DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING.

APPLICATION FOR SWIMMING POOLS

The product is compatible with all EPA registered sanitizers including chlorine, bromine, biguanide, alkyl

water, ozone, and mineral sanitized pools. When using other EPA registered products, always follow the directions

time for use. Sunlight, rain, temperature, number of

membrane and frequency of pool use, all affect the rate of

chlorine loss. Always maintain chlorine levels between 1-2

parts per million (ppm). Ensure all pool equipment is

working properly. Clean or backwash the filter following

the manufacturer’s directions.

INITIAL APPLICATION:

(1) if water is in excess, add 25-35 drops per 20,000

(1-3 oz. up to 1000 gallons) of water.

(2) for clean pools, add 10-15 drops per 20,000

(0.5-1 oz. per 4000 gallons) of water.

(3) Yound water into the pool by distributing product along

the edge of the pool.

(4) Operate the pump continuously for 24 hours to allow

product to distribute evenly through the pool and to

allow the filter to recover any phosphate removed from the

pool.

(6) If necessary, brush soft algae off pool surfaces. If algae is still present, repeat step 1.

MAINTENANCE:

To prevent algae growth, add this product weekly or after

heavy rain in the rate of 4-6 drops per 20,000 gallons
(0.2-0.3 oz. per 10,000 gallons) of water to pour directly

into the water along the edge of the pool. Maintain the

chlorine by running the pump for three to six hours after

applications.

NOTE: Swimmers can re-enter the pool 15 minutes after

application.

WINTERIZING:

Use of this product for winterizing will make opening in the

spring easier by both eliminating any algae present at one

time of closing and by removing the nutrient phosphate that may

be present.

Test the water and adjust to the proper levels. After pool is

no longer in use, inject twice with a recommended inorganic

treatment product according to its label directions. Allow

the pump to circulate for several hours or overnight. Add

algaecide centrally to pool water while walking around the

pool so that it is evenly distributed. Use in the rate of 20

drops per 10,000 gallons (1/5 oz. per 4,000 gallons). Allows to circulate for a few hours. Clear pool

without the use of vacuum, drain pump and water trainable per

manufacturer’s instructions. Cover with a solid cover if possible. Pools without a solid cover may need a second

treatment later in the non-swimming season.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes immediate eye damage and

skin burns. May be fatal if inhaled. Avoid breathing vapor or

spray mist. Harmful swallowed or absorbed through the

skin. Do not get in eyes, on skin or on clothing. Wear protective

personal equipment (goggles, face shirt, or safety

glasses), rubber gloves and protective clothing when

handling. Wash thoroughly with soap and water after

handling and before eating, drinking, using tobacco or

using the toilet. Remove contaminated clothing and wash

clothing before reusing.

FIRST AID

IF IN EYES: Hold eyelids open and rinse slowly with water

for 15 minutes. Rinse contact lenses if present and

immediately. If irritation persists, call a physician.

IF INHALED: Remove patient to fresh air. If patient is not

breathing, call 911 or an ambulance. If patient is not

breathing, give artificial respiration. If patient’s mouth is

blocked, give mouth-to-mouth resuscitation if possible. Call a

physician or center or doctor for further instructions.

IF SWALLOWED: Call a physician or center or doctor

immediately for treatment advice. Do not give anything by mouth to an unconscious patient.

Have the product container or label with you when calling a

physician or center or doctor for instructions.

IN CASE OF EMERGENCY CALL:

1-800-252-9527

PHYSICAL OR CHEMICAL HAZARDS:

Do not use over bare metal or open flame. Do not mix

with acids, soap or mineral distillate or other water

treatment chemical.

ENVIRONMENTAL HAZARDS:

This product reacts with soil, organic materials, plants, and

waterways. In Case of Spill:

Absorb with sand or vermiculite and place in closed

containers for disposal. Ventilate area and wash spill site

with soap and water immediately. Do not contaminate the

ground or surface water. Do not mix with other chemicals.

STORAGE AND DISPOSAL

Keep this product in its tightly closed container away from

people and children unfamiliar with its use. Store in cool,

dry, well-ventilated area. Keep away from food and

water. Disposal of container: Do not reuse or refill this

container, repackage it or use it as a container. Offer for recycling if available. If not, discard in trash.
