCIATED WITH THE APPLICATION AND USE ARE ASSUMED BY THE BUYER.

Valent shall not be responsible for losses or damages (including, but not limited to, loss of yield, increased expenses of fumigating the crop or such incidental, consequential or special damages that may be claimed) resulting from use of this product in any manner not set forth on the label. Buyer assumes all risks associated with the use of this product in any manner or under conditions not specifically directed or approved on the label.

LIMITED WARRANTY

Valent warrants only that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the label, under average use conditions, when used strictly in accordance with the label and subject to the risks of using this Product as described above. To the extent consistent with applicable law AND AS SET FORTH ABOVE, VALENT MAKES NO OTHER WARRANTIES, EITHER EXPRESSED OR IMPLIED. No agent or representative of Valent or Seller is authorized to make or create any other express or implied warranty.

LIMITATION OF LIABILITY

To the fullest extent allowed by law, Valent or Seller is not liable for any incidental, consequential, indirect or special damages resulting from the use or handling of this product. The limitation includes, but is not limited to, loss of yield on all or any portion of the treated acreage, increased care, treatment or other expenses required to take the crop to harvest, increased finance charges or altered finance ratings, emotional or mental distress and/or exemplary damages. TO THE FULLEST EXTENT ALLOWED BY LAW, THE EXCLUSIVE REMEDY OF THE BUYER, AND THE EXCLUSIVE MAXIMUM LIABILITY OF VALENT OR SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT SHALL BE THE RETURN OF THE PURCHASE PRICE OF THIS PRODUCT OR, AT THE ELECTION OF VALENT OR SELLER, THE REPLACEMENT OF THE PRODUCT.

(continued)

(continued)
RESISTANCE MANAGEMENT

Arena® 50 WDG Insecticide<sup>®</sup> contains a Group 4A insecticide. Insect biotypes with acquired resistance to Group 4A insecticides may eventually dominate the insect population if Group 4A insecticides are used repeatedly in the same field or in successive years as the primary method of control for targeted species. This may result in partial or total loss of control of those species by Arena 50 WDG Insecticide<sup>®</sup> or other Group 4A.

To delay insecticide resistance consider:

- Avoiding the consecutive use of Arena 50 WDG Insecticide<sup>®</sup> or other Group 4A insecticides that have a similar target site of action on the same insect species.
- Using tank mixtures or premixes with insecticides from a different target site of action Group as long as the involved products are all registered for the same use and have different sites of action.
- Basing insecticide use on a comprehensive Integrated Pest Management (IPM) program.
- Monitoring treated insect populations for loss of field efficacy.
- Contacting your local extension specialist, certified crop advisors and/or manufacturer for insecticide resistance management or IPM recommendations for the specific site and resistant pest problems.
- For further information or to report a suspected resistance, you may contact Valent U.S.A. Corporation at 800-898-2536.

USE INFORMATION

Arena 50 WDG Insecticide<sup>®</sup> is a broad spectrum insecticide, for control of a wide spectrum of insects infesting turfgrass, ornamental plants, interior plantscapes and non-bearing fruit and nut trees (in landscapes). When applied as directed, Arena 50 WDG Insecticide<sup>®</sup> provides excellent and long residual insect control.

RESTRICTIONS AND LIMITATIONS

- Do not use a foliar application of clothianidin (Arena 50 WDG Insecticide<sup>®</sup>) following a soil application of clothianidin.
- Regardless of formulation or type of application (soil or foliar), do not apply more than a total of 0.4 lb clothianidin per acre per season for turf, landscape, ornamentals and non-bearing fruits and nuts.
- If the maximum season limit of clothianidin as mentioned above has been applied and pest populations require additional treatments, use another registered pesticide that is not in the neonicotinoid class of chemistry.
- Do not apply by air.

PLANT TOLERANCE

Neither the manufacturer nor the seller has determined whether or not Arena 50 WDG Insecticide<sup>®</sup> can be used safely on cultivars of plants registered for use. Arena 50 WDG Insecticide<sup>®</sup> has been tested on many cultivars with no phytotoxicity observed at label rates. Since all plant species and their varieties and cultivars have not been tested for tolerance, it is recommended that a small number of plants be sprayed to make certain that no phytotoxicity occurs, prior to any large scale application to plants. The user assumes all risks arising from application of Arena 50 WDG Insecticide<sup>®</sup> in a manner inconsistent with its labeling.

