TEBUCON 45 DF
Fungicide

ACTIVE INGREDIENT:
Tebuconazole; alpha-[2-(4-chlorophenyl)ethy]-alpha-
(1,1-dimethylethy)-1H-1,2,4-triazole-1-ethyl .................................. 45%

OTHER INGREDIENTS ........................................................................... 55%
TOTAL .................................................................................................. 100%

EPA Reg. No. 69361-18
EPA Est. No.: 39578-TX-001

KEEP OUT OF REACH OF CHILDREN

WARNING / AVISO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.

(TO THE USER: If you do not understand the label, find someone to explain it to you in detail.)
For chemical emergency: spill, leak, fire, exposure, or accident, call CHEMTREC 1-800-424-9300.

| **If in the eyes** | • Hold eye open and rinse slowly and gently with water for 15-20 minutes.  
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing the eye.  
• Call a poison control center or doctor for treatment advice. |
| **If swallowed** | • Call a poison control center or doctor immediately for treatment advice.  
• Have person sip a glass of water if able to swallow.  
• Do not induce vomiting unless told to do so by a poison control center or doctor.  
• Do not give anything by mouth to an unconscious person. |
| **If on skin or clothing** | • Take off contaminated clothing.  
• Rinse skin immediately with plenty of water for 15-20 minutes.  
• Call a poison control center or doctor for treatment advice. |
| **If inhaled** | • Move person to fresh air.  
• If person is not breathing call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.  
• Call a poison control center or doctor for treatment advice. |

Note to Physician: No specific antidote. Treat symptomatically. Symptoms of Poisoning: The compound does not cause any definite symptoms that would be diagnostic. Contact with the eyes may cause irritation.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For Medical Emergency Assistance, call the National Pesticide Information Center 1-800-858-7378.

See Label Booklet for Additional Precautionary Statements and Directions for Use.

NET CONTENTS: 2 lbs.
PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND
DOMESTIC ANIMALS

WARNING

Causes substantial but temporary eye injury. Harmful if swallowed, inhaled or absorbed through the skin. Prolonged or frequently repeated skin contact may cause allergic skin reactions in some individuals. Do not get in eyes or on clothing. Avoid contact with skin. Avoid breathing dust or spray mist.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category A on an EPA Chemical Resistance Category Selection Chart.

Mixers, loaders, applicators and other handlers must wear:

- Long-sleeved shirt and long pants,
- Chemical-resistant gloves made of any waterproof material,
- Shoes plus socks,
- Use goggles or face shield.

Remove and wash contaminated clothing before reuse. Follow the manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Controls Statement:

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.24(b)(6-8)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS

Users should:

- Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to estuarine and marine invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwater or rinsate.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply Repar Tebucon 45 DF Fungicide in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use Repar Tebucon 45 DF Fungicide only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), restricted-entry interval and notification to workers. The requirements in this box only apply to uses of Repar Tebucon 45 DF Fungicide that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Long-sleeved shirt and long pants,
- Chemical-resistant gloves made of any waterproof material,
- Shoes plus socks,
- Protective eyewear.

GENERAL INFORMATION

Spray Volume: Apply Repar Tebucon 45 DF Fungicide in 50 gallons or more of spray solution per acre by ground spray equipment or in 15 gallons or more per acre by aircraft equipment except as noted under "REMARKS" for each crop. Increase spray volume as crop growth increases to ensure thorough coverage of foliage and fruit. Check equipment calibration frequently. Complete coverage and uniform application are essential for the most effective results, especially when lower spray volumes are applied.

Aerial application is not allowed in New York.

Chemigation: Do not apply Repar Tebucon 45 DF Fungicide through any type of irrigation system.

Mixing: Add recommended amount of Repar Tebucon 45 DF Fungicide into the spray tank while filling with water to the desired level. While mixing, maintain agitation. Repar Tebucon 45 DF Fungicide should be thoroughly dispersed in the spray tank prior to the addition of any other materials.

Compatibility: The following procedure should be followed when determining the compatibility of Repar Tebucon 45 DF Fungicide with other products;

Pour the recommended proportions of the products into a suitable container of water. Mix thoroughly and allow to stand at least five (5) minutes. If the combination remains mixed or can be re-mixed readily, the mixture is considered physically compatible. For further information, contact your local Repar Corporation representative.
Rotational Crops: Any crop not specified on this label may be planted in treated areas 120 days after last application.

**OBSEXIRE THE FOLLOWING PRECAUTIONS WHEN SPRAYING IN THE VICINITY OF AQUATIC AREAS SUCH AS LAKES, RESERVOIRS, RIVERS, PERMANENT STREAMS, MARSHES OR NATURAL PONDS, ESTUARIES AND COMMERCIAL PISH FARM PONDS.**

**Spray Drift Management:** The interaction of many equipment and weather related factors determine the potential for spray drift. The applicator is responsible for considering all of these factors when making application decisions. Avoiding spray drift is the responsibility of the applicator.

**Buffer Zone Requirements:** For soil or foliar applications, do not apply by ground within 25 feet, or by air within 150 feet of lakes; reservoirs; rivers; permanent streams; marshes or natural ponds; estuaries and commercial fish farm ponds.

**Recommendations For Aerial Applications:** The spray boom should be mounted on the aircraft so as to minimize drift caused by wing tip vortices. The minimum practical boom length should be used and must not exceed 75% of the wing span or rotor diameter.

