SPECTRUS® OX109

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

IRRITATION MAY DEVELOP FROM EYE AND SKIN EXPOSURE. Avoid contact with eyes. Wear gloves and safety goggles. Wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS

Sodium bromide is not flammable. However, in fires fueled by other materials, hydrogen bromide or bromine may be released. In case of fire, wear self-contained breathing apparatus.

CONTENTS: LIQUID

POUNDS PER GALLON: 11.9 (70°F)

EPA REGISTRATION NUMBER: 3876-159

EPA ESTABLISHMENT NUMBER: 3876-OX-001

KEEP OUT OF REACH OF CHILDREN

CAUTION

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For product use see Panel 2.

For Industrial Use. Technical advice regarding specific site problems is available from GE Water & Process Technologies. A Material Safety Data Sheet containing more detailed information relative to this product is available upon request.

STORAGE AND DISPOSAL

STORAGE: Keep product dry in tightly closed original container when not in use. Store in a cool, dry, well ventilated area. Product should be stored at 50°F (10°C) or above.

DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. DO NOT REUSE EMPTY CONTAINER. Triple rinse the container (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incinerate. Burn only if allowed by state and local authorities. If burned, stay out of smoke.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triplle rinse container (or equivalent) promptly after emptying. Offer for reconditioning if appropriate. Triple rinse as follows: Empty remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth several times. Empty the rinse into application equipment or a mix tank or store rinse for later use or disposal. Repeat this procedure two more times.

CONTAINER DISPOSAL: Refillable container. Refill this container with product only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or a mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinse into application equipment or rinse collection system. Repeat this rinsing procedure two more times.

FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. If contact persists, if present, after the first 5 minutes, see the following notes.

Call a poison control center or doctor for treatment advice.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give two breaths if possible, and begin CPR if necessary. If breathing is not suppressed after giving two breaths, call a poison control center or doctor immediately. If breathing is stopped, give artificial respiration. If unconscious, get medical treatment immediately.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor immediately for expedient advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

HOT LINE NUMBER: 1-800-722-7112

Have the product container or label with you when calling a poison control center or doctor or going to treatment. You may also contact 1-800-888-1110 for emergency medical information.

Note to Physician: Product mucosal damage may indicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.
SPECTRUS® OX109

FOR USE AS A DISINFECTANT, BACTERICIDE, VIRUCIDE, AND MUCUS CONTROL. AGENT FOR CONTROL OF BIOFILM AND SLIME IN RECOLLECTING CIRCUIT WATER SYSTEMS, BREWERY PASTEURIZING SYSTEMS, AIR WASHERS, ONCE THROUGH COOLING WATER AND WASTEWATER TREATMENT SYSTEMS, AND PULP AND PAPER MILLS.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read entire label and use strictly in accordance with precautionary statements and directions.

RECYCLING COOLING WATER SYSTEMS, INCLUDING AIR WASHERS AND BREWERY PASTEURIZING: When used as directed, this product effectively controls algal, bacterial, and fungal slime and controls the settlement and growth of milkslugs such as the zebra mussel (Dreissena) or the Asian clam (Corbicula) in commercial and industrial cooling towers; it reduces water systems such as flow through filters, heat exchange water systems, and industrial water scrubbing systems.

DOSEAGE RATES: Add this product to the system at a 0.125 to 2.0 sodium bromide/oxidant mole ratio. For example: 1) 1 to 2.5 pounds of chlorine gas (99.9%) per gallon of sodium bromide solution; 2) 1.3 to 2.1 pounds sodium hydroxide (12.5% available chlorine) solution per gallon of sodium bromide solution.

INITIAL DOSE: When the system is initially treated, add 0.005 to 0.024 gallon of this product per 1000 gallons of water contained in the system and oxidize with either gas chlorine (0.00 to 0.04 lb. gas chlorine per 1000 gallons of contained water), or sodium hypochlorite solution (0.005 to 0.032 gallons of 12.5% sodium hypochlorite solution per 1000 gallons of contained water). SUBSEQUENT DOSE: When microbial control is evident, add 0.005 to 0.045 gallon of this product per 1000 gallons of water contained in the system, and oxidize with either gas chlorine (0.00 to 0.04 lb. gas chlorine per 1000 gallons of contained water), or sodium hypochlorite solution (0.003 to 0.032 gallons of 12.5% sodium hypochlorite solution per 1000 gallons of contained water).

ONCE-THROUGH COOLING WATER AND WASTEWATER TREATMENT SYSTEMS: When used as directed, this product effectively controls algal, bacterial, and fungal slime and controls the settlement and growth of milkslugs such as the zebra mussel (Dreissena) or the Asian clam (Corbicula) in once-through fresh and sea water cooling systems and disinfects secondary and tertiary wastewater treatment systems.

DOSEAGE RATES: Add this product to the system at a 0.125 to 2.0 sodium bromide/oxidant mole ratio. For example: 1) 1 to 2.5 pounds of chlorine gas (99.9%) per gallon of sodium bromide solution; 2) 1.3 to 2.1 pounds sodium hydroxide (12.5% available chlorine) solution per gallon of sodium bromide solution.

INITIAL DOSE: When the system is initially treated, add 0.005 to 0.024 gallon of this product per 1000 gallons of water contained in the system and oxidize with either gas chlorine (0.02 to 0.06 lb. gas chlorine per 1000 gallons of contained volume), or sodium hypochlorite solution (0.05 to 0.06 gallon of 12.5% sodium hypochlorite solution per 1000 gallons of contained volume). SUBSEQUENT DOSE: When microbial control is evident, add 0.005 to 0.045 gallon of this product per 1000 gallons of water contained in the system, and oxidize with either gas chlorine (0.00 to 0.04 lb. gas chlorine per 1000 gallons of contained volume), or sodium hypochlorite solution (0.005 to 0.04 gallon of 12.5% sodium hypochlorite solution per 1000 gallons of contained volume).

PULP AND PAPER MILLS: When used as directed this product effectively controls algal, bacterial, and fungal slime in pulp and paper mill fresh and sea water influent water systems; cooling water systems, wastewater treatment systems, non-potable water systems, and other process water.

DOSEAGE RATES: Add this product to the system at a 0.125 to 2.0 sodium bromide/oxidant ratio. For example: 1) 1.6 to 26.5 pounds of chlorine gas (99.9%) per gallon of sodium bromide solution; 2) 1.3 to 2.1 pounds sodium hydroxide (12.5% available chlorine) solution per gallon of sodium bromide solution. Add sufficient amount of this product and oxidize with either gas chlorine or sodium hypochlorite solution to achieve a residual bromine level of 0.5 to 5 ppm or as needed to maintain control of the system. This product can be added whenever chlorination is applied.

Feed this product either before or after the oxidant injection point into the water to be treated. Be sure rapid mixing of the treated water, this product and oxidant is achieved. Pump manufacturers can recommend the appropriate materials of construction and capacity for a pump to feed this product or sodium hypochlorite solution. If used as the oxidant, chlorine gas must be handled and used only in accordance with practices recommended in the Chlorine Manual published by the Chlorine Institute, Inc., New York. Use chlorine gas only in well ventilated areas.

Treatment levels of this product and oxidant must be measured with test kits for either bromine or chlorine. Tests should be made immediately after drawing water samples from the system. Use test kits according to directions: 1. When a bromine test kit is used, results can be read directly as ppm bromine. 2. When a chlorine test kit is used, results can be expressed in terms of bromine by multiplying chlorine values by the conversion factor of 2.25.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.

Manufactured for GE Water & Process Technologies.
