CORATHION QUICK FACTS
- Controls both flies (including pyrethroid- and chlorinated hydrocarbon-resistant flies), Gulf Coast ticks, boll weevil and opion ovipositing up to 3 months.
- Contains 50% organophosphate insecticide.
- Fagasafe™ allows for maximum insecticide loading capacity and even dispersion of insecticide.

WHERE TO APPLY
- Beef and Non-Lactating Dairy Cattle.

HOW TO APPLY
- Use the Affine™ Universal Fly Tagger with red pin and black clip to apply tags to cattle.

COVERAGE
- All native animals in the herd should be tagged.
- For optimum control of flies, bees, flies, Gulf Coast ticks and spiny ear ticks, attach one tag every one to every five tags for cattle.
- Use once per week.
- For adequate control of bees, flies, bees, Gulf Coast ticks and spiny ear ticks, attach one tag every three to every five animals.

RE-APPLICATION
- Consider the Parabon™ treated products to be effective against flies, bees and bees for up to 30 days.
- Reapply as necessary.
- Remove tag by end of fly season or prior to slaughter.

QUESTIONS?
- For questions or comments, call toll-free 1-800-466-3796.

DIRECTIONS FOR USE
- It is a violation of Federal law to use this product in a manner inconsistent with its labeling. The instructions and warnings must be followed by the user at the time of purchase and application.
