Swimming pool water loses its sparkle or turns cloudy when the chlorine residual falls rapidly after regular chlorination. Superchlorination is recommended. Experience shows that during summer months, a water should be superchlorinated with 6 oz. of POOL PAL'S "Shine n Shock" per 5,000 gallons of pool water every 10 to 14 days. Do not use the pool until the chlorine residual has dropped to 3 ppm.

SUPERCHLORINATION

If on Skin or Clothing

Clean skin immediately with plenty of water for 15-20 minutes. Clean skin immediately with plenty of water for 15-20 minutes. Put on gloves. Get into plenty of water. Call a poison control center or doctor immediately for treatment advice.

If Swallowed

Promptly drink large quantity of water if able to swallow. DO NOT induce vomiting unless told to do so by a poison control center or doctor. Call a poison control center or doctor immediately for treatment advice.

If Inhaled

Remove person from area. If person is breathing, call 911 or all ambulance, then give artificial respiration. If not breathing, give mouth-to-mouth resuscitation if possible. Call a poison control center or doctor immediately for treatment advice.

In case of Fire

Flood with large volume of water. If pool is on fire, do not add water. If fire is out, then do not use pool. At 460°F to 480°F with liberation of harmful gases. Use water spray to cool container. If on Skin or Clothing

Clean skin immediately with plenty of water for 15-20 minutes. Put on gloves. Get into plenty of water. Call a poison control center or doctor immediately for treatment advice.

Flood with large volume of water. IN CASE OF FIRE, if possible, isolate container in open air or well-ventilated area. Flood with a large volume of water. IN CASE OF CONTAMINATION OR DECOMPOSITION, do not relight container.

STORAGE AND DISPOSAL

STORAGE: Keep product in tightly closed containers. Avoid potential problems, so direct contact with the pool liner is reduced and there is no residue to be swept or vacuumed from the pool bottom. POOL PALSTM "Shine n Shock" use in these pools, especially the above-ground pools which have only 3-4 foot depths and are not equipped with a bottom drain. POOL PALS "Shine n Shock" is well suited for Vinyl-lined pools are easily damaged by chemicals containing remnants of any other product. Such use may cause a violent reaction leading to a fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. IN CASE OF FIRE, if possible, isolate container in open air or well-ventilated area. Flood with a large volume of water. IN CASE OF CONTAMINATION OR DECOMPOSITION, do not relight container.

FIRST AID

If In Eyes

Hold eye open and flush with plenty of water for 15-20 minutes. Do not add this product to any dispersing device containing remnants of any other product. Such use may cause a violent reaction leading to a fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. IN CASE OF FIRE, if possible, isolate container in open air or well-ventilated area. Flood with a large volume of water. IN CASE OF CONTAMINATION OR DECOMPOSITION, do not relight container.

If Inhaled
