Supplemental Labeling

Control of Powdery Mildew (Erysiphe heraclei) in Carrots Grown for Seed

Use of Rally® 40WSP fungicide on carrots grown for seed may result in crop injury, crop yield reduction and/or crop loss. Read and understand the Special Conditions and Risks of Use section on this label before using this product in accordance with this FIFRA Section 24(c) Special Local Need.

ATTENTION

• It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
• This labeling must be in the possession of the user at the time of application. Follow all applicable directions, restrictions, Worker Protection Standard requirements and precautions on the EPA registered label.

Directions for Use

Rally 40WSP is a systemic, protectant and curative fungicide. Optimum disease control is achieved when the fungicide is applied in a regularly scheduled preventative spray program, starting at the first sign of disease development and continuing until the threat of further disease development is past.

Apply 5 to 8 oz of Rally 40WSP (0.125 to 0.2 lb active ingredient) in a minimum of 20 gallons of water per acre for ground application or in a minimum of 10 gallons of water per acre for aerial application. Begin applications prior to or at the start of disease development and continue applications on a 14- to 21-day application schedule. Use higher rate or shorter spray interval on susceptible varieties or under heavy disease pressure.

Specific Use Restrictions:

• For use only on carrots grown for seed in the state of Washington.
• Do not apply more than 24 oz of Rally 40WSP (0.6 lb active ingredient) per acre per year.
• Chemigation: Do not apply this product through any type of irrigation system for the use described in this supplemental labeling.
• Rotation Crops: Fields treated with Rally 40WSP can be rotated at any time to crops that are included on the product label. All other crops may be planted 30 days after the final application of Rally 40WSP.
• All carrot seed screenings shall be disposed of in such a way that they cannot be distributed or used for food or feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the WSDA forthwith upon request. Conditioner disposal records shall consist of documentation of on-farm disposal, disposal at a controlled dump site, incinerator, composter, or other equivalent disposal site and shall include the lot numbers, amount of material disposed of, the grower(s) and the date of disposal.
• No portion of the carrot seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes. Do not feed or graze carrot forage or fodder. Do not cut carrot tops for hay or forage.
• Carrot seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed.
• Carrot seed may not be distributed for human consumption or animal feed.

WSDA Container Disposal Guidance for Paper Containers: Completely empty the contents of the pesticide container into application equipment and apply to a labeled crop or site. The empty container may be disposed of in a sanitary landfill. Burning is not a legal method of container disposal in Washington.
USE OF Rally 40WSP (THE “PRODUCT”) ON CARROTS GROWN FOR SEED (THE “CROP”) MAY RESULT IN CROP INJURY, CROP YIELD REDUCTION AND/OR CROP LOSS. READ AND UNDERSTAND THESE SPECIAL CONDITIONS AND RISKS OF USE BEFORE USING THE PRODUCT ON THE CROP.

Dow AgroSciences makes the Product available for use in the manner described in this Supplemental Labeling on the basis that, in the sole opinion of the user, the benefits and utility derived from the use of the Product on the Crop outweigh the potential risk of Crop injury or loss. The decision to use this Product in the manner described in this Supplemental Labeling must be made by each individual user on the basis of anticipated benefits versus (i) the risk of Crop injury, Crop yield reduction and Crop loss, (ii) the severity of the target pest infestation, (iii) the cost and availability of alternative pest controls, and (iv) any other relevant factors.

By purchasing the Product for use, or using the Product, in the manner described in this Supplemental Labeling, you acknowledge and accept that:

(1) You assume all risk of Crop injury, Crop yield reduction and Crop loss;
(2) Dow AgroSciences does not make, and does not authorize any agent or representative to make, any representations or recommendations regarding the use of this Product on the Crop other than the statements on this Supplemental Labeling;
(3) Dow AgroSciences does not make, and does not authorize any agent or representative to make, any warranties, express or implied, with respect to the use of the Product on the Crop and disclaims all warranties, express or implied, including any implied warranties of fitness for a particular purpose or merchantability;
(4) Dow AgroSciences disclaims all liability for any damages, losses, expenses, claims or causes of actions arising out of or relating to Crop injury, Crop yield reduction and/or Crop loss;
(5) These Special Conditions and Risks of Use supersede any contrary representations or recommendations by Dow AgroSciences, its agents or representatives, and any provisions in or on any Product literature or labeling including any provisions on the label affixed to the Product container.

If these Special Conditions and Risks of Use are not acceptable, the unopened Product may be returned to the seller for a refund or used for a different labeled use in accordance with the label affixed to the Product container. These Special Conditions and Risks of Use are required by Dow AgroSciences and not specified by the U.S. EPA or the State of Washington.
