Determine areas where rats or house mice gnawed openings, in or beside burrows, in corners and concealed places, between buildings.

**SELECTION OF TREATMENT AREAS:**
- Never broadcast bait. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.
- Treatments are mandatory for outdoor, above-ground use. Tamper-resistant bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
- Secure or otherwise immobilize. Even stronger bait stations are needed in areas where surface water is present or in areas where target wildlife, or in tamper-resistant bait stations. These stations must be resistant or in areas where target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be stolen from stations when they are not filled, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
- Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label. Do not use in edible product areas of food or feed processing plants or in areas prone to vandalism.

**USE RESTRICTIONS:**
- Use only for the sites, pests, and application methods described on this label.
- This product may not be used inside and within 50 feet of buildings or inside of transport vehicles (ships, trains, or aircraft).
- Do not apply directly to water, or to areas where surface water is present or in areas where target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be stolen from stations when they are not filled, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
- Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label. Do not use in edible product areas of food or feed processing plants or in areas prone to vandalism.

**NOTE TO PHYSICIAN:**
- If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

**FIRST AID**
- See the label instructions for washables, use detergent and hot water. Keep and wash PPE instructions for washables, use detergent and hot water. Keep and wash PPE.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION:**
- Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Keep away from children, domestic animals and pets.
- Personal Protective Equipment (PPE):
  - All handlers, including applicators, must wear long-sleeved shirt, long pants, shoes, socks, and water-proof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

**User Safety Requirements**
- Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying the bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to mammals and birds other wildlife. Dogs, cats and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present or in areas where target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be stolen from stations when they are not filled, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.

- Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label. Do not use in edible product areas of food or feed processing plants or in areas prone to vandalism.

**DIRECTIONS FOR USE**
- This product is for control of only Norway rats, roof rats and house mice in and around buildings.
- Use only for the sites, pests, and application methods described on this label.
- Do not contaminate water, food or feed by storage or disposal.
- Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.
- Pesticide Disposal: Dispose of wastes resulting from the use of this product in trash or at an approved waste disposal facility.
- Container Handling: Nonrefillable container. Do not reuse or refill this container.
- Plastic Containers: Triple rinse (or equivalent) then offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill; or incineration.
- Paper Containers: Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration.

**APPLICATION DIRECTIONS**

**NORWAY AND ROOF RATS:**
- Place 2 to 8 bait packs per placement. Space placements at intervals of 10 to 30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until there no longer are signs of new feeding by rats.
- **HOUSE MICE:**
  - Open package and apply 1/2 to 1 ounce (1-2 level tablespoons) of bait at each placement. Place packets at 8- to 12-foot intervals. Larger placements (up to 2 ounces) may be needed at points of very high house mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until there are no longer signs of new feeding by house mice.

**FOLLOW-UP:**
- Replace contaminated or spoiled bait immediately. Using waterproof gloves, collect and dispose of all dead, exposed animals and leftover bait property. To discourage resitamnation, limit sources of novel food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

**STORAGE AND DISPOSAL**

- Do not contaminate water, food or feed by storage or disposal.
- Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.
- Pesticide Disposal: Dispose of wastes resulting from the use of this product in trash or at an approved waste disposal facility.
- Container Handling: Nonrefillable container. Do not reuse or refill this container.
- Plastic Containers: Triple rinse (or equivalent) then offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill; or incineration.
- Paper Containers: Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration.
