Rats, Mice, Meadow Mice, Deer Mice, & Kangaroo Rats

ACTIVE INGREDIENT:
Zinc Phosphide: (CAS #1314-84-7) . . . . . 2%
OTHER INGREDIENTS: . . . . . . . . . . . 98%
TOTAL  100%

Net Weight:
50 lbs
(22.72 kg)

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panel for First Aid and precautionary statements.
ENVIRONMENTAL HAZARDS

This product is extremely toxic to mammals, birds, and other wildlife. Dogs, cats and scavenging mammals and birds might be poisoned if they feed upon or in contact with this bait. Do not apply directly to water or to intolerable areas below the mean high-water mark. Do not allow bait to be exposed on soil surfaces. Do not contaminate water when disposing of equipment wash water or waste.

ENNDEDANGERED SPECIES CONSIDERATION

Notice: The use of this product may pose a hazard to Federally designated endangered or threatened species. It is a Federal offense to use any pesticide in a manner that results in the death of a member of an endangered species. Consult the nearest U.S. Fish and Wildlife Service regional office or the appropriate State Agency for current information on habitat occupied by endangered species.

Whipping Crane (Grus americana): Do not use this product in habitats occupied or occasionally visited by whooping cranes during the period from 30 days before the expected arrival of cranes to 30 days after the time of their usual departure.

Black-footed Ferret (Mustela nigripes): Do not use the product within 0.5 miles of any prairie dog town that lies to the black-footed ferret exposure to Zinc Phosphide or destruction if the prey base, unless the soil is an isolated black-tailed prairie dog town less than 60 acres in size or an isolated white-tailed prairie dog town less than 100 acres in size, unless the town had been appropriately surveyed, using methods acceptable to the U.S. Fish and Wildlife Service, and found by the FWS to be suitable site for ferret reintroduction.

Gray Wolf (Canis lupus) and Grizzly Bear (Ursus arctos horribilis): Unless the local U.S. Fish and Wildlife Service office has determined that there are no gray wolves or grizzly bears in the general vicinity of all applications in Montana and Wyoming, do not apply the product outdoors in which animals of these species.

Attwater’s Greater Prairie Chicken (Tympanuchus cupido attwateri): Do not use this product in the present occupied range of the Attwater’s Greater Prairie Chicken in the following counties: Anahuac, Austin, Brazoria, Colorado, DeWitt, Ft. Bend, Galveston, Galad, Harris, Kleberg, Victoria, Wharton, and Willacy (Texas).

Yellow-Shanked Blackbird (Agaephiza xanthoptera) and Puerto Rican Plain Pigeon (Columbia inuata wetmorei): This product must not be used in the following areas in Puerto Rico except in tapemon-proof bat boxes: (1) within 0.3 mile (1.6 kilometers) of Coral Azure, Lago Colorado, Calo, Santa Gertrudis; (2) within 0.4 mile (1.6 kilometers) of La Esperanza, south of Highway 110 to City of Ponce and all Mona Island.

Utah Prairie Dog (Cynomys parvidens): Do not use this product in critical habitat of the Utah Prairie Dog (Utah).

Salt Marsh Harvest Mouse (Reithrodontomys raviventris): Do not use this product in critical habitat within 0.5 miles of salt marsh vegetation and/or local water wetlands which are located (1) year or year adjacent to San Pablo Bay and San Francisquito Bay or Bay I in the Sacramento River below or adjacent to confluence of the Sacramento River and the San Joaquin River (California).

Moro Bay Kangaroo Rat (Dipodomys hemionus moro): Do not use this product in critical habitat within 0.5 miles of Cypress Park which is located on Morro Bay (California).

Grant Kangaroo Rat (Dipodomys ingens): Follow the interim measures for protecting endangered species in the California Endangered Species Bulletin for the following California counties: Fresno, Kern, Kings, Merced, Monterey, San Benito, San Luis Obispo, Santa Barbara, and Tulare (California).

Tripton Kangaroo Rat (Dipodomys nitratoides tripton): Follow the interim measures for protecting endangered species in the California Endangered Species Bulletin for the following California counties Kern, Kings, and Tulare (California).

Fresno Kangaroo Rat (Dipodomys nitratoides ellioti): Follow the interim measures for protecting endangered species in the California Endangered Species Bulletin for the following California counties: Fresno, Kern, Kings, Madera, and Merced (California).

Stephens Kangaroo Rat (Dipodomys stephensi): Follow the interim measures for protecting endangered species in the California Endangered Species Bulletin for the following California counties: San Bernardino, San Diego, and Riverside (California).

San Bernardine Kangaroo Rat (Dipodomys merriani parvus): Follow the interim measures for protecting endangered species in the California Endangered Species Bulletin for the following California counties San Bernardino and Riverside (California).

