ZP® AG

PELLETS

FOR CONTROL OF

Ground Squirrels  Gophers  Voles

Rats, Mice, Meadow Mice, Deer Mice, & Kangaroo Rats

ACTIVE INGREDIENT:
Zinc Phosphide: (CAS #1314-84-7) . . . . . . . . . . . . . . . . . 2%
OTHER INGREDIENTS: . . . . . . . . . . . . . . . . . . . . . . . 98%
TOTAL 100%

Net Weight:
50 lbs
(22.72 kg)

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panel for First Aid and precautionary statements.

RESTRICTED USE PESTICIDE
DUE TO HAZARDS TO NON-TARGET SPECIES
For retail sale to and use only by Certified Applicators or persons under their direct
supervision and only for those uses covered by the Certified Applicator’s certification.

The World Leader In Rodent Control Technology®

ZP Ag Pellets 20141015 37 3240.pdf
### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with this label. READ THIS LABEL: Need to follow all directions and use precautions.

#### USE ASSOCIATED WITH BUILDINGS AND STRUCTURES TO CONTROL NORMAL RATS, ROOF RATS, AND HOUSE MICE

**Important:** Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:
- 1. Store product in a location not in use out of children's and pets' reach.
- 2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, and in or near tamper-resistant bait stations.
- 3. Children must be monitored to ensure that they do not enter the treated area, and that any liquid or dry bait is disposed of properly.
- 4. Birds and dogs by children under six years of age, and must be in a manner that prevents such children from reaching or ingesting baits and determining bait stations. It can be taken from bait stations when they are dry and unsanitized, or if other birds or mammals that are not nontarget animals are found. In areas where predators are vulnerable, more than eighteen birds, 4000 feet above sea level, and 4000 feet above sea level.

#### PHYSICAL-CHEMICAL CONSIDERATIONS

Do not use with or near any creditors.

#### ENDANGERED SPECIES CONSIDERATIONS

Notice: This product may be used in a forested area to protect endangered/ threatened species. It is a Federal Forest Service rule that in a manner that results in the destruction of a particular species. Consult the nearest U.S. Forest Service regional office or the appropriate State Agency for current information on habitats occupied by endangered species.

#### MOHOGAN CRANE (Grus americana)

Do not use this product in habitats occupied or occasionally visited by mohogning cranes during the period of 30 days before the expected arrival of cranes between 30 days after the initial departure.

#### Black-footed Ferret (Mustela nigripes)

Do not use this product within 7 kilometers (4.4 miles) of any prairie dog town before the black-footed ferret from 20.5 feet. Poisonous or destruction of the prey by the 20.5 feet. Do not use this product within 7 kilometers (4.4 miles) of any prairie dog town before the native species of the prey by the 20.5 feet. Do not allow bait to be exposed on soil surfaces. Do not contaminate water when disposing of equipment waste or moisture.

#### PERSONAL PROTECTIVE EQUIPMENT (PPE)

Follow manufacturer’s instructions for cleaning/sanitizing PPE. If no such instructions for use, always wash hands thoroughly after applying and before eating, drinking, smoking, or using tobacco, or using the toilet. Wear long-sleeved shirt and long pants, shoes, gloves, and protective eyewear. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

#### FOLLOW MANUFACTURER’S INSTRUCTIONS FOR CLEANING/ SANITIZING PPE. IF NO SUCH INSTRUCTIONS ARE AVAILABLE, ALWAYS WASH HANDS THOROUGHLY AFTER APPLYING AND BEFORE EATING, DRINKING, SMOKE, OR USING TOBACCO, OR USING THE TOILET. WEAR LONG-SLEEVED SHIRT AND LONG PANTS, SHOES, GLOVES, AND PROTECTIVE EYEWEAR. ANY PERSON WHO RETRIEVES CARCASSES OR UNUSED BAIT FOLLOWING APPLICATION OF THIS PRODUCT MUST WEAR GLOVES.

