Rally® 40WSP fungicide is a systemic curative and protectant fungicide. For best results, apply on a regularly scheduled protectant spray schedule starting at the first sign of disease development and continuing until the threat of further disease development is past. Apply 5 to 7.5 oz (0.125 to 0.187 lb active) of Rally 40WSP in a minimum of 20 gallons of water per acre for ground application or in a minimum of 10 gallons of water per acre for aerial application. Begin applications in early spring or when disease symptoms are first noticeable and continue applications on a 14- to 21-day application schedule. Use a higher rate or shorter spray interval on susceptible varieties or under heavy disease pressure.

Specific Use Restrictions:
• Do not apply Rally 40WSP within 1 year (365 days) of harvesting grass hay.
• Do not graze livestock in treated fields within 1 year (365 days) of applying Rally 40WSP.
• Do not apply more than 30 oz product (0.75 lb active) per acre per year.
• Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.
• Chemigation: For use under this SLN label do not apply this product through any type of irrigation system.

WSDA Container Disposal Guidance for Paper Containers: Completely empty the contents of the pesticide container into application equipment and apply to a labeled crop or site. The empty container may be disposed of in a sanitary landfill. Burning is not a legal method of container disposal in Washington.
