BENEFITS

Versatile: Controls mites, some scale, some fungal diseases, aphids and fungal diseases, like powdery mildew & rust on roses.

Safety: Replaces many “HARD” Pesticides No Re-Entry Time Required.

Effective: controls Scale on Sago Palms.

Dosage rates: For small batches use 2 ounces per gallon of water. Use a sprayer that will put out a fine mist spray. For Sago Palm Scale, make three or more applications one week apart. Spray the trunk as well as the foliage (both sides). Complete coverage is necessary. Spray two times per month to prevent scale from returning.

Tank mix: 2 gallons per 100 gallons of water/Acre Mix thoroughly. If other pesticides are to be added, do so after mixing RID-BUGS.

WARNING FIRST AID MEASURES:

Eye Contact Aid: Flush immediately with cold clean water for at least 15 minutes, contact physician immediately.

Skin Contact Aid: Thoroughly wash the affected area with soap and warm water. Flush with large quantities of water. If irritation persists call a physician.

Inhalation Aid: Remove individual to fresh air.

Ingestion Aid: Administer water or milk to dilute. Contact a physician or local poison control center.

WARNING: “FOR PERSONAL PROTECTION USE EYE PROTECTION AND GLOVES.”
