**ACTIVE INGREDIENTS:**

- Bronopol: 14.00%
- 1-butyl-2,4-tert-butyl-2-salicylidene-1,3-cyclohexadiene: 1.5%
- 2-methyl-4-isoalloxazin-3-one: 0.5%

**STORAGE AND DISPOSAL:**

- **DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE AND DISPOSAL NONREFILLABLE CONTAINER.**
- **DO NOT REUSE OR REFILL THIS CONTAINER**

**PESTICIDE STORAGE:**

- Do not contaminate water, food, or feed by storage, disposal, or cleaning of equipment.
- Do not allow to freeze.

**PESTICIDE DISPOSAL:**

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your local state pesticide or environmental control agency, or the hazardous waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:**

- Triple rinse as necessary and apply the remaining contents into application equipment or a mix tank. Fill the container 1/3 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Repeat this procedure two more times. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incinerate, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

**DIRECTIONS FOR USE:**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Do not apply this product in a way that will contact workers or other persons.**

**INDUSTRIAL USE ONLY**

Nuosept W Concentrate is a liquid in-can preservative and may be added at any point in the production process. For best results add it as early as possible in the manufacturing process. Avoid high temperature/ high alkaline conditions. Typical usage rates are 0.025 – 0.19% by weight (36 – 265 ppm bronopol and 5 – 58 ppm isothiazolones) for adhesives and tackifiers (such as animal glues, rubber lattices, acrylic lattices), paints and coatings (such as architectural paints, water coatings such as for paper or wood, emulsions), building materials (such as caulk, joint cements, grouts, mastics, sealants, spackling, ready-to-mix cement, tape joint compounds), wallboard (drywall and gypsum board), lattices (such as synthetic and natural polymer lattices, starches and casein derived polymers, protein derived polymers), fountain solutions for lithographic printing operations, photo processing, ink/inks/inking components*, metal working and metal cleaning fluids, industrial water such as process water, wash water and waste water, industrial cooling water and air washer systems, consumer household and institutional products (such as dishwashing detergents, laundry detergents, laundry pre-spotters, fabric softeners, laundry spray starch, surface cleaners, all-purpose liquid cleaners, anti-tarnish polishes, furniture and floor polishes*, carpet shampoos and carpet pre-spotters, automotive cleaners, wax, and glasses**) as well as for package utility products such as pre-moistened sponges and mops; and other aqueous compositions such as emulsions and dispersions, pesticide formulations; pigment dispersions and slurries.

*These applications are not approved for use in California.

**ENVIRONMENTAL HAZARDS:**

This pesticide is toxic to terrestrial and aquatic plants, fish, and aquatic invertebrates. Do not discharge effluent containing the product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Quality Bureau or Regional Office of the EPA.