#### ENVIRONMENTAL HAZARDS

This product is extremely toxic to mammals, birds and other wildlife. Dogs, cats and scavenging mammals and birds to fitness feed and use animals that have eaten bait. Do not apply directly to water or over water bodies or to the white high marsh water. Do not allow bait to be exposed on soil surfaces. Do not contaminate water when disposing of equipment waste or moisture.

####ewis St. (Ursus arctos horribilis)

The use of this product may pose a hazard to Federally designated endangered/threatened species. It is a Federal Forest Service rule that in a manner that results in the destruction of a particular species. Consult the nearest U.S. Fish and Wildlife Service regional office or the appropriate State Agency for current information on habitats occupied by endangered species.

#### HAMMOG CRANE (Grus canadensis)

Do not use this product in habitats occupied or occasionally visited by hawking cranes during the period of 30 days before the expected arrival of cranes between 30 days after the initial departure.

#### Gray Wolf (Canis lupus)

Do not use this product in the areas that are now gray wolves or grizzly bears.

#### Tipton Kangaroo Rat (Dipodomys merriami parvus)

Follow the Interim Measures for protecting endangered species in the California Endangered Species Bulletin for the following California counties: Kern, Kings and Tulare (California).

#### Richardson’s Ground Squirrel (Spermophilus beecheyi)

Follow the Interim Measures for protecting endangered species in the California Endangered Species Bulletin for the following California counties: San Bernardino, and Riverside (California).

#### WHOOPING CRANE (Grus americana)

Follow the Interim Measures for protecting endangered species in the California Endangered Species Bulletin for the following California counties: San Bernardino and Riverside (California).

#### Northern Idaho Ground Squirrel (Spermophilus brunneus)

Do not use this product within 10 kilometers of the northern Idaho Ground Squirrel’s habitat in Adams and Valley counties, Idaho.

#### Aransas Whooping Crane (Grus americana americana)

#### Site Protection

Visitors who retrieve carcasses must wear gloves.

#### Disposal of Spilled and Excess Bait, and Carcasses

**Information Application for All Agricultural Uses**

- Spilled and Excess Bait:
  - If you experience signs and symptoms such as nausea, abdominal pain, vomiting, or headache, discontinue use of hand. Do not store away fromreach of children or pets. Keep all other persons out of the treated area during this application.

- **Carcasses:**
  - Harmful if swallowed or inhaled; causes severe irritation, inhibition of intake, contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Wear long-sleeved shirt and long pants, shoes, gloves, and protective eyewear. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

- **First Aid**
  - In case of exposure, rinse with copious amounts of water. If symptoms continue, seek medical attention.

- **Pesticide Disposal:**
  - Dispose of all spilled materials according to “Pesticide Disposal” instructions.

### MACADAMIA NUT ORCHARDS AND ADJACENT NONCROP AREAS

**Use Restrictions:**

- Do not apply this product more than 100 feet from apple, pear, prune, nectarine, or apricot trees. Do not apply this product in a manner that will contact workers or other persons, either directly or indirectly, through drift.

### FOUQUET NUTTREE ORCHARDS (SAINT JAMES)

**Use Restrictions:**

- Do not apply this product in a manner that will contact workers or other persons, either directly or indirectly, through drift.
For use in rangeland, pastures, non-crop rights-of-way, alfalfa, timothy, barley, potatoes, wheat, grain, long-leaved beeches, grape vines, fruit and nut tree orchards, macadamia nut orchards, and in around buildings, and other sites to control the species listed in the use directions.

NOTE TO PHYSICIAN OR VETERINARIAN
Contains the phosphate – producing active, Zinc Phosphate. Probable mucosal damage may contaminate the use of gastric lavage. For animals ingesting bait and showing phosphorus poisoning, induce vomiting using by hydrogen peroxide. Sodium bicarbonate can be given orally to neutralize the stomach acidity. The stomach and intestinal tract can be evacuated, oxygen administered and cardic and circulatory stimulants given. See Left Panel for additional precautionary statements.

POISONOUS PLANTS

Storage and Disposal
Do not contaminate water, food or feed by disposal.

PESTICIDE STORAGE: Store only in original containers in a cool, dry place inaccessible to children and pets. Keep containers closed away from chemicals. 

