PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Corrosive. Causes irreversible eye damage. Causes skin irritation. Harmful if inhaled, swallowed or absorbed through the skin. May cause allergic skin reactions. Causes allergic signs and symptoms in hyper-reactive individuals. Do not get in eyes, on skin or or clothing. Avoid breathing vapors. Not to be used as an aerosol. Do not swallow. Wear eye goggles, rubber gloves and protective clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit, and the permitting authority has notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water when dispensing of equipment washwaters. Instructions in Case of Spills or leaks: Wear goggles, rubber gloves, and protective clothing. Avoid skin contact with inert material such as sand, clay or vermiculite. Shovel into a sealable container and dispose of in an authorized EPA disposal facility.

In Case of Fire: Use water, carbon dioxide, dry chemical (e.g., Sodium bicarbonate) extinguishing media. Fire fighters should be equipped with self-contained breathing apparatus and turnout gear.

In Case of Chemical Emergency: Call day or night for assistance and information concerning spilled material, fire, explosion, and other chemical accidents. 1-281-875-5000

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE

Aldicide G solutions are corrosive to many commonly used materials of construction such as steel, galvanized iron, aluminum, tin and zinc. These solutions can be stored and handled in baked phenolic lined steel, stainless steel or reinforced epoxy equipment. This product freezes at approximately -20°C (-4°F). Therefore, unless the storage tank is inside or underground, heating and insulation may be required. If heating is needed, exposure to high temperatures should be avoided. For short storage (1 month) temperatures up to 105°F can be tolerated; however, the preferred maximum storage temperature is approximately 90°F. Keep away from fire and open flames. A stainless steel centrifugal pump is suggested for transfer service.

PESTICIDE DISPOSAL

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinseate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA regional office for guidance.

CONTAINER DISPOSAL

Triple rinse (or equivalent) and offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by State and Local authorities.

GENERAL

Consult Federal, State and local authorities for approved alternative procedures RCRA Hazardous Waste Code: D002.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELLING

GENERAL USE DIRECTIONS

Add Aldicide G at a point of uniform mixing where the treated water will be circulated or mixed throughout the system. Fully foamed systems should be cleaned before treatment begins. Aldicide G can be applied either intermittently (slug dose) or by continuous feed where stated. Where appropriate, fixed points should be below the water line to minimize vapor.

OIL WELL WATER FLOODS

Initial Dose: Add Aldicide G at 200-10,000 ppm of the water flood system (0.1-8.0 gal / 1,000 gal of Aldicide G per 1,000 gal of floodwater). Add Aldicide G intermittently until the salt is eliminated. All such tanks shall be assumed by the Buyer. The manufacturer warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose intended by the Buyer. THE MANUFACTURER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. IN NO CASE SHALL THE MANUFACTURER BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. The manufacturer offers this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative.

DOE AND IMO

NOT RESTRICTED

Net Contents: SAP No.

GAS STORAGE WARES AND SYSTEMS

Treat individual injection wells with Aldicide G at 1,000 to 10,000 ppm and continuously stir the water present in the formation. Treatment of the well shall take place during the summer before gas is injected. Dose individual trips to maintain a concentration of 400 to 4,000 ppm Aldicide G should be repeated yearly, or as needed to maintain control.

HYDROTESTING

For use in pipelines, valve systems, boilers and vessels. Water used to hydrotest pipelines or vessels should contain 200 to 8,000 ppm (0.2 to 8.0 gal per 1,000 gal water) of Aldicide G, depending on water quality, environmental conditions and the length of time the equipment will remain idle. At neutral pH and below, treated water can remain in the system for up to 3 years.

PIPELINE PIGGING AND SCRAPING OPERATION

Add Aldicide G to the water immediately following the scraper. This water volume can be kept to a minimum and contained between the scraper and trailing pig. Add Aldicide G at 2,000 to 20,000 ppm (0.2 to 2.0 gal Aldicide G per 100 gal water), depending on the length of the pipeline and the severity of biofouling.

CONDITIONS OF SALE

The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risk inherently associated with use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather, conditions of storage, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of the Seller. All such risks shall be assumed by the Buyer. The manufacturer warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose intended by the Buyer.
