Timectin™ 0.15
Insecticide/Miticide

For use on ornamental plants to control leafminers and scales and to suppress aphids, whiteflies and thrips.
Intended for Agricultural/Commercial Use.

**ACTIVE INGREDIENT:**
Avermectin

**OTHER INGREDIENTS:**

**TOTAL:** 19.11% 100.0%

Timectin™ 0.15 EC Insecticide/Miticide contains 0.15 lbs active ingredient per gallon

**KEEP OUT OF REACH OF CHILDREN**
**WARNING / AVISO**

Su esto no entienda la etiqueta, busque a alguien para que le explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)

---

**FIRST AID**

**If in eyes**
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

**If swallowed**
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

**If on skin or clothing**
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

**If inhaled**
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

**HOT LINE NUMBER**

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact Chemtrec at 1-800-424-9300 for emergency medical treatment information.

**NOTE TO PHYSICIAN**

Early signs of intoxication include dilation of pupils, muscarinic incontinence, and muscular tremors. Toxicity following accidental ingestion of this product can be minimized by early administration of chemical adsorbents (e.g., activated charcoal).

If toxicity from exposure has progressed to cause severe vomiting, the extent of resultant fluid and electrolyte imbalance should be gauged. Appropriate supportive parenteral fluid replacement therapy should be given, along with other required supportive measures (such as maintenance of blood pressure levels and proper respiratory function) as indicated by clinical signs, symptoms, and measurements.

In severe cases, observations should continue for at least several days until clinical condition is stable and normal. Since abamectin is believed to enhance GABA activity in animals, it is probably wise to avoid drugs that enhance GABA activity (barbiturates, benzodiazepines, valproic acid) in patients with potentially toxic antemortem exposure.
Do not apply this product in a way the buyer accepts the following warranty disclaimer, inherent risks of use and limitation of remedies. Read Only

If Combustible: Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from target areas. Do not contaminate water when disposing of equipment wash water or rinsate.

Do not apply this product if bees are visiting the treatment area. Do not apply this product or allow it to drift to blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish and wildlife. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from target areas. Do not contaminate water when disposing of equipment wash water or rinsate.

This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard 40 CFR Part 190. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that are permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:
- Coveralls over short-sleeved shirt and short pants.
- Chemical-resistant gloves—EPA chemical-resistance category E (e.g., barrier laminate, nitrile rubber, neoprene rubber, viton).
- Chemical-resistant shoes and socks.
- Protective eyewear.
NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants or trees, forests, nurseries, or greenhouses.

Do not reenter treated areas until sprays have dried.

FAILURE TO FOLLOW DIRECTIONS AND PRECAUTIONS ON THIS LABEL MAY RESULT IN CROP INJURY, POOR INSECT CONTROL, AND/OR ILLEGAL RESIDUES.

Timectin 0.15 EC T&O Insecticide/Miticide is an EC formulation which is to be diluted with water prior to use. Timectin 0.15 EC T&O Insecticide/Miticide controls aphids and mites and suppresses whiteflies, thrips and spider mites on the ornamental species listed on this label.

Resistance Management

Timectin 0.15 EC T&O Insecticide/Miticide is an insecticide/miticide and some target pests may develop resistance to Timectin 0.15 EC T&O Insecticide/Miticide treatments. Use resistance management practices when using Timectin 0.15 EC T&O Insecticide/Miticide on plants that are hosts of labeled pests that have more than one generation per crop cycle. Typical strategies include, but are not limited to, rotation to other insecticides with different modes of action, treatment of successive generations with different products, applications made at specified label rates and at specified spray intervals, and the use of non-chemical alternatives (for example, beneficial arthropods or rotation to susceptible to non-susceptible plants). Contact your State Cooperative Extension Service for additional information on these or other resistance management strategies.

To manage susceptibility in Liriomyza thuridiotropha species, use at three applications of Timectin 0.15 EC T&O Insecticide/Miticide and then rotate to Citromph Insecticide (which contains the active ingredient cyromazine) for no more than three applications before rotating back to Timectin 0.15 EC T&O Insecticide/Miticide or using another insecticide. Alternating between these two products which have different modes of action should be based on the generation of Liriomyza species to avoid applying Timectin 0.15 EC T&O Insecticide/Miticide to successive generations.

Plant Tolerance

Although Timectin 0.15 EC T&O Insecticide/Miticide has been tested for tolerance on a variety of ornamental plants, it is not possible to test Timectin 0.15 EC T&O Insecticide/Miticide under all application conditions, such as when Timectin 0.15 EC T&O Insecticide/Miticide is applied with combination products or with surfactants or adjuvants. Test a small area of plants for phytotoxicity to Timectin 0.15 EC T&O Insecticide/Miticide before making applications to large blocks of plants.

Phytotoxicity has been observed after the use of Timectin 0.15 EC T&O Insecticide/Miticide on certain species of ferns (e.g., Adiantum spp.) and Shasta Daisy (Leucanthemum vulgare). The International USA does not recommend the use of Timectin 0.15 EC T&O Insecticide/Miticide on ferns or Shasta Daisy.