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mist, or residue is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING: Nonrefillable container. Do not reseal or refill this container. Offer for recycling, if available. Completely empty bag by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Dispose of bags in an approved waste disposal facility or by incineration.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. To the extent consistent with applicable law, buyer assumes all risk of use and handling of this material when such use or handling is contrary to label instructions. 

Net Weight: 50 lbs (22.7 kg) See side panels for additional precautionary statements.

Manufactured by:
Bell Laboratories, Inc.

Restricted Use Pesticide
Due to Hazards to Non-target Species
For retail sale to and for Census Tracts of U.S. Census tracts for persons under their direct supervision and only for those uses covered by the Certified Applicator’s certification.

Information Applicable for All Agricultural Uses

USE RESTRICTIONS: For control of meadow voles, long-tailed voles, California voles (except for endangered subspecies), Arvicanthis yuma. See section "ENDANGERED SPECIES CONSIDERATION": Oregon voles, mountain voles, and Townsend's voles (Mus musculus) in areas with natural grassland, meadow, meadow, meadow, and meadow habitats. Apply at a rate of 0.1-0.2 lbs. ai/A, one in the fall after the last cutting and one in the spring when timothy and other grasses are in full leaf, and the PHI is not to exceed 60 days per application. Do not apply to any food crops to be harvested by equipment. A minimum of 20 lbs (0.4 lb ai/A) per acre may be applied annually.

TIMOTHY AND TIMOTHY/ALFALFA AND MIXTURES PRODUCED FOR HAY (Continued from other column)

(a) 1.2–2.0 lbs. ai/A, one in the fall after the last cutting and one in the spring when timothy and other grasses are in full leaf, and the PHI is not to exceed 60 days per application. Do not apply to any food crops to be harvested by equipment. A minimum of 20 lbs (0.4 lb ai/A) per acre may be applied annually.

TIMOTHY PRODUCED FOR SEED

USE RESTRICTIONS: For control of meadow voles, long-tailed voles, California voles (except for endangered subspecies), Arvicanthis yuma. See section "ENDANGERED SPECIES CONSIDERATION": Oregon voles, mountain voles, and Townsend's voles (Mus musculus) in areas with natural grassland, meadow, meadow, and meadow habitats. Apply at a rate of 0.1-0.2 lbs. ai/A, one in the fall after the last cutting and one in the spring when timothy and other grasses are in full leaf, and the PHI is not to exceed 60 days per application. Do not apply to any food crops to be harvested by equipment. A minimum of 20 lbs (0.4 lb ai/A) per acre may be applied annually.

GRAPE VINEYARDS

USE RESTRICTIONS: For control of deer mice (Peromyscus maniculatus), white-footed mice (P. leucopus), chipmunks (Tamiasciurus hudsonicus), squirrels (Sciurus carolinensis), and pocket gophers (Thomomys bottae, T. talpoides, T. talpoides). Apply at a rate of 0.1-0.2 lbs. ai/A or 0.04-0.06 lb ai/A per acre. Do not apply to pome fruit (apple, pear), stone fruit (peach, cherry, apricot, plum, prune, nectarine) and nut tree (hickory, acorn, pecan) orchards. Avoid planting on soil previously treated with this material. A minimum of 20 lbs (0.4 lb ai/A) per acre may be applied annually.

HARELANDS, PASTURES, AND ADJACENT NONCROP AREAS

KANGAROO RATE

USE RESTRICTIONS: This product may only be used to control Ord’s kangaroo rats (Dipodomys ordii), Belding’s kangaroo rats (D. velox), and Richardson’s kangaroo rat (D. leucopus) in rangeland, pastures and adjacent noncrop areas. Product must not be applied on roads, near residential areas, over water where plants are grown for food or feed.

PREBaiting (Recommended): Prebait with a 0.50 lb/mu mixture of ground corn and wheat to enhance bait acceptance by California and Richardson’s kangaroo rats. Apply the prebait mixture at 6 lbs. per acre or 2 days prior to using Zap PG pellets.

