PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER, CORROSIVE. Causes irreversible eye damage and skin burns. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Harmful if inhaled. Wear goggles or face shield, protective clothing and rubber gloves when handling. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash clothing before reuse. Avoid breathing vapor.

ENVIRONMENTAL HAZARDS

This chemical is toxic to fish and wildlife. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal or cleaning of equipment.

PESTICIDE STORAGE

This product is corrosive to mild steel. Do not store or transport in unlined metal containers. Do not contaminate with strong oxidizing or reducing agents. Keep this product in the original container when not in use.

PESTICIDE DISPOSAL

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL

(METAL CONTAINERS): Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

(PLASTIC CONTAINERS): Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

<tr>
<th>FIRST AID</th>
</tr>
</thead>
<tbody>
<tr>
<td>If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye.</td>
</tr>
<tr>
<td>If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.</td>
</tr>
<tr>
<td>If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.</td>
</tr>
<tr>
<td>If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible.</td>
</tr>
</tbody>
</table>

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsions may be needed.

SOLD BY:
DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

CELSSTAT N is for use as an industrial mildewcide in coatings, paints, building materials, wallpaper pastes and adhesives, aqueous adhesives and tackifiers.

COATINGS
For use as a mildewcide in coatings such as latex and solvent-based paints, semi-transparent stains and solid stains. Use 1.0 to 3.0 pounds of CELSTAT N per 100 gallons of coating formulation. If necessary, a higher dosage up to 4.0 pounds of CELSTAT N per 100 gallons may be used depending upon level of control required.

In latex coatings, CELSTAT N should be added during the latex phase of paint manufacture. To ensure uniform distribution throughout the coating, it is recommended that CELSTAT N be premixed with propylene glycol and coalescent. The premix should be added slowly, with good agitation, just prior to the addition of the thinner. In solvent-based coatings, a coupling solvent such as butyl Cellosolve® may be used to assist in mixing CELSTAT N.

CONCENTRATES
CELSSTAT N should be added to the polymer latex concentrate at a level to ensure that the final use-dilution will contain 1.0 to 3.0 pounds of CELSTAT N per 100 gallons of coating formulation.

Dosage levels of CELSTAT N will depend upon the type of formulation, the presence and level of zinc oxides in the system, and the climate in which the material will be exposed.

BUILDING MATERIALS
For use as a mildewcide in building materials such as elastomeric roof and wall coatings and sealants, caulks, sealants, joint cements, spackling, stucco and grouting. Use 1.0 to 3.0 pounds of CELSTAT N per 100 gallons of formulation.

WALLPAPER PASTES AND ADHESIVES
For use as a mildewcide preservative to protect materials such as polyvinyl acetate, starch and dextrin-based pastes from fungal attack after they are applied. Use 0.1 to 0.15 pounds of CELSTAT N per 100 gallons of formulation.

ADHESIVE AND TACKIFIERS PRESERVATION
For use as a mildewcide preservasive in water soluble and water dispersed adhesives such as animal glues, vegetable glues, natural rubber latices, polyvinyl acetate, styrene-butadiene, polyurethane, epoxy, acrylic latices, and tackifiers derived from rosin and hydrocarbon resins. Use 0.10 to 0.20 pounds of CELSTAT N per 100 gallons of formulation.

CELSSTAT N is also sold for use in the formulation of industrial mildewcides in the following uses. Formulators using this product are responsible for providing data for the EPA registration of their formulated products.

COATINGS
For use as a mildewcide in coatings such as latex and solvent-based paints, semi-transparent stains, and solid stains.

BUILDING MATERIALS
For use as a mildewcide in building materials such as elastomeric roof and wall coatings and mastics, caulks, sealants, joint cements, spackling, stucco, and grouting.

WALLPAPER PASTES AND ADHESIVES
For use as a mildewcide preservative to protect materials such as polyvinyl acetate, starch and dextrin-based pastes from fungal attack after they are applied.

AQUEOUS ADHESIVE AND TACKIFIER PRESERVATION
For use as a mildewcide preservative in water-soluble and water-dispersed adhesives such as animal glues, vegetable glues, natural rubber latices, polyvinyl acetate styrene-butadiene, polyurethane, epoxy, acrylic latices and tackifiers derived from rosin and hydrocarbon resins.

LEATHER AND HIDE
For use in the prevention of mold, bacteria and fungi in the storage and transport of wet leather stock such as pickled, chrome-tanned and vegetable-tanned leather and hides.

METALWORKING CUTTING FLUIDS
For use as a mildewcide preservative in soluble and emulsifiable aqueous metalworking fluids.

HYDRAULIC FLUIDS
For use as a preservative in the manufacture and use of high water-based hydraulic fluids and invert emulsion hydraulic fluids typically prepared by emulsifying 40% by volume water in 60% by volume of mineral oil using an oil soluble emulsifying agent.

VINYL AND PLASTICS
For use as a mildewcide preservative in plastics and vinyl materials.

TEXTILES, LAUNDRY, FABRIC, FABRIC SURFACES, FABRIC MILDEW CIDE

AIR WASHER WATER
For use as a mildewcide preservative to prevent fouling in industrial air washer systems.

COOLING TOWER WATER
For use as a mildewcide preservative to prevent fouling in water cooling systems when added to the reservoir, recirculating line or some other point to insure uniform mixing.

EMULSIONS, POLYMERS, AND POLYURETHANE
For use as a mildewcide preservative in the manufacture and storage of synthetic and natural rubber polymer latices including: acrylic; styrene/butadiene; carboxylated styrene/butadiene; ethylene/vinyl acetate; polyurethane; and biopolymers intended for industrial use such as xanthan gum, gum Arabic, guar gum, protein derived polymers, starches and casein derived polymers.
