VigorOx® WWT II

EPA Registration No. 65402-8
EPA Est. No. 00279-NY-003

FOR INDUSTRIAL USE ONLY
Active Ingredients: Peroxycetic acid 15%
Hydrogen peroxide 23%
Inert Ingredients: 20%
Total 100%

KEEP OUT OF REACH OF CHILDREN
DANGER

VigorOx® WWT II is for use in wastewater and sewage effluent disinfection in public and private treatment facilities.

PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals
DANGER - Corrosive, causes eye and skin damage. Harmful if swallowed.
Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly with soap and water after handling. Do not breathe vapor or spray mist.
Do not enter an enclosed area without proper respiratory protection.
Physical or Chemical Hazards - Strong oxidizing agent. Mix only with water. VigorOx® WWT II is not combustible, however, if temperatures exceed 150°F, decomposition occurs, releasing oxygen. The oxygen released could initiate or promote combustion of other materials.
Environmental Hazards - This pesticide is toxic to birds, mammals, fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, swales, oceans, or other waters unless in accordance with requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL
STORAGE
NEVER RETURN VigorOx® WWT II TO THE ORIGINAL CONTAINER AFTER IT HAS BEEN REMOVED. Avoid all containers, especially dirt, caustic, reducing agents, and metals. Contamination and impurities will result in less shelf life and can induce decomposition. In case of decomposition, sell container, dispose container with cool water and dilute with large volumes of water.

Avoid damage to containers. Keep container closed at all times when not in use. Keep container out of direct sunlight. To maintain product quality store at temperatures below 80°F. Do not store on wooden pallets.

PROCEDURE FOR LEAK OR SPOIL: Stop leak if this can be done without risk. Shut off Ignition sources, no flames, smoking, fires, or spark producing tools. Keep combustible and organic materials away. Spread spilled material with large quantities of water. Unlabeled material should not enter confined spaces.

DISPOSAL
PESTICIDE DISPOSAL: If material has been spilled, an acceptable method of disposal is to: a) Dilute with at least 20 volumes of water b) Follow by discharge into a suitable treatment system in accordance with all local, state, and Federal environmental laws, rules, regulations, standards, and other requirements. Because acceptable methods of disposal may vary by location, regulatory agencies should be consulted prior to disposal.
VigorOx® WWT II which is to be discarded should be disposed of as hazardous waste after contacting the appropriate local, state, or Federal agency to determine proper procedures.
CONTAINER DISPOSAL: Empty drums are not reusable by FMC unless special arrangements have been made. Treat rinse drums with water. Dispose of drums in accordance with local, state, and Federal regulations. DO NOT REUSE.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR DISINFECTION OF SEWAGE AND WASTEWATER EFFLUENTS IN TREATMENT PLANTS
Use VigorOx® WWT II to treat sewage and wastewater effluent related to public and private wastewater treatment plants. VigorOx® WWT II can be applied directly to the effluent or may be used with an appropriate aeration (such as hydrogen peroxide or other technology). VigorOx® WWT II may be applied to effluent from trickling beds or recirculating fluidized bed filters. The application rate for individual site facilities will depend on the degree of biocidal or deoxygenation of the effluent stream to be disinfection or the local microbial discharge limit. Adjust application rate to meet the needs of the individual facility.

1. Add VigorOx® WWT II to effluent water at a concentration of 0.5 ppm to 1.0 ppm. Allow contact time of approximately 15 to 60 minutes.
2. The maximum amount of peracetic acid that can be discharged from the treatment facility is 1 ppm. Use an appropriate peracetic acid test kit analyzer to ensure that this level is not exceeded. Contact your FMC representative for assistance establishing treatment regimes.

NOTE: Before using VigorOx® WWT II on metal surfaces, it is recommended that the diluted solution be tested on a small area to determine compatibility.

In all applications always prepare a new solution daily to ensure effectiveness. Do not re-use solutions. Dispose of unused solution.
