QuickBayt® Spot Spray

For use in and around animal facilities—designed to lure house flies to their death!
✓ Easy to apply
✓ Quick acting and long lasting
✓ Can last up to six weeks indoors unless bait is completely consumed

ACTIVE INGREDIENTS:
- Imidacloprid .................. 10.0%
- Z-9 Tricosene .................. 0.1%
OTHER INGREDIENTS .................. 89.9%
TOTAL 100.0%

Add 16 ounces of this product to one gallon of water and agitate until completely mixed. One gallon of finished spray will treat 1,000 square feet of fly-resting surfaces.

Net Contents: 1 lb (16 oz)

STOP - Read the label before use.
Keep Out of Reach of Children.

CAUTION
See back panel for first aid.
See attached booklet for complete Precautionary Statements, Directions for Use and additional instructions.

QuickBayt® Spot Spray

For use in and around animal facilities—designed to lure house flies to their death!

Directions for Use (Continued)

There is no need to spray the complete surface because this product is used for spot treatments. It is effective for 7 to 21 days from the start of before fly populations have reached their peak.

Best results occur when the product is applied to many locations throughout the structure or facility. Spray the product on surfaces where flies tend to rest. House flies prefer warm, still air for roosting, so avoid cold or windy locations.

Applications of this product may leave a visible residue or discoloration on some surfaces. After treating, it is adequate to test for insects in a small inconspicuous area.

Mixing Directions, Use Rates and Applications

Mixing Directions: for a 1% miscible spray.

Dilute the product to 1 gallon of water and apply it to an area of the structure or facility of up to 125 sq. ft. for satisfactory control of flies. For somewhere larger than 125 sq. ft., spray one or more additional 125 sq. ft. areas.

Questions? Call toll-free 1-800-633-3796.

No specific antidote is available. Treat the patient symptomatically.

Hazardous to HUMANS and DOMESTIC ANIMALS CAUTION: Harmful if swallowed. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, smoking, going into toilet, using the toilet. Wear long-sleeved shirt and long pants, socks, shoes, and chemical resistant gloves made of any waterproof material such as hazard leathers, body jackets, rubber, neoprene, neoprene rubber, or chloroprene, polyethylene, polyvinylchloride (PVC) or vinyl.

ENVIRONMENTAL HAZARDS

This product is highly toxic to aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or materials. This product is highly toxic to fish exposed to direct treatment or reside in bottom deposits or sediments. Do not apply this product or allow it to enter surface waters or groundwaters. Do not store or dispose of in or near water or waterways. Do not store this product or its container in or near food or food containers.

FIRST AID

If swallowed

Do not induce vomiting unless told to by a poison control center or doctor. Call a poison control center or doctor for treatment advice.

If in eyes

Hold eye open and rinse slowly and gently with running water for 15 to 20 minutes. Do not give anything to an unconscious person.

If exposed

Have the product container or label with you when calling a poison control center or doctor. Call a poison control center or doctor for treatment advice.

If on skin

Rinse thoroughly with water.

If on clothing

Remove clothing and wash skin immediately with soap and water for 15 to 20 minutes. Remove contact glasses, if present, after first 5 minutes, then continue rinsing eyes.

If inhaled

Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.

FIRST AID (Continued)

Have the product container or label with you when calling a poison control center or doctor. Call a poison control center or doctor for treatment advice.

QuickBayt® Spot Spray

Contains: 3 ingredients

• Controls flies resistant to several residual or residual/insecticides. It contains 2 attractants which makes it to drift to bloom ing crops or weeds if bees are visiting the area. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

QuickBay® Spot Spray

For use in and around animal facilities – designed to lure house flies to their death!

**DIRECTIONS FOR USE (Continued)**

There is no need to spray the complete surface because this product is effective on treated spots. Spot spray applications should begin the start of the season before fly populations have reached their peak.

Best results occur when the product is applied to many locations throughout the structure or facility. Spray the product on surfaces where house flies nest to rest. House flies prefer warm, still air for roosting, so aim this spray to the walls and corners of rooms.

Applications of this product may leave a visible residue on or inside some surfaces. After treatment, it is best to test applications in a small inconspicuous area.

**MIXING DIRECTIONS, USE RATES AND APPLICATION TECHNIQUES (Continued)**

**MIXING DIRECTIONS**

Directions for spray applications:

All dilutions specified on this label result in a 1:2 1/2-insidescoped spray. Mixing directions for 1 gallon or larger spray applica-
tions:

Add one pound of this product to one gallon of water and agitate well until completely mixed.

Add 16 ounces of this product to one gallon of water and agitate until completely mixed.

CAUTION

If on skin

• Call a poison control center or doctor for emergency treatment advice.

• No specific antidote is available. Treat the patient symptomatically.

QUICK FACTS

- Contains Bitrex® bittering agent to help prevent ingestion by non-target animals.
- Controls other insects, such as ants, roaches, earwigs, silverfish, carpet beetles, crickets, flies, mosquitoes, mosquitoes, and spiders.
- Contains Imidacloprid and Z-9-Tricosene to attract house flies.

ENVIRONMENTAL HAZARDS

This product is highly toxic to aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to areas near bodies of water that drain into bodies of water. Do not contaminate water when disposing of equipment wash waters or residue. This product is highly toxic to aquatic invertebrates. Do not apply this product to areas near bodies of water.
IMPORTANT READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product at once.

By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

CONDITIONS: The directions for use of this product are designed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Users, retailers and other unintended consequences may result because of such factors as weather conditions, properties of other materials, the manner of use or application, all of which are beyond the control of Bayer HealthCare LLC. To the extent consistent with applicable laws, all such risks shall be assumed by the user or buyer.

DISCLAIMER OF WARRANTIES: EXCEPT TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BAYER HEALTHCARE LLC MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR PERFORMANCE, OF PERFORMANCE OR FITNESS FOR A PARTICULAR PURPOSE OR PERFORMANCE, OF TITLE, OF FREEDOM FROM INFRINGEMENT, OF RELIABILITY OR ACCURACY OF STATEMENTS MADE ON THIS LABEL. HOW AND WHERE TO APPLY (Continued)

Paint on Application:
For best results, use a brush or paint roller applicator to paint the mixture in small bands up to 6 inches wide on surfaces where house flies aggregate. Do not apply the product at a rate exceeding 8 gallons (11 cups) for every 1,000 square feet of treated surface.

Residual efficacy in animal facilities:
Residual efficacy in animal facilities is dependent on the sanitary conditions and fly pressure level, as well as the type and cleanliness of the surfaces treated.

Apply as soon as a fly pressure exceeds acceptable threshold levels to avoid population build up. Re-apply as needed, typically at 4 to 6 week intervals, but no sooner than 7 days after application.

When spraying surfaces, care must be taken only to spray places out of reach of the animals. This also applies to empty pens due to be re-stocked within the next few weeks. Do not spray directly on animals, feed and drinking supplies or on milking equipment. Do not treat surfaces that people frequently contact. Avoid cross contamination with other pesticides, fertilizers, food, water, and ground water.
