PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION
Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing.

ENVIRONMENTAL HAZARDS
Do not contaminate water when cleaning equipment or disposing of equipment washwater. Do not apply directly to treated finished drinking water reservoirs or drinking water receptacles intended for human consumption.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage and disposal.
Storage: Store in a cool (59°- 100°F [15°- 38°C]), dry place.
Pesticide Disposal: Wastes resulting from use of this product may be disposed of on the site or at an approved waste disposal facility.
Container Disposal: Triple rinse (or equivalent). Then puncture and dispose of in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke. Do not reuse container.

Directions for Use
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

APPLICATION DIRECTIONS (Fungus Gnat Control)

Fungus Gnat Halbene
Indoor ornamental and plant
scope use
Light initiation
3.3-6.4 oz/100 gallons
applied as a soil drench.
Heavy initiation
11.3-26 oz/100 gallons
applied as a soil drench.
** 3.3-6.4 oz/100 gallons
** 11.3-26 oz/100 gallons
5 - 1.5 tsp/gallon

Apply Knock-Out Gnat with adequate water by soil drench to sufficiently wet the soil surface. Repeat as needed. It is particularly effective for small infestations when all life stages (eggs, larvae, pupae, and adults) are present, and when all stages are present, including adults. All life stages of pests can be controlled with a single application at the suggested rate range for heavy infestations. Regular follow-up using a suggested higher application rate will establish a long-term maintenance program.

Knock-Out Gnat is safe to use on plant roots. Therefore, applications must be timed to coincide with periods of plant growth. To be effective, applications must be timed to coincide with periods of plant growth. Fungus gnat larvae generally respond to Knock-Out Gnat treatment within 24 hours following application.
