Made in U.S.A. • Patent Protected & Other Patents Pending

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

General:
Animals use urine to communicate in the wild. When they repeatedly urinate on a predator's nose, animals conclude it's a "dangerous" place and choose to move elsewhere. Shake-Away® Coyote/Fox Urine Granules creates the illusion that coyotes and foxes are present in your lawn or garden.

Application directions:
Use restrictions—This product is not for direct application to plants intended for human consumption (i.e., food plants). Apply only to the perimeter of areas where food plants are grown. To create a repellant barrier, apply the product to soil, ground cover, trash, mulch, perimeter vegetation and non-food vegetation adjacent to food plants.

General use—Apply Shake-Away Coyote/Fox Urine Granules twice a week for the first two weeks, then twice a month for maintenance. Sprinkle this product lightly in and around areas where animals are causing damage or in areas you want to protect.

Allow up to two to three weeks for Shake-Away Coyote/Fox Urine Granules to take full effect.

Coverage:
Use one ounce of Shake-Away Coyote/Fox Urine Granules for every 30 linear feet. Each bottle of Shake-Away Coyote/Fox Urine Granules will cover up to 600 linear feet or 20 oz. bottle when applied as directed.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

Storage: Store in a cool, dry place.

If empty, Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling it if available.

If partially filled, call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

There's a Shake-Away® product for every situation.