**Importance of Droplet Size:** An important factor influencing drift is droplet size. Small droplets (<150 - 200 microns) drift to a greater extent than large droplets. Within typical equipment specifications, applications should be made to deliver the largest droplet spectrum that provides sufficient coverage and coverage. Formation of very small droplets may be minimized by appropriate nozzle selection by orienting nozzles away from the air stream as much as possible and avoiding excessive spray boom pressure.

**Spray should be released at the lowest possible height consistent with good post control and flight safety. Applications more than 100 feet above the crop canopy should be avoided.**

**Wind Speed Restrictions:** Droplet potential increases at wind speeds of less than 1 mph due to inverse potential to be greater than 10 mph. However, many factors, including droplet size, canopy and equipment specifications determine drift potential at any given wind speed. Do not spray when winds are greater than 15 mph and avoid gusty and windless conditions. Avoiding applications when wind direction is toward the sprayed area can reduce risk of exposure to sensitive aquatic areas.

**Restrictions During Temperature Inversion:** Do not make aerial or ground applications during temperature inversion. Drift potential is high during temperature inversions. Temperature inversions restrict vertical air mixing, which causes smaller droplets to remain close to the ground and move laterally in a concentrated cloud. Temperature inversions are characterized by increased temperature at altitude and are common on nights with limited cloud cover and light to no wind. They begin to form as the sun sets and last until the rising temperature becomes so great that clouds form, and are usually greatest during periods of calm winds, moving cloud cover and rapidly dissipates indicate good vertical mixing.

**Airblast (Air Assisted) Specific Recommendations for Trees and Vineyards:** Airblast sprayers carry droplets into the canopy of trees/brush via a slightly or laterally directed air stream. The following specific drift management strategies should be followed:

- Adjust deflectors and aiming devices so that spray is only directed into the canopy.
- Block off upward pointed nozzles when there is no overhead canopy.
- Use only enough air volume to penetrate the canopy and provide good coverage.
- Do not allow the spray to go beyond the edge of the canopy area (at least 12 sprayer inches when turning at an angle).
- Only spray upward toward the orchard or vineyard, for applications on slopes.

**Runoff Management:** Do not cultivate within 10 feet of the sprayed area to allow growth of a vegetation filter strip. When used on erodible soils, best management practices for minimizing runoff should be employed. Contact your local Soil Conservation Service for recommendations in your use area.

**CROP-SPECIFIC USE DIRECTIONS**

<tr>
<td>Cherry Peach Nectarine</td>
<td>Brown Rot Blossom Blight</td>
<td>2 x 100 gal* 4 to 8 gal/ac**</td>
<td>Do not apply more than 3 pounds (48 ounces) of product per acre per crop season. Repair Tebuccon 45 DF fungicide is a sterol demethylating inhibitor (DMI) fungicide. Apply in a tank mix of other fungicides with a non-DMI fungicide as a resistance management strategy. Do not mix Repair Tebuccon 45 DF fungicide with other DMI fungicides. Pre-harvest interval: 0 days. Fruit Rot: Begin application at two or three weeks before harvest and continue at 7 day intervals through the day of harvest. The bloom and fruit stages must be avoided for optimum control of brown rot. If Repair Tebuccon 45 DF fungicide is applied during one of these stages, apply another registered fungicide during the other stage to provide optimum control. Additional cover sprays during the early post bloom period are also important for preventing foliar and infections in sweet cherry and peach.</td>
</tr>
</tbody>
</table>

*When using the 2 x 100 gal rate, use at least 4 oz of Repair Tebuccon 45 DF fungicide per acre.

**The amount of Repair Tebuccon 45 DF fungicide required per acre will depend on the tree size and volume of foliage present. The rate per acre is based on a standard of 400 gallons of spray solution per acre for large trees. For smaller trees, multiply 2 oz x times the number of 100 gallons of spray solution required to thoroughly wet the point of runoff one acre of trees being treated. For concentrate sprays, apply the same amount of product per acre as would be applied in a white spray based on tree size and foliage volume, but not less than 4 ounces of Repair Tebuccon 45 DF fungicide per acre. Apply 5 to 8 ounces per acre of Repair Tebuccon 45 DF fungicide when severe disease conditions exist.**

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store in a cool, dry, secure place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, and feed. Store in original container and out of the reach of children, preferably in a locked storage area. Handle and open container in a manner as to prevent spillage. If container is leaking or material is spilled for any reason or cause, carefully sweep material into a pail. Refer to Precautionary Statements on label for hazards associated with the handling of this material. Do not walk through spilled material. Dispose of pesticide as directed below. In spill or leak incidents, keep unauthorized people away.

Pesticide Disposal: Wastes resulting from the use of Repair Tebonon 45 DF Fungicide may be disposed of on site or at an approved disposal facility.

Container Disposal: Completely empty container into application equipment. Then dispose of empty container in a sanitary landfill or by incineration or, if allowed by state authorities, by burning. If burned, stay out of smoke.

CONDITIONS OF SALE AND LIMITED WARRANTY:

Repair Corporation warrants only that the material contained herein conforms to the chemical description on the label and is reasonably fit for the use herein described when used in accordance with the directions for use. The Directions For Use are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, mechanical failure or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Repair Corporation or the SELLER. To the extent consistent with applicable law, Repair Corporation shall not be liable for the consequential, special or indirect damages resulting from the handling or use of this product. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

Except as expressly provided herein, Repair Corporation makes no warranties, guarantees, or representations of any kind, either express or implied, or by usage of trade, statutory or otherwise, with regard to the product sold, including but not limited to, merchantability, fitness for a particular purpose, use or eligibility of the product for any particular trade usage.
