PACIFICA PLUS

PRODUCT DESCRIPTION: Pacifica Plus was developed for use on aluminum hollowed vessels but can also be used on fiberglass, wood and steel surfaces. Pacifica Plus uses Solvite Technology to control shrinkage and add growth and a resin system that allows for the control of the color of the vessel. This allows the vessel to be used in narrower vessels of 1 inch and smaller without leaking. It also provides a protective coating for use on 1 inch and smaller vessels. Similarly, Pacifica Plus is effective on surfaces that are subject to wetting and drying conditions, such as aluminum, wood and steel surfaces.

MINIMUM DRY AND AIR DRYING TIMES: Minimum drying time between coats is 4 hours. Before applying the next coat, ensure that the previous coat is dry. For coats applied over a period of 8 hours, the recommended air drying time is 2 hours between coats.

PREPARATION: For surfaces that are to be painted, all surfaces should be thoroughly cleaned with a solution of mild detergent and water. Make sure that all surfaces are free from oil, grease, wax, and other contaminants. For surfaces that have been treated with silicone or other sealants, it is important to remove these substances before painting. For surfaces that are to be painted, use a non-abrasive cleanser and a soft cloth or sponge. Allow the surfaces to dry completely before painting.

APPLICATION: Apply the product using a brush or roller. It is recommended to apply the product in thin coats, allowing each coat to dry before applying the next. The product should be fully covered with at least three coats for best results.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

KEEP OUT OF REACH OF CHILDREN

DANGER

Caution: Exposure to the eyes may cause skin burns. May be fatal if inhaled. May cause irritation. Avoid breathing dust, mist, or fumes, and avoid contact with eyes, skin, or clothing. Keep out of reach of children.

FIRST AID

IF IN EYES:

Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing.

IF SWALLOWED:

Immediately call a poison control center or doctor.

If on Skin or Clothing:

Take off contaminated clothing.

If on Skin:

Rinse skin immediately with plenty of water for 15-20 minutes.

If Inhaled:

Move person to fresh air.

IF NOT BREATHING, CALL 911 OR 999 (Emergency services) or give artificial respiration, preferably by the mouth-to-mouth method.

IF NOT BREATHING, CALL 911 OR 999 (Emergency services) or give artificial respiration, preferably by the mouth-to-mouth method.

IF ON SKIN OR CLOTHING:

For all other cases, consult a physician immediately.

OTHER:

For all other cases, consult a physician immediately.

Note to Physician: Contains petroleum distillate – may cause respiratory irritation.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish, aquatic invertebrates, and shrimp. Do not apply directly to water by cleaning of equipment or disposal of waste. Do not allow treated water to enter water bodies in an approved landfill. Do not discharge treated water containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit or other written authorization from the appropriate state or local water pollution control agency. Do not discharge treated water to sewer systems without prior notification of the local sewage treatment plant authority. For guidance contact your local EPA office or State or local Waste Management Agency.

STORAGE AND DISPOSAL:

Do not store in an approved landfill without prior approval.

CONTAINER DISPOSAL:

If disposed of in an approved landfill, consult Federal, State or local disposal authorities for approved alternative procedures.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
KEEP OUT OF REACH OF CHILDREN

DANGER
Corrosive to the eyes. Causes skin burns. May be fatal if inhaled. Harmful if swallowed.
Do not breathe dust or mist. Keep away from children. Do not get on skin or clothing.
It is toxic by inhalation, ingestion, and skin contact.
It is a health hazard. Wash affected area with water immediately.

FIRST AID
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, and continue rinsing.
• Call a Poison Control Center or doctor for treatment advice.

IF SWALLOWED:
• Immediately call a poison control center or doctor.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give any liquid to the person.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF INHALED:
• Move a person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth.
• Call a poison control center or doctor for further treatment advice.

OTHER:
• Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to Physician: Contains petroleum distillate – vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS: This material is toxic to fish, aquatic invertebrates, oysters, and shrimp. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint chips in an approved landfill. Do not discharge effluent containing this product into lakes, rivers, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: FLAMMABLE. Keep away from heat and open flame.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Open dumping is prohibited. Pesticide, spray mixture, or rinsate that cannot be used or chemically reprocessed should be disposed of according to procedures approved by Federal, State or local disposal authorities.

CONTAINER DISPOSAL: Triple rinse (or equivalent) and dispose of in an approved landfill Consult Federal, State or local disposal authorities for approved alternative procedures.

