**NUOSEPT® 515R**
Industrial Microicide for use in Polymer Latices, Adhesives, Tackifiers, Paints, Building Materials and Ink/Tank Components

**ACTIVE INGREDIENTS:**
- 5-Chloro-2-methyl-1-tetrazolium-3-one 1.18%
- 2-Methyl-1-tetrazolium-3-one 8.82%

**INSERT INGREDIENTS:**
- 98.80% 94.50%
- 1.00% 100.00%

**KEEP OUT OF REACH OF CHILDREN DANGER**

**FIRST AID**

**IF ON SKIN:**
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 min. Call a poison control center or doctor for advice.

**IF IN EYES:**
- Hold eye open and rinse slowly and gently with water for 15-20 min.
- Remove contact lenses, if present, after first 5 min, then continue rinsing eye.
- Call a poison control center or doctor for advice.

**IF INHALED:**
- Move patient to fresh air.
- If patient is not breathing, and 911 or other ambulance has not arrived, then give artificial respiration or other appropriate measures immediately. Call a poison control center or doctor for advice.

**IF SWALLOWED:**
- Call a poison control center or doctor for advice.
- Do not induce vomiting unless told to do so by a poison control center or doctor.

**Environmental Statement:**

**PRECAUTIONARY STATEMENTS**

**Hazard to Humans and Domestic Animals**

**DANGER**

**Corrosive**

**Causes irreversible eye damage and skin burns.**

**May cause allergic skin reaction**

**May be harmful if inhaled.**

**May be fatal if swallowed or absorbed through the skin.**

**Proper Equipment**

**Storage and Disposal Procedures**

**Directions for Use**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**POLYMER LATEX PRESERVATION**

Nuasept 515R is recommended for the control of bacteria and fungi in the manufacture and storage of synthetic and natural polymer latexes including acrylic, styrene-butylacrylates, butylacrylate-styrene-acrylates, and natural acrylates. It is effective in reducing bacterial growth and inhibiting the growth of fungi. It is effective in controlling the growth of bacteria and fungi in water-based coatings, including acrylic, styrene-butylacrylate, and butylacrylate-styrene-acrylate systems. It is effective in controlling the growth of bacteria and fungi in water-based paints, coatings, and other water-based products. It is a broad-spectrum microicide that is effective against a wide range of microorganisms.

**Adhesive and Tackifier Preservation**

Nuasept 515R is recommended for the control of bacteria and fungi in water-based adhesives and tackifiers. It is effective in controlling the growth of bacteria and fungi in water-based adhesives and tackifiers. It is effective in controlling the growth of bacteria and fungi in water-based adhesives and tackifiers. It is effective in controlling the growth of bacteria and fungi in water-based paints, coatings, and other water-based products. It is a broad-spectrum microicide that is effective against a wide range of microorganisms.

**Paint and Coating Preservation**

Nuasept 515R is recommended for the control of bacteria and fungi in water-based coatings, including acrylic, styrene-butylacrylate, and butylacrylate-styrene-acrylate systems. It is effective in controlling the growth of bacteria and fungi in water-based paints, coatings, and other water-based products. It is a broad-spectrum microicide that is effective against a wide range of microorganisms.

**Environmental Considerations**

This product is effective in controlling the growth of bacteria and fungi in water-based coatings, including acrylic, styrene-butylacrylate, and butylacrylate-styrene-acrylate systems. It is effective in controlling the growth of bacteria and fungi in water-based paints, coatings, and other water-based products. It is a broad-spectrum microicide that is effective against a wide range of microorganisms.
