HOTLINE NUMBER: Have the product container or label with you when calling a poison control center or doctor for treatment. For Emergencies: Call your local poison control center or 1-800-662-1222 (in Alaska call 907-267-2499) 24 hours a day, 7 days a week. 

Note to physician: This product contains organophosphates that inhibit cholinesterase.

CAUTION
Keep out of reach of children

Frequent use of phosphoric and pyrethrin detergents can cause collateral damage to non-target organisms.

If swallowed: Call Poison Control Center or doctor immediately for treatment advice. Do not induce vomiting. Give 1-2 glasses of water if able to swallow.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the eyes are flushed. Call Poison Control Center or doctor for treatment advice. Do not rub eyes.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call Poison Control Center or doctor for treatment advice.

Container Disposal: Dispose of empty pouch in a sanitary landfill or disposal facility.

Pesticide Disposal: Waste (spent strips) resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Pesticide Storage: Store in cool place in original container. Do not contaminate water, food or feed by storage or disposal.

STORAGE AND DISPOSAL

Chamber:
- After the last honey flow, remove honey from the frames of the colonies for rearing and pasteurization. The bees may be replaced on the frames to restock the comb.
- Do not treat more than 45 days after the last honey flow. Honey supers may be replaced on brood chambers.
- Do not treat more than four times per year for the small hive beetle.

For Varroa Treatment:
- To control Varroa mite, remove honey frames of colonies.

For Small Hive Beetle Treatment:
- Place one sheet of cardboard near the bees from the comb boards and the strips down. Make sure the cardboard is placed against the cardboard (opposite the strips), with the sheet side of the cardboard (the side opposite the strips) facing the bees from the comb boards.
- Place the honey supers near the cardboard (opposite the strips) facing the bees from the comb boards.
- Place cardboard under the strips down.
- Remove honey frames of colonies.

CheckMate+:
- Reagent number of CheckMate+ strips from the package. Use the strips in an area that is not a hive. Place the strips in an area that is not used on hives for rearing and pasteurization. The bees may be replaced on the frames to restock the comb.
- Do not use the strips in an area that is not used for rearing and pasteurization. The bees may be replaced on the frames to restock the comb.

CheckMate+ is not recommended for use in honeybee colonies.

Inconsistent with its label.

It is a violation of federal law to use this product in manner inconsistent with its label.

Do not treat more than four times per year for the small hive beetle.

For Varroa Mites and Small Hive Beetles in Honeybee Colonies

Directions for Use

For Control of Varroa Mites and Small Hive Beetles in Honeybee Colonies

After the last honey flow, remove honey from the frames of the colonies for rearing and pasteurization. The bees may be replaced on the frames to restock the comb. Do not treat more than twice a year. Do not treat more than 45 days after the last honey flow. Do not leave the strips in the hive for at least 42 days.

Remove honey frames of colonies.
