Tank Mixing Instructions
1. Add 3/4 of the required amount of water to the mix tank and turn on the agitator. Mechanical aeration is preferred.
2. Use the following mixing sequence: dry or colorant, wettable powders, soluble powders, flowable formulations, emulsifiable concentrates, and remaining 1/4 of the required water. The 1/4 of the required water as the last item for addition to the premix tank can be used as rinsate for the chemical container or to adjust the total slurry to accommodate for water displacement by powdered products.
3. Maintain agitation until the entire slurry mixture has been used.
4. Ensure that slurry is dry prior to bagging.

NOTE: Slurry that has been treated with this product that is then packaged or bagged for future use must contain the following labeling on the suitable of the seed package or bag. This seed has been treated with pyraclostrobin—DO NOT use for food, feed, or oil purposes. Store away from food and feedstuff. When opening the bag or loading, pouring, or handling the treated seed, wear long-sleeved shirt, long pants, shoes, and chemical-resistant gloves made of any waterproof material. After the seeds have been planted in soil or other planting media, DO NOT enter or allow worker entry into areas with treated seeds during the restricted-entry interval of 12 hours, except that workers may enter the areas with treated seeds without restriction if there will be no worker contact with the soil/seed substrates.

Conditions of Sale and Warranty
The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as the presence of other or untreated or unapproved materials, seed of low quality or low vigor or low germination, use of the product in a manner inconsistent with its labeling, misapplication of the product, or weather conditions at planting or environmental conditions during seed storage, all of which are beyond the control of Monsanto Company or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer. Monsanto Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, MONSANTO COMPANY MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER'S EXCLUSIVE REMEDY AND MONSANTO COMPANY'S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REIMBURSEMENT OF THE PURCHASE PRICE OF THE PRODUCT.

Active Ingredient: pyraclostrobin (2-[2-[(1-(4-chlorophenyl)-1H-pyrazol-3-yl)(methyl)phenyl](methoxy)-methyl ester)...... 18.4%
Other Ingredients: ............ 81.6%
Total: .......................... 100.0%

*Equivalent to 1.67 pounds of pyraclostrobin per gallon.

Net Contents: 2.5 gallons

Packaged For: Monsanto Company • 800 N. Lindbergh Blvd.
St. Louis, Missouri 63167 • 1-314-694-4000
FIRST AID

If swallowed:
• Call a poison control center or doctor immediately for treatment advice. 
• Have person sip a solution of water or milk unless told not to do so by a poison control center or doctor. 
• DO NOT induce vomiting unless told to do so by a poison control center or doctor. 

If on skin or clothing:
• Take off contaminated clothing. 
• Rinse skin immediately with plenty of water for 15 to 20 minutes. 
• Call a poison control center or doctor for treatment advice. 

If in eyes:
• Hold eyes open and rinse slowly and gently with water for 15 to 20 minutes. 
• Remove contact lenses, if present, after first 5 minutes; then continue rinsing eyes. 
• Call a poison control center or doctor for treatment advice. 

If inhaled:
• Move person to fresh air. 
• If person is not breathing, call 911 or an ambulance; then give artificial respiration, preferably by mouth to mouth, if possible. 
• Call a poison control center or doctor for further treatment advice.

HOTLINE NUMBER

Have the product container or label with you when calling a poison control center or doctor for treatment. 
For Medical Emergencies Only Call Collect 24 Hours A Day 1-314-694-4000.

Precautionary Statements

Hazardous to Humans and Domestic Animals 
CAUTION: Harmful if swallowed. Avoid contact with skin or clothing.

Personal Protective Equipment (PPE)
Some materials that are chemically resistant to this product are listed below:
• For more options, refer to Category A on an EU chemical-resistance selection chart.
• Some materials are chemically resistant to this product as listed below.

Applicators and other handlers must wear:
• Long-sleeved shirt and long pants. 
• Chemical-resistant gloves made of any waterproof material (such as nitrile, butyl, neoprene and/or barrier lamninate). 
• Breathable protective respirator with NIOSH/OSHA approved filter(s) or respirator that meets the requirements of the Mine Act. 
• Shoes plus socks. 
• Dust/mist air respirator with high efficiency particulate air (HEPA) or equivalent filter. 

