One-Step Disinfectant
For Hospitals and Institutional Use
Effective in the presence of 5% serum contamination
- Kills Pandemic 2009 H1N1 influenza A virus
- Staphylocidal
- Pseudomonacidal
- Bactericidal
- Salmonellacidal
- Fungicidal
- Virucidal*
PROTEX™ DISINFECTANT SPRAY
Is a one-step Hospital Use disinfectant cleaner that is effective against a broad spectrum of bacteria, is virucidal including HIV-1, the AIDS virus and Hepatitis B Virus and Hepatitis C virus, and fungicidal when used as directed.

- Meets AOAC efficacy standards for hospital Disinfectants

USE PROTEX DISINFECTANT SPRAY
- As a disinfectant on hard, non-porous surfaces.
- For disinfecting of ultrasound transducers, probes, mammography compressor plates and other hard non-porous surfaces

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
Caution. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present after first 5 minutes, then continue rinsing the eye.

Call a poison control center or doctor for treatment advice. Have the container or label with you when calling a poison control center or doctor, or going for treatment.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage:
Open dumping is prohibited. Store in original container in areas inaccessible to children.

Container Disposal:
Non-refillable container. Do not reuse or refill this container. Triple rinse (or equivalent). Offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

**Protex Disinfectant Spray** is a one-step hospital use disinfectant, Bactericidal according to the current AOAC Use-Dilution Test Method, Fungicidal according to the AOAC Fungicidal Test and Virucidal according to the Virucidal qualification modified in the presence of 5% organic serum against:

**Bacteria:** Acinetobacter baumannii • Brevibacterium ammoniagenes • Campylobacter jejuni • Community Associated Methicillin-Resistant Staphylococcus aureus—CA-MRSA • Enterobacter aerogenes • Enterococcus faecalis—Vancomycin-resistant—VRE • ESBL Escherichia coli • Klebsiella pneumoniae • Legionella pneumophila • Pseudomonas aeruginosa • Pseudomonas cepacia • Salmonella enterica • Salmonella schottmueleri • Salmonella typhi • Serratia marcescens • Shigella dysenteriae • Staphylococcus aureus—Methicillin Resistant—MRSA • Staphylococcus aureus Multi-Drug Resistant • Staphylococcus aureus—Vancomycin Intermediate Resistant—VISA • Streptococcus pyogenes • Vibrio cholerae

**Viruses:** Hepatitis B Virus (HBV)* • Hepatitis C Virus (HCV)* • Herpes Simplex Virus Type 1* • Herpes Simplex Virus Type 2* • HIV (AIDS Virus)* • Human Coronavirus* • Influenza Type A / Brazil* • Norwalk Virus* • Respiratory Syncytial Virus* • Rotavirus* • SARS Associated Coronavirus* • Vaccinia*

**Fungi:** Trichophyton mentagrophytes • Aspergillus niger

**DIRECTIONS FOR USE**
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**DISINFECTION / VIRUCIDAL / FUNGICIDAL DIRECTIONS:**
Spray 6-8 inches from surface, until surfaces are thoroughly wet. Do not breathe spray. Treated surfaces must remain wet for 10 minutes. Wipe dry with a clean cloth, sponge, or mop or allow to air dry.

**For fungicidal activity:** Protex Disinfectant Spray is an effective one-step fungicide against Trichophyton mentagrophytes when used on surfaces in areas such as locker rooms, dressing rooms, shower and bath areas and exercise facilities.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

**ULTRASONIC BATH DISINFECTANT / VIRUCIDAL DIRECTIONS:** Use Protex Disinfectant Spray to disinfect hard nonporous non-critical objects compatible with Ultrasonic cleaning units. Pour Protex Disinfectant Spray directly into bath chamber. Pre-clean heavily soiled objects. Place objects into unit and operate for a minimum of 10 minutes, according to the manufacturer’s directions. Remove objects and wash with sterile water (sterile water for injection) or allow to air dry. Use fresh product for each use.

**KILLS HIV-1 AND HBV AND HCV ON PRE-CLEANED ENVIRONMENTAL SURFACES / OBJECTS PREVIOUSLY SOILED WITH BLOOD / BODY FLUIDS** in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces / objects with blood or body fluids and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS) or Hepatitis B Virus (HBV) or Hepatitis C Virus (HVC).