PACIFICA PLUS

PRODUCT DESCRIPTION: Pacifica Plus is a developed for use on aluminum or coated surfaces, but can also be used on stainless steel, wood, and other surfaces. Pacifica Plus uses Polysilicone technology to control the time and speed of the polymerization process, making it easy to work with for extended periods of time and removing excess without causing any noticeable stains or residue. The performance of Pacifica Plus is directly related to the amount of paint applied (the thicker the film thickness, the more effective the finishing time). Pacifica Plus is not for use on irradiated or commercial surfaces below the waterline or in contact with food, potable water, or any other materials that are not specifically approved for use. It is also not recommended for use on metal-impregnated surfaces or any other materials that can be affected by Polysilicone technology. Directions for Use: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL APPLICATION PROCEDURES

- For applications involving non-commercial use, do not apply by airless spray. Do not apply in an area more than one coat of this product within 24 hours. Apply only in spaces that are properly vented.
- Minimun Drying and Launching Times: The minimum drying time between coats is 6 hours, and launching should be at least 6 hours after the previous coat. For oxides, apply the next coat at least 2.5 times the thickness of the previous coat. For PSL/PSM, the minimum drying time between coats is 24 hours.
- Application: Apply the product in a thin, even coat. Do not apply in temperatures below 60°F (16°C). Do not apply in temperatures above 90°F (32°C). Do not apply in direct sunlight or in areas that are exposed to direct sunlight. Do not apply in areas that are exposed to strong winds. Do not apply in areas that are exposed to rain or snow.

PREPARATION

- DAB ALUMINUM: On small craft surfaces, sanding is not practical. I.e., aluminum pontoons, boat tops, etc.
- Wax base coat with Special Thinner 216 in areas to be painted. Use a brush or roller to apply an even coat of the wax base coat. Then, apply a second coat of the wax base coat. Allow the wax base coat to dry for 24 hours before proceeding to the next step.
- BARE ALUMINUM: On small craft surfaces, sanding is not practical. I.e., aluminum pontoons, boat tops, etc.
- Apply a coat of Special Thinner 216 in areas to be painted. Use a brush or roller to apply an even coat of the wax base coat. Then, apply a second coat of the wax base coat. Allow the wax base coat to dry for 24 hours before proceeding to the next step.
- ALUMINUM - PREVIOUSLY PAINTED WITH ANODIZING PAINT: Remove any paint, varnish, or lacquer with a non-abrasive cleaner. Use a brush or roller to apply an even coat of the wax base coat. Then, apply a second coat of the wax base coat. Allow the wax base coat to dry for 24 hours before proceeding to the next step.
- ALUMINUM - PREVIOUSLY PAINTED WITH A FACTORY FINISH: Use a brush or roller to apply an even coat of the wax base coat. Then, apply a second coat of the wax base coat. Allow the wax base coat to dry for 24 hours before proceeding to the next step.
- ALUMINUM - PREVIOUSLY PAINTED WITH ANODIZING PAINT: Remove any paint, varnish, or lacquer with a non-abrasive cleaner. Use a brush or roller to apply an even coat of the wax base coat. Then, apply a second coat of the wax base coat. Allow the wax base coat to dry for 24 hours before proceeding to the next step.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

KEEP OUT OF REACH OF CHILDREN

DANGER

- Corrosive to the eyes. Causes skin burns. May be fatal if inhale. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear a face shield. Avoid breathing vapor, mist, dust, or smoke. Avoid contact with skin. Use a respirator with a dust or particulate filter. Wash skin with soap and water after handling and before eating and smoking.

- Keep away from children.

- First Aid:
  - If In Eyes: Hold eye open and rinse steadily with cool water for 15 to 20 minutes. Do not rub eye. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing.
  - If Inhaled: Get fresh air immediately.
  - If Swallowed: Do not induce vomiting unless told to do by a poison control center or doctor.

Other:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

IF INHALED:

- Remove patient to fresh air.
- Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do by a poison control center or doctor.
- Do not give any liquid to the patient.
- Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

IF INHALED:

- Call 911 or other emergency services immediately.
- Do not induce vomiting unless told to do by a poison control center or doctor.
- Do not give any liquid to the patient.
- Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

PACIFIKA PLUS

PRODUCT DESCRIPTION: PacifiKa Plus was developed for use on aluminum coated vessels but can be used on fiberglass, wood and steel surfaces. PacifiKa Plus uses Biotec Technology to control slime and algae growth in a system that allows for the controlled release of biocide. This means the time to be protected for extended periods of time and resubsidized without recycling which makes biofouling protection possible for more than one year. The introduction to the market of PacifiKa Plus is directly related to the amount of paint applied (this film thickness may vary due to premature failure). PacifiKa Plus is to be used on recreational and commercial vessels below the waterline as an undercoat (undercoat for both polyurethane and metallic finishes), for antifouling purposes regardless of the type of vessel. Otherwise, the application instructions for previously painted surfaces must be followed. After the application is complete, wash the vessel at a rate of 1:100 of the vessel's weight.