Follow the manufacturer's instructions for cleaning and maintaining PPE. If not such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Environmental Hazards

This product is toxic and aquatic invertebrates, DO NOT discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. DO NOT discharge effluent containing this product to water systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or the regional office of the EPA. DO NOT contaminate water when deposing equipment washwaters.

Directions For Use

It is a violation of federal law to use this product in a manner inconsistent with, or opposite to, any labeling shown on the container. DO NOT apply this product in a way that will contact workers or other persons. Only protected handlers may be in the area during application. For any requirements specific to your state or local, consult that agency responsible for pesticide regulation.

Storage and Disposal

DO NOT contaminate water, food, or feed by storage or disposal.

Pesticide Storage:
• Store in original container only. 
• Keep container closed when not in use. 
• DO NOT store near food or feed.

Pesticide Disposal:
• Waste results from using this product may be disposed of on site or in an approved waste disposal facility. If these wastes cannot be disposed of according to label instructions, contact your State Pesticide or Environmental Control Agent, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal:
Nonrefillable Container:
• DO NOT reuse or refill this container.
• Triplet or mousse pressurized container or equivalent filled promptly after emptying; then offer for recycling. If unfillable, or if the product contains explosive formulations, then dispose of in the sanitary landfill or by incineration, or by other procedures approved by state and local authorities.

Triple rinses containers small enough to shake (capacity ≤ 5 gallons) as follows:
• Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to stop. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour into application equipment or a mix tank, or store inlets for later use or disposal. Drain for 10 seconds after the flow begins to stop. Repeat this procedure two more times.

Pressure rinse as follows:
• Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to stop. Hold container upside down over application equipment or mix tank, or collect inlets for later use or disposal. Insert pressure rining nozzle in the risers of the container and rinse at no more than 30 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to stop.

In Case of Emergency

In case of large-scale spillage regarding this product, call:
• CHEMTREC: 1-800-424-9300.
• Monsanto Company 1-314-694-4000.

In case of medical emergency regarding this product, call:
• Your local doctor for immediate treatment. 
• Your local poison control center (hospital). 
• Monsanto Company 1-314-694-4000.

Steps to be taken in case this material is released or spilled:
• If in case of spill on paved surfaces, mop and remove to chemical waste storage area until proper disposal is made. If product cannot be used according to label.
• Dike and contain spill with inert material (sand, earth, etc.) and transfer to liquid and solid (drying material) to separate containers for disposal. 
• Remove container using clothing and wash affected skin areas with soap and water. 
• Wash clothing before reuse. 
• Keep spill out of drains and open bodies of water.

General Information

Acceleron® DX-109 Fungicide Seed Treatment is a broad-spectrum fungicide that provides prevention and seed treatment protection from diseases, and controls various seedborne diseases. To meet the requirements of the Act, seed treatment applications with this product must not exceed the required volume of water to the mix tank. Fertilizer application, and slump conditions. Make all applications according to the use directions in this label. Use the higher rates of this product when disease conditions are high. Information regarding the contents and levels of metals in this product is available on the internet at http://www.epa.gov/iris/hlth.

Resistance Management

The active ingredient in this product, pyraclostrobin, belongs to the group of resistance inhibitors displayed by the EPA as Quinone Outside Inhibitors (QOI) or target site of action Group 11 fungicides. Due to the minimal amounts of the product applied to the seed, the plant, the potential for development of resistance is extremely low. Seed treatments with this product can, therefore, be followed by folic acid and resistance management guidelines for folic acid fungicides based pyraclostrobin (Cabomé® EG fungicide, Headline® fungicide, or Pinnacle® fungicide) as specified on the respective label.

Application Instructions

This product can be used in both commercial seed treatment facilities and on-farm systems.