BROADCAST BAIting: Do not apply more than once per year to the same treatment area. Broadcast bait at a rate of 10 lb/A over ground where gopher burrow systems are present. Do not apply to pome fruit (apple, pear), stone fruit (peach, cherry, apricot, plum, prune, nectarine) and nut tree (hickory, acorn, pecan) orchards. Avoid planting on soil previously treated with this material. A minimum of 20 lbs (0.4 lb ai/A) per acre may be applied annually.

NONCROP RIGHTS-OF-WAY

USE RESTRICTIONS: For control of California ground squirrels (Spermophilus beecheyi) on noncrop rights-of-way adjacent to and across roads and other noncrop borders during late spring and summer. Zap PG pellets must not be applied on roads, near residential areas, over water where plants are grown for food or feed.

PREBaiting: Prebait with a 0.50 lb/mu mixture of ground corn and wheat to enhance bait acceptance by California ground squirrels. Apply the prebait mixture at 6 lbs. per acre or 2 days prior to using Zap PG pellets.

BROADCAST BAIting: Broadcast bait on the road edge at a rate of 4.6 lb/A per mile of road, with a minimum of 20 lbs (0.4 lb ai/A) per mile, and a maximum of 80 lbs (1.6 lb ai/A) per mile. A minimum of 20 lbs (0.4 lb ai/A) per acre may be applied annually.

DISTRIBUTION IN NEW ENGLAND

USE RESTRICTIONS: For control of prairie voles, pine voles, and white-footed mice (P. leucopus) in huckleberries (Blueberry and blackberries, cranberries, raspberry, black raspberries, and loganberries) and in caneberries (blackberries, red raspberries, black raspberries, loganberries, and white raspberries). Do not apply to any food crops to be harvested by equipment. A minimum of 20 lbs (0.4 lb ai/A) per acre may be applied annually.

CUCURBITS, BRUSSELS SPROUTS AND KALE

USE RESTRICTIONS: For control of prairie voles, mice (Arvicola campestris), mouse (Mus musculus), brown mouse (Mus musculus), and white-footed mice (P. leucopus). Three hundred pounds of ground corn and wheat to be broadcast over the entire field. Do not apply to any food crops to be harvested by equipment. A minimum of 20 lbs (0.4 lb ai/A) per acre may be applied annually.

In-FURROW APPLICATION OIL: Equipment designed for In-Furrow treatments must be used to apply this product in furrows, seated hill and 6 row per acre. Do not apply pre-planting or in-furrow at this rate. Do not contaminate water, food or feed by disposal of any product contaminated with this material. A minimum of 20 lbs (0.4 lb ai/A) per acre may be applied annually.

SQUIRRELS, RODENT/BAIL AND NO-TILL CORN

USE RESTRICTIONS: For control of prairie voles, mice (Arvicola campestris), mouse (Mus musculus), brown mouse (Mus musculus), and white-footed mice (P. leucopus), thirteen-lined ground squirrels (Spermophilus tridecemlineatus), belding’s kangaroo rats (Dipodomys beldingi), and kangaroo rats (Dipodomys sp.) in reduced tillage and no-till corn and in cucurbits, including melons, cucumber, squash, and zucchini. A minimum of 20 lbs (0.4 lb ai/A) per acre may be applied annually.
**BEANS (DRY)**

**USE RESTRICTIONS:** For control of prairie voles (Microtus ochrogaster), meadow voles (Microtus pennsylvanicus), house mice (Mus musculus), deer mice (Peromyscus maniculatus), white-tailed mice (P. leucopus), Ord's kangaroo rats (Dipodomys ordii), in dry pastures during the growing season. Do not apply by air. Do not apply this product to dry beans within 30 days of harvest. This use is restricted to Idaho, Oregon and Washington.

**BROADCAST BAITING:** This product may be broadcast by air or ground-driven dispensing devices. Apply bait at rates up to 10 lbs. per acre (0.2 lbs ai/A) at planting. A second application may be made at the same rate. The maximum annual application rate is 10 lbs per acre (0.2 lbs ai/A).

