STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL: Dispose of wastes resulting from the use of this product in trash or at an approved waste disposal facility.

PESTICIDE AND CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container.

Plastic Containers: Triple rinse (or equivalent) then offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill; or by incineration, if permitted by state and local authorities.

Paper Containers: Dispose of empty container by placing in trash, at an approved waste disposal facility, or by incineration, if permitted by state and local authorities.

DISCLAIMER

To the extent permitted by applicable law, Seller makes no representation or warranty, either express or implied, for results due to misuse, improper handling, or improper storage of this material. Nor does Seller assume any responsibility for injury to persons, crops, animals, soil, or property arising out of misuse, improper handling, or improper storage of this material.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Keep away from children, domestic animals, and pets.

User Safety Requirements

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of barrier laminate gloves before removing them. As soon as possible, wash hands thoroughly after applying the bait and before eating, drinking, chewing gum, using tobacco, or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to mammals, birds, and other wildlife. Dogs, cats, and scavenging animals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not allow bait to be exposed on soil surface. Do not apply where runoff is likely to occur. Do not contaminate water when disposing of equipment wash water or rinseate.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions, use restrictions, and precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets, or other non-target animals to rodenticides. To help to prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals, and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and contaminated bait as specified on this label.

Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used wherever children, pets, non-target mammals, or birds may have access to the bait placement locations.

USE RESTRICTIONS:

This product may only be used to control the following rodent pests in and around man-made structures: House mouse (Mus musculus), Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys megalotis), Goldem mouse (Ochrotomys nuttalli), Polynesian rat (Rattus exulans), White-throated woodrat, White-throated woodrat, Northern plains woodrat (Neotoma microplus), Mexican woodrat (Neotoma lepida), and the Meadow vole (Microtus pennsylvanicus). This product must be used in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent infestations and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft, docks and port or terminal buildings, and related structures and associated with these sites. Fence and perimeter baiting (baiting beyond 100 feet from a structure as defined above), is prohibited. This product must not be applied directly to food or feed crops. Burrow baiting with Ramik Green Mini Bait Packs is prohibited.

Not permitted for use against the following species in California:

- House mouse (Mus musculus), Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys megalotis), Goldem mouse (Ochrotomys nuttalli), Polynesian rat (Rattus exulans), White-throated woodrat, White-throated woodrat, Northern plains woodrat (Neotoma microplus), Mexican woodrat (Neotoma lepida), and the Meadow vole.

APPLICATION DIRECTIONS:

Rats: Place 2 to 8 bait packs per placement. Space placements at intervals of 10 to 30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until there no longer are signs of new feeding by rats.

Mice and Meadow Voles*: Open package and apply 1/4 to 1/2 oz. (1-2 level Tbsp) at each bait placement location. Space placements at 6- to 12-foot intervals. Larger placements (up to 2 oz.) may be needed at points of very high mouse or meadow vole activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until there no longer are signs of new feeding by mice or meadow voles*. Follow-Up: Replace contaminated or spoiled bait immediately. Using barrier laminate gloves, collect and properly dispose of all dead, exposed animals and leftover bait. To discourage reinestation, limit sources of rodent food, water, and harborage as much as possible. If reinestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and repleishment as needed.

SELECTION OF TREATMENT AREAS:

Determine areas where rats, mice, or meadow voles* will most likely find and consume the bait. Generally, these areas are along walls, by grained openings, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain or snow. Remove as much alternative food as possible.
