- Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the treated areas during application. Do not allow people or pets to enter the treated area until dusts have settled.
- Do not apply this product to ditches or gutters. Do not apply this product to Florence Ave. or the waterway.
- Do not use this product where desirable clovers are present. Do not apply this product on or near desirable clovers or in the riparian zone.
- Do not use this product on or near desirable plants, and avoid sprinkling granules onto roads, driveways, or other similar areas.

INSTRUCTIONS:
- Howard Johnson’s Weed & Feed with Trimex-24® Herbicide controls a wide range of weed species including dandelion, chickweed, knotweed, garlic mustard, and other plants commonly found in home lawns. In addition, 19-4-8 fertilizer provides plant nutrients for a supply of plant food. Possible retrofit treatment may be necessary if the lawn is heavily overgrown, or it is advised that lawn moisture and pH requirements are met in a state of good growth. A second application may be made at a 30% rate of the first application. A lawn typically uses 1 to 2 pounds of nitrogen per 1,000 square feet per year. When used as directed, this product will supplement your regular fertilizer program by providing 0.627 of nitrogen per 1,000 square feet. Please consult your local extension office for questions regarding a regular fertilizer program suitable for your geographic region.

THE maximum broadcast application rate is 3.8 pounds per 1,000 square feet per application (1.2 x 2.4 x 0.65 = 0.627 MCPP per a and 0.111 MCPP as per acre per application). The maximum number of broadcast applications is limited to 2 per year with a minimum of a 30 day between applications. The maximum seasonal rate is 10.0 pounds per 1,000 square feet per application (2.4 x 2.4 x 2.8 x 0.65 = 0.627 MCPP per a and 0.222 MCPP as per acre).

1. Mow lawn to normal height 1 to 2 days before application. Mow before application. Mow before application. Mow before application.

2. Apply when weed is young and actively growing, preferably in the morning when temperatures are warm. Spraying when temperatures are warm is not possible at time of application. Spraying with water to allow the granules to disperse and to remove any unabsorbed weed.

3. Do not apply when weeds have not been cut for at least 2 days after application. At this time is thorough watering should be made.
