KEEP OUT OF REACH OF CHILDREN
CAUTION: See back panel for precautions and first aid.

Net Contents: 1 Quart (32 fl oz.) (946 mL)

ALGAECID

You should use this product: This product, when used regularly, will kill current algae blooms and prevent future algae growth. POOLIFE® Super AlgaeBomb® 60 is effective against most types of algae for complete pool enjoyment. It does not require pH adjustment to be effective, is ideal for winterizing your pool. For best results, use with other POOLIFE® pool care products.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.

Take a pool water sample to your authorized POOLIFE dealer regularly for a detailed water analysis.

This product is used to control the growth of algae in swimming pools, hot tubs, whirlpools, hot tubs, decorative fountains and synthetically lined ponds that do not contain fish. For maximum effectiveness, pools, spas, whirlpools, hot tubs, decorative fountains and synthetically lined ponds containing heavy growth of algae should be cleaned prior to using this product.

For pools having just VISIBLE ALGAE GROWTH, add an initial dose of 1 to 1.5 fluid ounces of this product per 10,000 gallons of water and remove settled algae debris by cleaning. Subsequent additions of 2 to 4 fluid ounces of this product per 10,000 gallons of water should be every 5 to 7 days after initial treatment for maintenance.

For treatment of a FRESHLY CLEANED AND FILLED pool, add initially 1 to 1.5 fluid ounces of this product per 10,000 gallons of water.

SPAS, whirlpools, hot tubs, decorative fountains, and ponds having just visible algae growth require an initial dose of 0.5 to 1 fluid ounces of this product per 1000 gallons of water. For treatment of freshly cleaned and filled spa, whirlpool, hot tub, decorative fountain or pond, add initially 0.5 to 0.3 fluid ounces of this product per 1000 gallons of water. Subsequent addition of 0.5 to 0.8 fluid ounces of this product should be made every 5 to 7 days after initial treatment for maintenance.

This product will prevent the growth of most algae during the off-season WINTER MONTHS when pools are not in use. For pools which have been properly treated during the swimming season and are free of visible algae, add 7 to 11 fluid ounces of this product per 10,000 gallons of water. If at the end of the swimming season pools have some visible algae growth, add 10 to 19 fluid ounces of this product per 10,000 gallons of water. It is necessary that a uniform distribution of this product be made throughout the water for maximum effectiveness. If pool is not covered, it may be necessary to repeat the treatment one or more times during the season, especially for treatment of algae blooms.

This product may be used in a pool treatment program with other chemicals normally used to treat pools and is effective at both acid and alkaline pH. This product can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, DO NOT mix this product with any other material, including any concentrated dry or liquid chlorine products.

PRECAUTIONARY STATEMENTS - HAZARD TO HUMANS AND DOMESTIC ANIMALS - CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

STORAGE AND DISPOSAL: Keep this product in its tightly closed container when not in use. Non-refillable container. DO NOT reuse or refill this container. Rinse empty container thoroughly with water prior to disposal. Offer for recycling if available.

DO NOT contaminate food feed by storage or disposal of equipment.
FRST AID: IF SWALLOWED: Call poison control center or doctor immediately. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes. IF ON SKIN OR CLOTHING: Take off contaminated clothing, rinse skin immediately with plenty of water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes. Call a poison control center or doctor for further treatment advice. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes. Continue rinsing eye.
