INSTRUCTIONS FOR USE
Microbiological Water Purification Cartridge

PLEASE SAVE THESE INSTRUCTIONS FOR FUTURE USE
Only selected information is contained on the cartridge packaging, therefore you should keep this sheet for future reference.

Active Ingredient: Iodine* ........................................ 46%
Other Ingredients .................................................. 54%
Total ................................................................. 100%
*bound to strong base anion exchange resin

KEEP OUT OF REACH OF CHILDREN
CAUTION

In the event of a rupture of the cartridge and exposure to the iodinated resin:

FIRST AID:
IF IN THE EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present after the first 5 minutes, then continue rinsing eye. Call poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. Have product container or label with you when calling a poison control center or doctor, or going for treatment.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

CAUTION:
Avoid direct contact with eyes, skin and clothing. Wear protective eyewear (goggles) and gloves when handling. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse. Safety and effectiveness in children under the age of two has not been established.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit, and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or regional office of the EPA.

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN ANY MANNER INCONSISTENT WITH ITS LABELING.

DIRECTIONS FOR USE
General Instructions and Information

IMPORTANT! To obtain maximum bacteriological reduction, dental unit waterlines are to be cleaned with an approved dental unit waterline agent prior to initial installation of DentaPure® cartridges.

General Precautions
USES: DentaPure® cartridge is for use on dental unit waterlines attached to the dynamic dental instruments, i.e., high-speed hand piece, three-way air/water syringe and ultrasonic scaler. This cartridge, in conjunction with currently recommended practices regarding sterilization and flushing of dental instruments reduces bacteria from the water supplied through the instruments to a level that will meet or exceed the current ADA recommendations for water quality having a maximum of 200 cfu/ml.

IMPORTANT
Use DentaPure® cartridge on dental unit waterlines only. Use DentaPure® purified water for dental procedures only, not for general consumption. Dental unit water must have a pH level of less than 8. Dental unit water must not have a chlorine level greater than 1 ppm. Dental unit water must not be over 100 degrees Fahrenheit. Water pressure must not exceed 45 psi. If package seal is broken or cartridge appears dry, properly dispose of cartridge.

DIRECTIONS FOR USE FOR DENTAPURE®
The DentaPure® cartridge is installed on the pick-up tube in your water bottle or on the waterline in the Dental Unit Junction box by a dental technician. The cartridge is held in place and retained by luer-loc fittings or compression fittings. Refer to your installation instructions for your model DentaPure.

Once the cartridge is in place, the supply water will pass through the cartridge’s iodinated resin bed, purifying the water delivered by the dental instrument. To maintain a continuous iodine presence with the dental tubing, install a new cartridge immediately after removing the used cartridge. The cartridge must be left in place during times that the dental unit is not used (weekends, vacations, etc).

Adherence to CDC/ADA guidelines for aseptic procedures including a 2 minute morning flush, a 20-30 second flush between patients, and hand piece sterilization must be
continued after the installation of the cartridge. The flushes maintain the iodine levels necessary for bacteriological control.

If the cartridge is used in conjunction with a bottle water system: The bottle must be emptied each night and the empty bottle replaced on the manifold. Prior to daily use, wash the inside of the bottle and rinse thoroughly. Wipe down the outside of the cartridge, and make sure the intake end is not obstructed. Fill with fresh water each morning before its first use. The DentaPure® DP40 cartridge must be changed after 40 liters of water usage, or if records of usage are not kept, after 60 calendar days of installation. Change the cartridge if the level of iodine output falls to less than 0.5 ppm. Use Iodine sensitive test strips to verify performance. See the chart below for suggested change intervals. To change cartridge, follow installation instructions. Remove the used cartridge and install the new DentaPure® cartridge. Operate the dental instrument to check flow and verify that the unit is ready for use. Install a new water check-off sheet. Discard the used cartridge properly. Shut off water to dental unit when not in use.

**Suggested Use Table:**

<table>
<thead>
<tr>
<th>DentaPure® Unit Size</th>
<th>If Water Usage Records Are Kept</th>
<th>If Water Usage Records Are NOT Kept</th>
<th>If Iodine Content is Monitored</th>
</tr>
</thead>
<tbody>
<tr>
<td>DP40</td>
<td>40 Liters</td>
<td>60 Calendar Days</td>
<td>Change when iodine output falls to less than 0.5 ppm</td>
</tr>
<tr>
<td>DP90 &amp; DP90B</td>
<td>40 Liters</td>
<td>90 Calendar Days</td>
<td></td>
</tr>
<tr>
<td>DP365M &amp; DP365B</td>
<td>240 Liters</td>
<td>365 Calendar Days</td>
<td></td>
</tr>
</tbody>
</table>

**STORAGE:** Store at room temperature in original packaging, away from children, pets and direct sunlight. Avoid excessive heat. Do not allow cartridge to freeze. Do not store in open or unlabeled containers.

**DISPOSAL:** Securely wrap cartridge in newspaper and discard in trash.

**TROUBLESHOOTING**

Slow or no water flows through cartridge. Make sure new cartridge was installed. Make sure air supply is turned on (maximum 45 psi). Make sure cartridge is off the bottom of the bottle. Air leak from luer fitting contact your dental dealer for replacement parts. Discoloration of the tubing from blue to green or black is normal and is not a concern. Initial dark discoloration of water is caused by release of activated carbon. Operate water until flow appears clear.