DIRECTIONS FOR USE: This is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL APPLICATION PROCEDURES

For applications by professional (commercial) users: Do not apply by airbrush. Do not apply more than one coat of this product within 24 hours. Apply only in excellent, non-scratched areas. MINIMUM DRY AND LAUNCHING TIMES: Minimum dry time between coats is 6 hours, and before launching is 6 hours. At 72°F. Apply a total of 3.5 to 4.5 coats of PacifiKa Plus by brush or spray spacers or spray spacers. Do not apply oil coats. Keep in mind that the life of the paint is directly related to the amount of paint applied. All areas of the hull, such as the leading edge of the keel and rudder, the transom and the bow stern should be treated. On these areas, add an additional cost of paint to those in areas where the Pacifica Pluss does not extend beyond the areas of the bow stern. Approximate time it will take to paint your boat:

Preparation

BARE ALUMINUM: On small craft where sandblasting is not practical, i.e., aluminum portmanteau boats, car top boats etc., clean with non-abrasive cleaning solution and air dry. Immerse car in water and apply a minimum of 2 coats of 12 Coats of PacifiKa Plus by brush or palmyne. Apply paint to the entire surface of the hull, including all areas where the paint will not extend beyond the bow stern. Apply a minimum of three coats of PacifiKA Plus and a minimum of three coats of Prismene over the entire hull. Mix 1:1 with Prismene. Remove this paint with a minimum of three coats of Prismene. Follow all PacifiKa Plus application procedures as previously indicated but apply a minimum of three coats of Prismene, followed by a minimum of three coats of PacifiKa Plus. BARE FIBERGLASS: On vessels with no antifouling paint, remove all antifouling paint with a minimum of three coats of PacifiKa Plus. Apply a minimum of three coats of Prismene after the antifouling paint removal. BARE WOOD: Sand the surface to a smooth finish with 60-grit sandpaper. Apply a minimum of three coats of PacifiKA Plus. BARE STEEL: Remove all antifouling paint with a minimum of three coats of PacifiKa Plus. Apply a minimum of three coats of Prismene after the antifouling paint removal. BARE METAL: Clean the entire surface and apply a minimum of three coats of PacifiKa Plus. BARE CORK: Clean the entire surface and apply a minimum of three coats of PacifiKa Plus. UNDERWATER METALS INCLUDING STL, SPIGOT, PROPELLERS, TRIM TABS, STRUTS AND LINE-UP FITTINGS: These areas require special attention to the initial paint application in order to improve adherence. Treat these areas like the paint is bare aluminum. The longevity of the product will be affected by the amount of latex in the water. The PMS483 has a high concentration of latex in the water for the PMS483 to work properly. Otherwise, the application instructions for previously painted surfaces must be followed. After the application is complete, wash the vessel at a rate of 1:100 of the vessel's weight.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
KEEP OUT OF REACH OF CHILDREN

DANGER

Corrosive to the eyes. Causes skin burns. May be fatal if inhaled. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear a face shield. Avoid breathing vapor, mist, dust, fumes or other airborne particles. Wash any exposed paint or sanding boat surface, with a supplied - air or powered air purifying respirator (PAAP) approved by NIOSH for use with paints and coating.

WARNING

Wear a Tynex hooded coverall or the equivalent, coveralls beneath the Tyvek hooded coveralls, impervious gloves, and impervious footwear that protect the legs. Remove contaminated clothing and discard after each use. Do not reuse. Wash thoroughly with soap and water after handling and before eating and smoking.

FIRST AID

IF IN EYES:

Hold eye open and rinse slowly and gently with water for 15-20 minutes.

IF ON SKIN OR CLOTHING:

Take off contaminated clothing.

IF SWALLOWED:

Immediately call a poison control center or doctor.

DO NOT INDuce vomiting unless told to do so by a poison control center or doctor.

DO NOT give any liquid to the person.

DO NOT give anything by mouth to an unconscious person.

IF SKIN OR CLOTHING:

Take off contaminated clothing.

Rinse skin immediately with plenty of water for 15-20 minutes.

Call a poison control center or doctor for treatment advice.

IF INHALED:

Move a person to fresh air.

If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth unless done.

Call a poison control center or doctor for further treatment advice.

Other:

Have the product container or label with you when calling a poison control center or doctor or going to the hospital.

NOTICE: Contains petroleum distillate - fumes may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, aquatic invertebrates, oysters, and shrimp. Do not apply directly to water by cleaning of equipment or disposal of waste. Do not allow chills and viruses to be drained on the water surface, or into septic tanks, or into any water system. Do not allow drift to enter any water system without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: FLAMMABLE. Keep away from heat and open flame. Store and dispose properly.

Pesticide Disposal: Do not allow drift to enter any water system by disposing of water, food, or feed by storage or disposal.

Pesticide Disposal: Pesticide wastes are toxic. Open dumping is prohibited. Pesticide, spray mixture, or rinsate that cannot be used or chemically reprocessed to be disposed of must be disposed of in accordance with procedures approved by Federal, State or local disposal authorities.

CONTAINER DISPOSAL: The use of this product does not constitute an approved landfill. Consult Federal, State or local disposal authorities for approved alternative procedures.