Arena 50 WDG Insecticide<sup>®</sup> can be tank mixed. However, all plant species and their varieties and cultivars have not been tested with possible tank mix combinations, sequential pesticide treatments and adjuvants and surfactants. Conduct a spray mix compatibility and phytotoxicity trial under local conditions to ensure compatibility prior to any large scale use.

MIXING INSTRUCTIONS

1. Begin with clean equipment.
2. Add sufficient clean water to the spray tank for 1/2 of the load.
3. Start tank agitation.
4. Add and properly suspend the necessary amount of Arena 50 WDG Insecticide<sup>®</sup> before adding any other products. Agitate to ensure thorough mixing while adding the remaining required water. A high quality wetting agent or other spray adjuvant, approved for use on your crop, may be added to spray solutions according to the manufacturer’s use instructions. Be sure to suspend and dilute Arena 50 WDG Insecticide<sup>®</sup> properly prior to the addition of any adjuvant. Consult adjuvant label or manufacturer for crop tolerance and safety information when used with this product.
5. Maintain agitation during mixing and application.
6. Apply with properly calibrated spray equipment.

SPRAY DRIFT MANAGEMENT

Do not allow this product to drift onto neighboring crops or non-crop areas or use in a manner or at a time other than in accordance with label directions because animal, plant or crop injury, illegal residues or other undesirable results may occur.

Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of weather equipment and other factors determine the potential for spray drift. The applicator is responsible for considering all these factors when making decisions where states have more stringent regulations.
APPLICATION PROCEDURES

Foliar Application
Select spray nozzles which will provide accurate and uniform spray deposition. Use spray nozzles which provide medium sized droplets and reduce drift. To help insure accuracy, calibrate sprayer before each use. For information on spray equipment and calibration, consult nozzle manufacturers and/or State and County Extension Service.

Apply Arena 50 WDG Insecticide\(^1\) using sufficient water volume to provide thorough and uniform coverage. In situations where a dense canopy exists and/or pest pressure is high, use greater water volumes. The use of a spray adjuvant may improve spray coverage. Do not make applications under conditions where uniform coverage cannot be obtained or where excessive spray drift may occur.

TURFGRASS

Arena 50 WDG Insecticide\(^1\) can be used as directed on grass grown in industrial, commercial and residential landscapes including airports, athletic fields, cemeteries, commercial sod farms, golf courses, home lawns, parks and playgrounds. Arena 50 WDG Insecticide\(^1\) has sufficient residual activity to provide high levels of control when applications are made proceeding or during the egg laying activity of the target pests. The need for an application can be based on historical monitoring of the site, previous records or experiences, current season adult trapping or other methods. Follow application with sufficient irrigation or rainfall to move the active ingredient through the thatch.

Arena 50 WDG Insecticide\(^1\) can be applied to turf at 6.4 to 12.8 oz per acre. The rate is dependent on the target pest(s), their stage of development and the desired length of control. Multiple applications can be made but do not exceed the maximum amount per year (12.8 oz per acre). Consult your local State Agricultural Experiment Station, State Extension Turf Specialists or other turf experts for specific information concerning the timing of application(s). When targeting multiple pests, make application to earliest egg laying or adult flight. The high end of the rate range may be needed if extended control of secondary pests is desired.

Apply Arena 50 WDG Insecticide\(^1\) in sufficient water volume (1 to 5 gallons per 1,000 sq ft) to provide optimal distribution in the treated area. The use of properly calibrated equipment is recommended for the application of turfgrass insecticides. Equipment that will produce a uniform, coarse droplet spray using a low pressure setting to eliminate spray drift. Check calibration periodically to ensure that equipment is working properly.

\(\text{* Do not apply more than a total of 12.8 oz (0.4 lb ai) of Arena 50 WDG Insecticide\(^1\) per acre per season.}\)
ORNAMENTALS IN COMMERCIAL AND RESIDENTIAL OUTDOOR LANDSCAPE
AND INTERIOR PLANTSCAPES AND OTHER SITES WHERE PLANTS ARE
GROWN FOR AESTHETIC AND CLIMATE MODIFICATION PURPOSES

Arena 50 WDG Insecticide® is for use on ornamentals for insect control in commercial and residential landscapes and interior plantscapes. To assure optimum effectiveness, good spray coverage of the target plant is essential. Application can be made by foliar application or soil applications including soil injection, drenches, and broadcast sprays. For optimum control, make applications prior to anticipated pest infestation.

