RESERVE™

FUNGICIDE

For control of diseases of commercial and institutional turfgrasses on golf courses, sod farms, commercial lawns, and professional athletic fields including colleges and universities.

ACTIVE INGREDIENT:
Triticonazole: ..................................................5%
Chlorothalonil: .................................................40%
OTHER INGREDIENTS: ......................................55%
TOTAL .........................................................100%
Reserve Fungicide contains 0.54 lbs triticonazole and 4.25 lbs chlorothalonil per US gallon.

EPA Reg. No. 432-1486

KEEP OUT OF REACH OF CHILDREN
WARNING AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)

BACKED by BAYER™
FIRST AID

IF IN EYES:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Get medical help immediately.

IF ON SKIN OR CLOTHING:
• Take off contaminated clothing.
• Wash skin immediately with plenty of water for 15-20 minutes.
• Take off contaminated clothing.
• Get medical help immediately.

IF SWALLOWED:
• Call a poison control center or doctor for treatment advice.

NOTE TO PHYSICIAN: Treat Symptomatically.

WARNING

HAZARD TO HUMANS AND DOMESTIC ANIMALS
Caustic irritant to the eye, skin, and respiratory tract. Causes lung edema in severe cases. Also causes respiratory tract irritation and pulmonary edema when inhaled. Toxic to humans if inhaled, swallowed, or absorbed through the skin.

PRECAUTIONARY STATEMENTS

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container and keep tightly closed when not in use. Store in a cool dry place. Avoid contact with eyes, skin, mouth, and clothing.

PESTICIDE DISPOSAL: Dispose of empty container after rinsing thoroughly. Disposal in the environment must be in accordance with federal and state regulations.

DIRECTIONS FOR USE

Read entire label before using this product. Do not apply this product in a way that will result in its contamination of表面 water or surface water. Do not apply directly to water or to areas where surface water is present or to areas where it is reasonably certain that surface water is present. Do not contaminate water, food, or feed by storage or disposal.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling. Used with the Worker Protection Standard (WPS), all applicable regulations, and the user must be properly trained.

ENVIROMENTAL HAZARDS

This chemical can contaminate surface water through spray drift. Under some conditions, it may also have a high potential for movement into surface water for several days after application. These include poorly draining or wet soils with easily visible surface water. Do not contaminate water, food, or feed by storage or disposal.
**NON-AGRICULTURAL USE REQUIREMENTS**

The requirements in this box only apply to users of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when the product is used to produce agricultural plants on farms, nurseries, or greenhouses. DO NOT enter or allow others to enter treated areas until sprays have dried.

**GENERAL INFORMATION**

**RESERFZ® FUNGICIDE** is a broad spectrum fungicide with preventative, contact, systemic, rust and canker properties recommended for the control or suppression of certain turf diseases. Disease control is optimal when **RESERFZ® FUNGICIDE** is applied in a preventative and scheduled fumigation program and used in rotation with other fungicides. Failure to follow these label instructions may result in turfgrass injury and inferior turfgrass quality. This product may cause burning, injure all target sites such as grass, foliage, flowers, petals, or similar materials.

**RESERFZ® FUNGICIDE** can be used on all commercial, institutional, turfgrasses, such as golf courses, and farms, commercial lawns, and professional athletic fields, including athletic and university fields.

**GENERAL USE PRECAUTIONS**

**APPLICATION INFORMATION**

**RESERFZ® FUNGICIDE** may be used alone or in mixed disease programs of turfgrass or alternatively used in tank mix or adjuvants with other registered turfgrass fungicides.

Applying sufficient water volume to provide thorough and uniform coverage generally provides the most effective disease control. Do not mix applications with conditions favoring disease beyond the target application area. All applications of **RESERFZ® FUNGICIDE** must be made in accordance with the use directions at this label. **RESERFZ® FUNGICIDE**, when combined with other products such as Eradex® Signature®, will relieve the symptoms of sunflower streak/canker.

**Turfgrass Species**

- Cenchrus and Cynodon Grasses
- Ryegrasses
- St. Andrew/Paspalum
- Zoysiagrasses
- Annual, Rough and Kentucky Bluegrass
- Tall Fescues

**WARNING**

- Avoid applying this product in excessively high moisture or during the summer heat period to prevent injury to turfgrass.
- Follow the manufacturer’s instructions and recommendations for the use of all tank mix fungicides.
- Do not apply **RESERFZ® FUNGICIDE** if the grass is under excessive stress in the summer time or under an intensive growth control program.