**POATOES**

**USE RESTRICTIONS:** For control of meadow voles, long-tailed voles, California vole except for endangered subspecies, Arizona vole. See section "ENDANGERED SPECIES CONSIDERATION."). Oregon voles, meadow voles, and Townsend's voles (Microtus spp.) in growing-season and pre-plant applications in potatoes. Do not apply this product to potatoes within 30 days of harvest. This use is restricted to Idaho, Oregon and Washington.

**BROADCAST BAITING:** This product may be broadcast by air or ground-driven dispensing devices. Apply bait once at a rate up to 10 lbs. per acre (0.2 lbs ai/A) at planting. A second application may be made at the same rate. The maximum annual application rate is 10 lbs per acre (0.2 lbs ai/A).

**SUGARCANE**

**USE RESTRICTIONS:** For control of Polyesterous rata (Rhabditis advena), Norway rata (R. norwegica), root rata (R. reticulata), root rata (Ditylenchus destructor), Bacte ria grasshopper (Mirabella lineolata), and cotton rata (Philaenus spumarius) in sugarcane fields. Do not apply this product to sugarcane within 90 days of harvest. This use is restricted to California, Idaho, Oregon and Washington.

**PREBAITING (Mandatory):** Prebait with 300,000 drops of ground corn and wheat to enhance bait acceptance by Richardson's ground squirrels. Apply the prebait mixture at 6 lbs per acre for 2-3 days prior to using ST-45 Pellets.

**BROADCAST BAITING:** This product may be broadcast by air or ground-driven dispensing devices. Apply bait at rates up to 10 lbs. per acre (0.2 lbs ai/A) at planting. A second application may be made at the same rate. The maximum annual application rate is 10 lbs per acre (0.2 lbs ai/A).

**WHEAT**

**USE RESTRICTIONS:** For control of meadow voles, long-tailed voles, California vole except for endangered subspecies, Arizona vole. See section "ENDANGERED SPECIES CONSIDERATION."). Oregon voles, meadow voles, Townsend's voles (Microtus spp.) and Richardson's ground squirrels (Spermophilus richardsonii) in growing-season and pre-plant applications in wheat. Do not apply the product to wheat within 90 days of harvest. This use is restricted to Montana, Idaho, Oregon and the state of Washington. Do not graze animals in treated areas.

**PREBAITING (Mandatory):** Prebait with 500,000 drops of ground corn and wheat to enhance bait acceptance by Richardson's ground squirrels. Apply the prebait mixture at 6 lbs per acre for 2-3 days prior to using ST-45 Pellets.

**BROADCAST BAITING:** This product may be broadcast by air or ground-driven dispensing devices. Apply bait at rates up to 8 lbs. per acre (0.12 lbs ai/A). Make only one application per year if Richardson's ground squirrels are being targeted. If voles are also being targeted, a second bait application may be made after a minimum interval of 33 days. A maximum of 12 lbs per acre (0.24 lbs ai/A) may be applied per year. All applications must be made prior to the boot stage.

**BARLEY**

**USE RESTRICTIONS:** For control of meadow voles, long-tailed voles, California vole except for endangered subspecies, Arizona vole. See section "ENDANGERED SPECIES CONSIDERATION."). Oregon voles, meadow voles, Townsend's voles (Microtus spp.) and Richardson's ground squirrels (Spermophilus richardsonii) in growing-season and pre-plant applications in barley. Do not apply this product to barley within 30 days of harvest. This use is restricted to Montana, Idaho, Oregon and Washington. Do not graze animals in treated areas.

**PREBAITING (Mandatory):** Prebait with a 500,000 mixture of ground corn and wheat to enhance bait acceptance by Richardson's ground squirrels. Apply the prebait mixture at 6 lbs per acre for 2-3 days prior to using ST-45 Pellets.

**BROADCAST BAITING:** This product may be broadcast by air or ground-driven dispensing devices. Apply bait at rates up to 6 lbs (0.12 lb active ingredient) per acre. Make only one application per year if Richardson's ground squirrels are being targeted. If voles are also being targeted, a second bait application may be made after a minimum interval of 33 days. A maximum of 12 lbs per acre (0.24 lbs ai/A) may be applied per year. All applications must be made prior to the boot stage.