Northern Idaho Ground Squirrel (Spermophilus tridecemlineatus): Do not use this product within 0.5 miles of critical habitat of the Northern Idaho Ground Squirrel in Adams and Walla counties (Washington).

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. READ THIS LABEL: Read the entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

USES ASSOCIATED WITH BUILDINGS AND STRUCTURES TO CONTROL NORWAY RATS, ROOF RATS, AND HOUSE MICE

IMPORTANT: Do not expose children, pets, or other non-target animals to rodenticides. To help prevent accidents:
1. Store product not in use in a location out of reach of children and pests.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. It can be mistaken for food by pets and wildlife. An insecticide or rodenticide that is attractive to children can cause serious or fatal illness.
3. Dispose of product container, and unused, spoiled, and un consumable bait as specified on this label.

Note: Baits stations are mandatory in outdoor, above-ground uses. Tamper-resistant bait stations must be used if children, pets, non-target mammals, or birds may access this bait.

USE RESTRICTIONS:

In and around buildings and structures

This product may only be used to control Norway rats, roof rats and house mice in and within 100 feet of non-structural structures in a manner so as to be vulnerable to commercial rodent infestations and/or to harboring or attracting rodents. Structures include: industrial and commercial buildings, trash receptacles, agricultural and public buildings, vegetable/fruit crops (strawberries, apple, alfalfa and all other root and leaf crops), buildings and related structures associated with and around these sites. Fence and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to food or feed crops. Do not broadcast bait.

Inside buildings

The product may be applied to active rodent burrows to control Norway rats, and roof rats within or beyond 100 feet of buildings and non-structural structures, provided that infestations of these rodents have been confirmed. Because Norway rat infestations may occur in areas farther than 100 feet from buildings and non-structural structures where the rodents have ample supplies of food and cover, efforts should be made to remove food, trash, garbage, clutter, and debris. Bait must be placed not less than 6 inches inside active Norway rat burrows. Do not broadcast bait.

SELECTION OF TREATMENT AREAS: After removing as much food, water and harborage as possible, determine dry or free areas where rats and mice most likely feed and consume the bait. Generally these areas are along walls, by gravel openings, in corners, under and around buildings, in corners and concealed places, between floors and walls, or in locations where rats and mice or their signs have been observed.

APPLICATION DIRECTIONS FOR RATS: Apply 1 to 2 teaspoon amounts of bait per placement. For outdoor use, please bait in active rodent burrows or tamper-resistant bait stations. Maintain an uninterrupted supply of fresh bait until all signs of feeding have stopped. Do not treat the same area more than 30 days intervals.

APPLICATION DIRECTIONS FOR MICE: Apply 1 teaspoon of bait per placement at 8 to 10 feet intervals. For outdoor use, place bait in tamper-resistant bait stations. Maintain an uninterrupted supply of fresh bait until all signs of feeding have stopped. Do not treat the same area more than 30 days intervals.

FOLLOW-UP: Using water-proof covers, keep and properly dispose of all dead animals and excess product in accordance with "Pesticide Disposal" instructions. Use digester and hot water to wash wasters for applications into burrows. Do not use soap for cleaning, holding or hardening food or feed. To discourage nestbuilding, limit sources of rodent food, water, and harborage as much as possible.

USES ASSOCIATED WITH NON-BUILDING AGRICULTURAL SITES

Use Restrictions for all Non-Structural Agricultural Sites

\- Do not apply this product in a way that will contact vines or other plants, either directly or through drift.
\- Only properly protected handlers may be in the area during application.
\- Keep all other persons out of the treated area during application.
\- Do not apply on roads, near residential areas, or over water.
\- Do not broadcast over crops unless directions specifically permit aerial application.
\- Apply bait on warm dry days.

Disposal of Spilled and Excess Bait, and Carcasses

Information Applicable for All Agricultural Uses

\- Spilled and Excess Bait: Wearing waterproof gloves, clean up any spilled bait immediately and collect excess bait from application equipment. If bait cannot be applied according to label directions, properly dispose of a according to the "Pesticide Disposal" text.

\- Carcasses: Wearing waterproof gloves, bury carcasses of ground squirrels (18 inches deep) in furrows dug on site or inactive burrows. Cover and pack with soil. Alternately, use other disposal methods that state and local authorities allow.
RESTRICTED USE PESTICIDE

Due to Hazards to Non-target Species
For retail sale only and not for commercial use. Not for sale or use outside the continental United States. Not for use by Aquaculture facilities.