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OR HBV OR HCV ON SURFACES / OBJECTS SOILED WITH BLOOD / BODY FLUIDS.**

**Personal protection:** Clean-up should always be done wearing protective gloves, gowns, masks, and eye protection.

**Cleaning Procedure:** Blood and other body fluids containing HIV or HBV or HCV must be thoroughly cleaned from surfaces and objects before application of Protex Disinfectant Spray.

**Contact time:** Leave surface wet for 1 minute (60 seconds) for HIV-1 and 10 minutes for HBV and HCV. Use a 10 minute contact time for disinfection against all other viruses, bacteria and fungi claimed.

**Disposal of Infectious material:** Blood, body fluids, cleaning materials and clothing should be autoclaved and disposed of according to local regulations for infectious waste disposal.

USE PROTEK™ DISINFECTANT SPRAY

As a disinfectant, on hard, nonporous surfaces
For disinfecting of ultrasonic transducers, probes,
Endoscope reprocessors, process and other hard nonporous surfaces
To clean and disinfect tables, chairs and countertops
Use on nonporous athletic mats, wrestling mats,
gymnastic mats, exercise equipment and training tables

USE IN:
- Hospitals – Medical Related Facilities - Nursing Homes
- Athletic Facilities – Exercise Facilities

USE ON:
- Wipeable, hard, nonporous surfaces of: walls, counters,
- Ultrasonic transducers
- Other hard nonporous surfaces made of: laminated surfaces, metal, plastic, stainless steel, vinyl and plastic upholstery, finish, woodwork

Prone Disinfectant Spray is a one-step hospital use disinfectant, bactericidal according to the current AOAC (1990) Test Method, fungicidal against the ADAC fungal test and virus test according to the Virucidal qualification modified in the presence of 3% organic serum lipids.

Bacteria: Acinetobacter baumannii - Brevundimonas diminuta - Campylobacter jejuni - Clostridium perfringens - Community Acquired Methicillin Resistant Staphylococcus aureus (CA- MRSA) - Escherichia coli - Enterococcus faecalis - Enterococcus faecium - Group-A Streptococci - Group-D Streptococci - Pseudomonas aeruginosa - Serratia marcescens - Staphylococcus aureus - Staphylococcus epidermidis - Staphylococcus saprophyticus - Streptococcus pyogenes - Trichophyton mentagrophytes - Virulent haemagglutinating E. coli

Fungi: Trichophyton mentagrophytes - Aspergillus niger

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

DISENTICAN = VIRUCIDAL / FUNGICIDAL DIRECTIONS
Spray 8-10 inches from surface, until surfaces are thoroughly wet. Do not allow water to leak into or drain into any area. Do not allow fluid to be dried on a clean cloth, sponge, or rag to allow to air dry.

For fungicidal activity, use Disinfectant Spray In an effective one step fungicidal against Trichophyton mentagrophytes when used on surfaces in areas such as locker rooms, dressing rooms, showers and bush areas and exercise facilities.

This product is not to be used as a topical antilochlolent or as a topical treatment for any form of cancer or as a treatment for any other condition. For external use only. To be used as a topical antilochlolent or as a topical treatment for any form of cancer or as a treatment for any other condition, the directions for use must be followed as directed by the manufacturer.

SPECIAL INSTRUCTIONS FOR CLEANING AND DISINFECTATION

Against HIV-1 or HIV-2 on Surfaces OR OBJECTS SOILED WITH BLOOD / BODY FLUIDS

Personal protection: Clean up should always be done wearing protective gloves, gowns, masks, and eye protection.

Cleaning Procedure: Blood and other bodily fluids containing HIV-1 or HIV-2 must be thoroughly cleaned from surfaces and objects before application of Prone Disinfectant Spray.

Contact Time: Leave surface well for 1 minute (60 seconds) for HIV-1 and 10 minutes for HIV-2 and HIV-3. Use a 10 minute contact time for disinfection against HIV-1.

Disposal of infectious materials: Blood, body fluids, cleaning materials and waste should be autoclaved and disposed of according to local regulations for infectious waste disposal.