Apply Arena 50 WDG Insecticide® when threshold populations are observed. Do not wait until population beyond threshold has been established. Apply Arena 50 WDG Insecticide® in sufficient water to ensure uniform and thorough coverage of foliage. Thorough coverage is required for optimum control. To achieve adequate coverage, use proper spray pressures, nozzles, nozzle spacing and water volume per acre.

Apply at planting or after planting to established plants. On established plants, irrigate the treated area thoroughly but do not allow leaching and runoff from containers for at least 7 days. Choose lower rates for light infestations and/or smaller plants and higher rates for heavy infestations and/or larger plants.

RESTRICTIONS AND LIMITATIONS
- Do not apply more than a total of 12.8 oz (0.4 lb active ingredient clothianidin) of Arena 50 WDG Insecticide® per acre per season.
- Drench or broadcast applications will provide control of foliage feeding insects, however, control will not be achieved until the product has been taken up by the plant roots and translocated to the area where the insects are feeding.
- If making broadcast applications, water in with enough irrigation or rainfall to move the product into the zone where insects are active.
- For drench applications, use enough water to move the product into the zone where the insects are active.

### Soil Applications to Ornamental in Outdoor Landscapes and Interior Planting

#### Directions

1. **Determine Application Rate**
   - Based on plant size and plant material type.
   - Apply as a drench or sprinkling around the root zone.

2. **Apply Soil Conditioner**
   - Mix the conditioner into the top 6-12 inches of soil before planting.
   - Apply a 1-2 inch layer over the root zone of new plantings.

3. **Maintain and Monitor**
   - Regularly check moisture levels and adjust accordingly.
   - Keep the root zone moist to ensure proper growth.

#### Application Rates

- **Shrubs**
  - 1-2 lbs per 3-inch diameter shrub

- **Trees**
  - 1-2 lbs per 3-inch diameter tree

- **Groundcover**
  - 1-2 lbs per 100 square feet

#### PLANTS

- **Ornamental**
  - Evergreens
  - Deciduous

<td>Aphids, Apple Maggot, Codling Moths, Leafhoppers, Plum Curculio, Oblong-bodied Leafrollers (suppression), Oriental Fruit Moth, Spotted Tarmatorm Leafminers, Western Tarmatorm Leafminers</td>
<td>2 to 3 oz per 100 gallons of spray solution or 4 to 6 oz/acre (0.125 to 0.167 lb a.i/acre)</td>
<td>Non-bearing fruit, including apples and pears, and nut trees in landscapes are only for ornamental use. FRUITS FROM THESE TREES ARE NOT TO BE USED AS FOOD AT ANY TIME. The amount of Arena 50 WDG Insecticide(^1) per acre will depend on tree size, pest pressure and the volume of foliage present. The rate of water carrier per acre is based on a standard of 400 gallons of dilute spray per acre for large trees. For Control of Codling Moth and Oriental Fruit Moth apply Arena 50 WDG Insecticide(^1) in a program of rotational sprays with other labeled insecticides. When using the 3 or 4 rate of Arena 50 WDG Insecticide(^1) to control codling moth and/or oriental fruit moth, do not apply treatments less than a 14 day interval. Apply Arena 50 WDG Insecticide(^1) in a full coverage spray in 200 gallons per acre to the point of drop. The spray volume will depend on tree size and density of the canopy. Repeat applications as needed to maintain control but do not apply more often than every 10 days. For Optimum Control of Leafminers and Leafrollers: make the first application as soon as pollination is complete and bees are no longer present. Repeat application as necessary to maintain control. A single application may result in suppression only.</td>
</tr>
</tbody>
</table>

* Do not apply more than 6.4 oz (0.2 lb a.i.) of Arena 50 WDG Insecticide\(^1\) per acre per season.
* Do not apply treatments less than ten (10) days apart.
STORAGE AND DISPOSAL

PESTICIDE STORAGE
Store in a dry place away from excessive heat.
Do not store near food or feed.
Store in original container only.
To close package, replace and tighten cap to form an airtight seal.
Do not contaminate water, food or feed by storage or disposal.
For help with any spill, leak, fire or exposure involving this material, call day or night (800) 952-0099.

PESTICIDE DISPOSAL
Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL
Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available; otherwise dispose of in a sanitary landfill or incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.