NOMENCLATURE OF NURSERY STOCK, COVER / CHRISTMAS TREE, POPULAR / COTTONWOOD, ORNAMENTAL, AND HOMESTEADING FRUIT TREE PLANTATIONS

FLOWER: For control of meadow voles, prairie voles, pine voles, California voles, long-tailed voles, Oregon voles, mouse voles, management voles (Microtus sobrinus) in lawns, ornamental grasses, parks, and nurseries. Bait must be applied directly into pocket gopher underground burrows or into underground terns created by burrow-builder machines. Do not apply bait above ground.

HAND BAITING: Follow the directions indicated below to locate and treat pocket gopher burrows then apply bait.

In addition, persons loading pellets or baits into aircraft or mechanical ground equipment and persons loading/applying with a hand-pushed or hand-held equipment, such as a push-type equipment by burial.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

This product may only be used to control Ord’s kangaroo rat (Dipodomys ordii) and Pocket gophers (Thomomys spp.).

TREATMENT FOR PET POISONING

For control of meadow voles, prairie voles, pine voles, California voles, long-tailed voles, Oregon voles, mouse voles, management voles (Microtus sobrinus) in lawns, ornamental grasses, parks, and nurseries. Bait must be applied directly into pocket gopher underground burrows or into underground terns created by burrow-builder machines. Do not apply bait above ground.

HAND BAITING: Follow the directions indicated below to locate and treat pocket gopher burrows then apply bait.

In addition, persons loading pellets or baits into aircraft or mechanical ground equipment and persons loading/applying with a hand-pushed or hand-held equipment, such as a push-type equipment by burial.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

This product may only be used to control Ord’s kangaroo rat (Dipodomys ordii) and Pocket gophers (Thomomys spp.).

TREATMENT FOR PET POISONING

For control of animal pests (Geomyinae, Cricetinae), eastern pocket gophers (Geomys bursarius), western pocket gophers (Cynomys parvidens), and pocket gophers (Thomomys spp.) in open areas.

USE RESTRICTIONS: For control of California ground squirrels (Citellus beecheyi) and Richardson’s ground squirrels (Citellus leucurus) in pome apple (Malus), stone fruit (Prunus), cherry (Prunus), apricot (Prunus armeniaca), plum (Prunus domestica), and their tree orchards (Malus, Prunus, Prunus, P. domestica) in pome apple (Malus), stone fruit (Prunus), cherry (Prunus), apricot (Prunus armeniaca), plum (Prunus domestica), and their tree orchards (Malus, Prunus, P. domestica).

Applying Bait to Runways: Using a long-handled spoon or mechanical probe, drop one teaspoon (4 grams) of bait at 2-4 locations using a mechanical probe or hand tool.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. PESTICIDE STORAGE: Store only in original container, in a cool, dry place inaccessible to children and pets. Keep containers closed and away from chemicals.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticides, spray misture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Authority, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Completely apply by shaking container before use. Do not apply to sites with nesting birds, bats, or other wildlife. Do not apply to sites that are accessible to children or pets. Do not apply to sites that are accessible to livestock.

For control of California ground squirrels (Citellus beecheyi) and Richardson’s ground squirrels (Citellus leucurus) in pome apple (Malus), stone fruit (Prunus), cherry (Prunus), apricot (Prunus armeniaca), plum (Prunus domestica), and their tree orchards (Malus, Prunus, P. domestica) in pome apple (Malus), stone fruit (Prunus), cherry (Prunus), apricot (Prunus armeniaca), plum (Prunus domestica), and their tree orchards (Malus, Pruness, P. domestica).

Applying Bait to Runways: Using a long-handled spoon or mechanical probe, drop one teaspoon (4 grams) of bait at 2-4 locations using a mechanical probe or hand tool.

TIMOTHY AND TIMOTHY-ALFALFA MIXTURES PRODUCED FOR HAY

(Broadcast from other column)

BROADCASTING:

Broadcasting broadcast using hand, cylinder seeder, or ground-driven dispensing devices. A maximum of 5 lbs per acre (0.12 lb. ai/A) is not to be used within the critical habitat of the Attwater’s Greater Prairie Chicken in the present occupied range of the Attwater’s Greater Prairie Chicken in the state of Texas, and the state of California. Do not graze animals in treated areas.

This product must not be used in the following areas:

- Occasionally visited by whooping cranes during the period from 30 days before the expected nesting season.
- Critical habitat of the Morro Bay Kangaroo Rat (Dipodomys merriami) in San Luis Obispo County, California.
- Critical habitat of the Utah Prairie Dog (Cynomys ludovicianus) in the counties of Utah and Arizona.
- Critical habitat of the Richardson’s ground squirrel (Spermophilus richardii) in Idaho and Washington.

This product may be broadcast by hand or ground-driven dispensing devices at a rate of 10 lbs per acre (0.2 lb. ai/A) per application per growing season. (3.7 lbs / A Rate)