**SPRAY MIXING AND COMPATIBILITY**

In general, begin with clean spray equipment and add 1/2 to 1 gallon of water to the spray or mixing tank and start agitation and add the required quantity of fungicide and the tank-mix partner if applicable to the water and complete filling with water to the required tank volume. Follow the recommendations of your State Cooperative Extension Service for tank-mixing with other products. In general, begin the water before adding wettable powders, wettable powders and water-dispersible granules, liquid fertilizers, and emulsifiable concentrates. Mix thoroughly throughout the spray. Do not allow spray mixture to remain in the tank overnight, or for long periods during the day without agitation.

The safety of all potential tank-mixes with **RESERFZ® FUNGICIDE** including pesticides and other products has not been tested on all turf type cultivars. Before applying any tank-mixture not specifically recommended on this label, test the target turf for compatibility. **RESERFZ® FUNGICIDE** is compatible with most commonly used fungicides, herbicides, insecticides, growth regulators, and other nutrient products. However, the physical compatibility of **RESERFZ® FUNGICIDE** with all potential tank-mix partners has not been fully investigated. Tank mixing with other pesticides is desirable, consider a 2 to 3 bar test with the valvemaster and valves applicable used in applicator application. Using a small container of water, add the appropriate amount of the products; wettable powders and water-dispersible granules or a product that has been thoroughly mixed. After thoroughly mixing, test for at least 15 minutes. Look for signs of separation, gels, or white, or other precipitates. Physical compatibility is indicated if the combination remains mixed or can be remixed readily.

- The use of a soil penetration agent may improve the movement into the soil when irrigation after treatment is required for disease control for soilborne diseases **RESERFZ® FUNGICIDE** can be watered in after application.
- Combinations of **RESERFZ® FUNGICIDE** at high labeled rates with other products may impact turf quality and reduce turf growth particularly during periods of stress and high humidity.
- When preparing spray mixtures of **RESERFZ® FUNGICIDE** with other products and the products in the following orders: 1) Water dispersible products, 2) **RESERFZ® FUNGICIDE** followed by other suspension concentrates such as Eradex® Signature.

**RESISTANCE MANAGEMENT**

The active ingredient, triadimefon, in **RESERFZ® FUNGICIDE** belongs to 3. Blasticellulosa or Demetula mycology class of chemistry (Group B).

- To maintain long term effectiveness of triadimefon follow the specific resistance management guidelines from your local extension specialist.

**GENERAL RESTRICTIONS AND LIMITATIONS**

DO NOT apply more than the maximum seasonal rate in any combination of products containing triadimefon.

- DO NOT apply more than 16 oz of **RESERFZ® FUNGICIDE** per 1,000 sq ft (40.3 ppm) per year.

- DO NOT apply more than 5.4 fl oz of **RESERFZ® FUNGICIDE** per 1,000 sq ft (14.7 pt/1000 sq ft) at a single application.

- DO NOT use for sod farms at application rates greater than 15 lb a.i./acre.

Follow the TANK-SPECIFIC USE DIRECTIONS for repeat application intervals.

- For golf courses only, DO NOT apply turf more than 1 inch on golf holes where water bodies are present.

- Turf grass treated with **RESERFZ® FUNGICIDE** prior to harvest, must be mechanically cut, raked, and harvested.

- This product cannot be used to formulate or reformulate any other pesticide product.

- Do not use on home lawns or turf within 200 feet of cured or treated premises. Do not use on wet or submerged turfgrass varieties. Do not exceed 5.4 fl oz/1000 sq ft every 30 days on any turfgrass type. For golf courses in R, do not apply **RESERFZ® FUNGICIDE** to bentgrass greens when temperatures exceed 90°F.

**TANK-SPECIFIC USE DIRECTIONS**

**RESERFZ® FUNGICIDE** controls the diseases listed below.

</tbody>
</table>

### Addtional Turfgrass Uses

- **Algae**: 3.2 - 5.4 Use prophylactically wherever the algae problem exists. Use at 14- to 28-day intervals. Tank mix with chlortripan or mancozeb to improve the control of algae.

- **Summer stress syndrome / Summer decline**: 3.2 - 5.4 Begin applications prior to the onset of conditions for abiotic stress to reduce symptoms of summer stress/decline. Continue as needed, on a 14- to 28-day interval. Tank mix with the Compatible Insecticide to improve the reduction of stress in the summer months of dry, hot conditions.

---

1. **DO NOT** apply more than 18 fl oz of RESERVE RINGO® per 1,000 sq ft (49.3 psi) per year.
IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once.