Apply this product as a water-based mixture using standard slurry or mist-type seed treatment application equipment. The exact amount of water needed to provide the mixture or slurry ratio (ml/kg or seed is critical to protect against weather conditions, variable seed quality and environmental factors. Installation and equipment used must have a bearing area and a weigh on coverage. Consult a seed treatment specialist regarding slurry rates, recommended for the crop seed to be treated with this product. The required amount of this product must then be diluted with the specified amount of water that will provide uniform and complete coverage on the seed surface. Uniform application of seed and complete seed coverage are necessary for seed safety and best disease protection.

Seed must be of a good quality and well cleaned prior to treatment. The purchaser of this product is responsible for ensuring that all seed treated with this product are adequately dried with a suitable color to prevent excessive and extend seed for feed or man for feed for animals. Refer to 21 CFR, Part 225. Use an EPA-approved dye or colorant that impacts an unusual color to the seed. Any dye or colorant added to treated seed must be, cleared for use under 40 CFR, Part 190,000. "Exemptions from the requirement of a tolerance". Federal regulations have established an acceptable tolerance or exemptions from tolerances for residues on food and forage crops that must not exceed the product (dye or colorant) diluted at specified rates.

Consult the seed treatment specialist for calibration and operational procedures of the seed treatment equipment being used. Mechanical agitation is required for proper mixing of this product. Prepare no more mixture of this product than is needed for immediate treating. Add 3/4 of the required volume of water to the mix tank. With agitation running, add the required amount of this product in the tank along with other seed treatment components. Add the remaining 1/4 amount of the required volume of water. Use the mixing sequence that follows. Agitate thoroughly before and during all applications.

Acceleron® DX-109 Fungicide Seed Treatment With Tank Mix Partners

This product mixes easily with water and other water-based seed treatments. When using this product in a tank mixture with other seed treatment products, observe all directions for use, compatibilities, use rates, dilution rates, precautions, and limitations that appear on the tank mix product label. Pressure systems and tank mix products must not be exceeded at all times. In the event that the most restrictive label precautions and limitations must be followed. The product mix must be mixed with any product that prohibits such mixing. All additional precautions and limitations regarding the use directions.

When mixing this product with products from other manufacturers, test the compatibility prior to use by conducting a jar test as follows:
• Mix all intended seed treatments with the appropriate amount of water in a clear glass container.
• Mix well and let sit for one hour.
• Mix well and let sit for one hour.

Physical compatibility is only part of compatibility. Testing also needs to be done with the seed to make sure the combination of products does not have detrimental effects on the seed.

KEEP OUT OF REACH OF CHILDREN
CAUTION/PRECAUCIÓN

See attached booklet for complete Precautionary Statements, Directions For Use, Conditions of Sale and Warranty, and state-specific crop and/or use site restrictions. Precautionary Statements: Hazards to Humans and Domestic Animals. Caution. Harmful if swallowed. Avoid contact with skin or clothing. Environmental Hazards: This product is toxic to fish and aquatic invertebrates. DO NOT discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. DO NOT discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or the regional office of the EPA. DO NOT contaminate water when disposing of equipment washwaters. FIRST AID: If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. DO NOT induce vomiting unless told to do so by a poison control center or doctor. DO NOT give anything by mouth to an unconscious person. If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice. If in eyes: Hold eyes open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after first 5 minutes; then continue rinsing eyes. Call a poison control center or doctor for treatment advice. If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance; then give artificial respiration, preferably by mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice.

HOTLINE NUMBER: Have the product container or label with you when calling a poison control center or doctor or going for treatment. For Medical Emergencies Only Call Collect 24 Hours a Day 1-314-694-4000. Storage and Disposal: DO NOT contaminate water, food, or feed by storage or disposal. Pesticide Storage: Store in original containers only. Keep container closed when not in use. DO NOT store near food or feed. Pesticide Disposal: Wastes resulting from using this product may be disposed of on-site or on an approved waste disposal facility. If these wastes cannot be disposed of according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. CONTAINER DISPOSAL: Nonrefillable Containers. DO NOT reuse or refill this container. Triple rinse or pressure rinse container (or equivalent) promptly after emptying; then offer for recycling. If available, or reconditioning, if appropriate, or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities. See attached booklet for complete container disposal instructions including triple rinsing and pressure rinsing instructions.