Restrictions

- Do not use Timectin 0.15 EC T&O Insecticide/Miticide for suppression of aphids, whiteflies, and thrips on roses, chrysanthemums, and poinsettias. These ornamentals are primary hosts of mites and Liriomyza thuridiotropha and Timectin 0.15 EC T&O Insecticide/Miticide applications should target these insect pests. Additional applications of Timectin 0.15 EC T&O Insecticide/Miticide to suppress aphids, thrips, and whiteflies on these plants will increase the selection pressure on mites and Liriomyza thuridiotropha which may result in greater tolerance of these pests to Timectin 0.15 EC T&O Insecticide/Miticide.
- Do not apply this product through any type of irrigation system.
- Do not apply by air.
- Do not use in citrus nurseries.
- Do not apply less than 80 fl. oz. or more than 18 fl. oz. per acre.

ORNAMENTALS - CROP USE DIRECTIONS

TARGET CROPS

Shadehouse, Greenhouse, Field-Grown Ornamentals, Foliage Plants, Christmas Trees, and other Woody Ornamentals

APPLICATION DIRECTIONS

Mix Timectin 0.15 EC T&O Insecticide/Miticide with a sufficient amount of water. Make applications as a foliar spray and ensure crops receive a thorough, uniform coverage.

Horticultural Spray Oil: For enhanced residual control of target pests on field-grown woody ornamentals,
Evaluate Pests

In the plant world, a large number of plants are affected by pests. For example, landscape plants and Christmas trees, insecticide/miticide spray mixes are recommended. To maintain control, make repeat applications as necessary at 7-day intervals. Some plants may be sensitive to these oils. Test a small area of plants for phytotoxicity to Timectin 0.15 EC & T&O Insecticide/Miticide mixed with horticultural spray oils. Evaluate the plants after 2 weeks before applying Timectin 0.15 EC & T&O Insecticide/Miticide mixed with oils on a large number of plants. In addition, pest damage from treatment with such mixtures may be increased if the temperatures are very cold or very warm. Read and follow directions on the spray label. Do not exceed the maximum rates listed on the label.

**Pests Controlled at 4 fl. oz. Timectin 0.15 EC & T&O Insecticide/Miticide /100 gallons:**

- Mites including: European Red Mite, Twospotted Spider Mite, Ceramine Spider Mite, Southern Red Mite, Sycamore Spider Mite, Tarsonemid Mites (Cyclamen and Broad Mites), Eriophyid Mites (Rust and Red Mites)

**Application Instructions:**
- Make applications of Timectin 0.15 EC & T&O Insecticide/Miticide in 200 to 400 gallons of water per Acre. For thorough coverage of plants, more than 400 gal. of water per Acre may be required.
- Use at least 8 fl. oz. per Acre if using less than 200 gal.
- Use no more than 16 fl. oz. per Acre in 400 or more gal. of water (that is, add 2.5 fl. oz. Timectin 0.15 EC & T&O Insecticide/Miticide per 100 gal. if total spray volume is 600 gal.).
- Apply when mites first appear. Make repeat applications as necessary to maintain control.
- For Tarsonemid mites, make repeat applications to newly developing tissue to maintain control.

**Pests Suppressed at 8 fl. oz. Timectin 0.15 EC & T&O Insecticide/Miticide /100 gallons:**

- Linyphia Leafmines, Boxwood Leafminer

**Application Instructions:**
- Make applications of Timectin 0.15 EC & T&O Insecticide/Miticide in 100 to 200 gallons of water per Acre. For thorough coverage of plants, more than 400 gal. of water per Acre may be required.
- Use at least 8 fl. oz. per Acre if using less than 100 gal.
- Use no more than 16 fl. oz. per Acre in 200 or more gal. of water (that is, add 4 fl. oz. Timectin 0.15 EC & T&O Insecticide/Miticide per 100 gal. if total spray volume is 400 gal.).

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty containers.

**Pesticide Storage**

Store in a tightly closed container in a cool, dry place.

**Pesticide Disposal**

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Pesticide spray mixture or residue that cannot be used should be disposed of in a landfill approved for pesticides. Improper disposal of excess pesticide spray mixture or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your local solid waste agency or hazardous waste disposal company.
LIMITED WARRANTY AND DISCLAIMER

Tedco International USA warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below.

Our directions for use of this product are based upon tests believed to be reliable. The use of this product being beyond control of the manufacturer, no guarantee, expressed or implied, is made as to the effects of such use or the results to be obtained if not used in accordance with printed directions and established safe practices. To the extent consistent with applicable law, buyer’s exclusive remedy and manufacturer or seller’s exclusive liability for any and all claims, losses, damages or injuries resulting from the use or handling of this product, whether or not based in contract, negligence, strict liability in tort or otherwise shall be limited, at the manufacturer’s option to replacement of, or the repayment of the purchase price for, the quantity of product with respect to which damages are claimed.

Inherent Risks of Use

It is impossible to eliminate all risks associated with use of this product. Crop injury, lack of performance, or other unintended consequences may result because of such factors as use of the product contrary to label instructions (including conditions noted on the label, such as unfavorable temperatures, soil conditions, etc.), abnormal conditions (such as excessive rainfall, drought, haying, hurricanes), presence of other materials, the manner of application, or other factors, all of which are beyond the control of Tedco International USA or the seller. All such risks shall be assumed by buyer.

Terms and Conditions of Use

If terms of the Limited Warranty & Disclaimer and Inherent Risks of Use are not acceptable, return unsold package at once to the seller for a full refund of purchase price paid. Otherwise, use by the buyer or any other user constitutes acceptance of the terms under Warranty Disclaimer and Inherent Risks of Use.
