GLUTEX™ GS2 Sanitizer

ACTIVE INGREDIENTS: Glutaraldehyde

INACTIVE INGREDIENTS: Water

TOTAL: 20%

FIRST AID

IF SWALLOWED:
- If the person is fully alert and cooperative, have the person rinse mouth with plenty of water. Have the patient drink 4 to 10 ounces (120-300 mL) of water or milk.
- Do not induce vomiting. Do not attempt mouth rinse if the person has respiratory distress, altered mental status, or nausea and vomiting.
- Call a physician and transport to emergency facility immediately. See Note to Physician.

IF IN EYES:
- Wash immediately and continuously with flowing water for at least 30 minutes.
- Remove contact lenses after the first 5 minutes and continue washing. Obtain prompt medical consultation preferably from an ophthalmologist.
- Call a poison control center or a doctor immediately for treatment advice.

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15–20 minutes.
- Call a poison control center or a doctor for treatment advice.

IF INHALED:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or a doctor for further treatment advice.

NOTE TO PHYSICIAN:
Astonishment may cause lung damage. Probable mucosal damage may contaminate the use of gastric lavage. Have the product container and label with you when calling a Poison Control Center or doctor or going for treatment.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

1. General sanitizing of environmental surfaces prior to introduction of algae. Remove all animals from the area. Clean out heaters, filters, or other devices. Thoroughly saturate all surfaces with a solution prepared by mixing the approximate amount (see solution preparation and application guidance below) of GLUTEX GS2 Sanitizer with water. Allow to stand for at least 5 minutes, or for longer depending on the organisms being treated. (See solution preparation and application guidance above).

2. Verify thoroughly before use.

3. For treatment of air and surfaces in high humidity conditions every time with water spray using a solution by mixing the approximate amount of GLUTEX GS2 Sanitizer with water. See solution preparation and application guidance above. Fog or infrared the solution into walls or heating systems, using appropriate application equipment. Fogging of poultry houses should only be done in such a way that the consumer is outside the poultry house when applying the fog.

4. At least 3 hours before re-entry after application.

5. For treatment of air and surfaces in low humidity conditions with closed cell walls: Prepare a solution by mixing the approximate amount of GLUTEX GS2 Sanitizer with water. See solution preparation and application guidance above. Spray or irri

6. At least 3 hours before re-entry after application.
