Net Contents: 2% GALLONS

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is not for use on medical device surfaces.

Preparation of use-solution: For water hardness up to 250 ppm add 2 oz. per gallon (16 oz. per 16 liters) of water (14). For water hardness up to 400 ppm, 2 oz. per gallon (24 oz. per 32 liters) of water (14).

INSTRUCTION FOR USE: Apply use-solution to hard nonporous surfaces thoroughly wetting surface with a cloth, mop, sponge, or spray.

INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV AND HBV ON SURFACE OBJECTS SOILED WITH BLOOD OR BODILY FLUIDS

For HBV, use 2 oz. of NEUTRACIDE per gallon of water (16 oz/liter). Leave solution on for 10 minutes or longer.

For RVFV, use 2 oz. of NEUTRACIDE per gallon of water (16 oz/liter). Leave solution on for 10 minutes or longer.

For sewage, use 2 oz. of NEUTRACIDE per gallon of water (16 oz/liter). Leave solution on for 10 minutes or longer.

For water released into the environment, use 2 oz. of NEUTRACIDE per gallon of water (16 oz/liter). Leave solution on for 10 minutes or longer.

In addition, it is strongly recommended that the following guidelines be followed:

1. Use of a disinfecting agent on hard nonporous surfaces:

a. Use a solution that is effective for disinfecting a broad spectrum of microorganisms, including HIV and HBV.

b. Use a solution that is effective for disinfecting mold and mildew and their spores, when used as directed.

2. Use of a disinfecting agent on soft surfaces:

a. Use a solution that is effective for disinfecting mold and mildew and their spores, when used as directed.

b. Use a solution that is effective for disinfecting a broad spectrum of microorganisms, including HIV and HBV.

Storage and Disposal

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Open dumping is prohibited. Store in original container in areas inaccessible to children.

Pesticide Disposal: Pesticide residues are acutely hazardous. Improper disposal of excess pesticide, spray or residue of brands is a violation of Federal Law. If you have any questions about pesticide disposal, contact your State Pesticide or Environmental Control Agency. The Hazardous waste unit is the responsible EPA Region Office for guidance.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Clean container prior to emptying to prevent blockage from use.

Do not rinse plastic containers prior to emptying to prevent blockage from use. Remove labels prior to disposal. Do not dispose of in household waste.

For immediate disposal, contact your local waste disposal authorities.

NEUTRACIDE is a disinfectant, cleaner, and sanitizer with fungicidal, mildewstat, virucidal, and deodorizing properties suitable for use in hospitals, institutional commercial and industrial use. It is effective in hard water up to 400 ppm hardness (as CaCO₃) in the presence of 5% serum contamination.

Fresh Fragrance

Active Ingredients:

Dialdehyde dimethyl ammonium chloride..........................3.85%
Hexenol...............................................................96.15%
Total........................................................................100.00%

First Aid

In Eyes: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after first 5 minutes. Continue rinsing for at least 15 minutes.

In Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor.

Note to Physician: Probable mucosal damage may substantiate the use of gastric lavage. Treatment of underlying illness should also be given.

.storage