**BEANS (HAY)**

**USE RESTRICTIONS:** For control of pocket gophers (Spermophilus tridecemlineatus), Ord's kangaroo rats (Dipodomys merriami), and prairie voles (Microtus ochrogaster) in timothy and timothy/alfalfa mixtures are still dormant. Do not apply in piles or permit piles to be formed by equipment. Do not apply more than once per year to the same treatment area. Broadcast bait in a 10-15 foot swath using hand, cyclone seeder, or ground-driven dispensing devices. Do not apply by air. Do not apply to actively growing timothy or timothy/alfalfa mixtures. This product may only be used to control Ord's kangaroo rat (Dipodomys merriami) in reduced tillage and no-till corn and in cucurbits, including and cucumbers, melons, watermelons, cantaloupes, and squash. This product may be broadcast by air or ground-driven dispensing devices. A maximum of 2 applications by ground may be made at the rate of 5 to 10 lbs. per acre (0.1 lbs ai/A) at planting. This product may be broadcast by air or ground-driven dispensing devices within 60 days of harvest. Do not graze animals in treated areas.

**PREBAITING (Mandatory):** Prebait with a 300,000 mixture of ground corn and wheat to enhance bait acceptance by Richardson's ground squirrels. Apply the prebait mixture at 6 lbs per acre for 2-3 days prior to using ST-45 Pellets.

**BROADCAST BAITING:** This product may be broadcast by air or ground-driven dispensing devices. Apply bait at rates up to 6 lbs. per acre (0.12 lbs ai/A) at planting. A second application may be made at the same rate. The maximum annual application rate is 10 lbs per acre (0.2 lbs ai/A).

**Timothy and Timothy / Alfalfa and Mixture Produced for Hay**

**USE RESTRICTIONS:** For control of meadow voles, long-tailed voles, California vole except for endangered subspecies, Arizona vole. See section "ENDANGERED SPECIES CONSIDERATION."). Oregon voles, meadow voles, Townsend's voles (Microtus spp.) and Richardson's ground squirrels (Spermophilus richardsonii) in growing-season and pre-plant applications in timothy and timothy/alfalfa mixtures. Do not apply by air. Do not apply to actively growing timothy or timothy/alfalfa mixtures. This product may only be used to control Ord's kangaroo rat (Dipodomys merriami) in reduced tillage and no-till corn and in cucurbits, including cucumbers, melons, watermelons, cantaloupes, and squash. This product may be broadcast by air or ground-driven dispensing devices. A maximum of 2 applications by ground may be made at the rate of 5 to 10 lbs. per acre (0.1 lbs ai/A) at planting. This product may be broadcast by air or ground-driven dispensing devices within 60 days of harvest. Do not graze animals in treated areas.

**PREBAITING (Mandatory):** Prebait with a 300,000 mixture of ground corn and wheat to enhance bait acceptance by Richardson's ground squirrels. Apply the prebait mixture at 6 lbs per acre for 2-3 days prior to using ST-45 Pellets.

**BROADCAST BAITING:** This product may be broadcast by air or ground-driven dispensing devices. Apply bait at rates up to 6 lbs. per acre (0.12 lbs ai/A) at planting. A second application may be made at the same rate. The maximum annual application rate is 10 lbs per acre (0.2 lbs ai/A).

**Potatoes**

**USE RESTRICTIONS:** For control of meadow voles, long-tailed voles, California vole except for endangered subspecies, Arizona vole. See section "ENDANGERED SPECIES CONSIDERATION."). Oregon voles, meadow voles, and Townsend's voles (Microtus spp.) in growing-season and pre-plant applications in potatoes. Do not apply this product to potatoes within 30 days of harvest. This use is restricted to Idaho, Oregon and Washington.

**BROADCAST BAITING:** This product may be broadcast by air or ground-driven dispensing devices. Apply bait once at a rate up to 10 lbs. per acre (0.2 lbs ai/A), or make two separate applications at rates of up to 5 lbs per acre (0.1 lb ai/A). The maximum annual application rate is 10 lbs per acre (0.2 lbs ai/A).
