maintain
3" silk tabs®
3" chlorinating tablets with SilkGuard®

Kills Bacteria and Controls Algae
Featuring SilkGuard® Technology
- Makes water soft and smooth
- Prevents scaling, protects against corrosion and metal staining
- Protects pool equipment for longer life

With SunShield®
- Protects chlorine from sunlight, so you use less

For All Pool Types
Suitable for Use with BioLab® UV System

ACTIVE INGREDIENT:
Trichloro-s-triazinetrione .................. 94.05%
OTHER INGREDIENTS: .................. 5.95%
TOTAL INGREDIENTS: .................. 100.00%
(Available Chlorine 84.65%)

TEST AND ADD™
SANITIZER  SHOCK  ALGICIDE

BIOGUARD® CARE SYSTEM

NET WT. 7.5 LBS. (3.4 Kg)

** Please refer to directions for use.
KEEP OUT OF REACH OF CHILDREN
DANGER see back panel for first aid and additional precautionary statements.
BIO-LAB, INC. P.O. BOX 381092, LAMONTEVILLE, GA 31049 USA
POOL SANITIZATION WITH 3 INCH TABLETS
BioGuard® has a wide variety of products that are required to maintain a high quality swimming environment. These products are designated as "Maintain".

The BioGuard Care System has three important parts that help you maintain crystal clear sparkling water.
- A Sanitizer to control bacteria
- A Shock to destroy contaminants
- A Preventative algicide to stop algae before it starts

All parts of the BioGuard Care System are vital to achieve beautiful water.

This product is one of the chlorinating sanitizer products for the BioGuard Care System. This product with SilkGuard®, the compound action blue tablet that does more:
- Kills bacteria and controls algae
- Prevents metal staining and corrosion
- Reduces scale formation
- Makes water soft and smooth

SilkGuard protects your pool equipment for longer life. It coats metal surfaces protecting them from corrosion and rust. It prevents scale formation in your pool circulation system and on pool surfaces. SilkGuard makes the water soft and smooth.

This product also contains SunShield®, which protects chlorine from sunlight, so you use less.

This product should be used as a maintenance sanitizer when using the BioGuard® UV system.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Ensure all pool equipment is working properly. Clean or backwash filter following manufacturer's directions. Adjust pH to between 7.2-7.6. In chlorinated pools, add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degenerative effects of sunlight upon the chlorine residual. When using other products as outlined in the directions for this product, always follow directions on those products.

Do not add other chemicals into the skimmer, feeder or floater where this product is in use as a fire or explosion may occur. To avoid damage to pool surface or materials do not allow product to come in direct contact with these materials. Do not throw tablets directly into pool.

INITIAL TREATMENT:
If water is cloudy or green, superchlorinate pool with appropriate shock product until pool is clear.

If using a feeder or floater, add 16 ounces of this product (two tablets) per 10,000 gallons of pool water to feeder or floater. Adjust the feeder or floater following manufacturer's instructions to establish a free available chlorine level between 1-4 ppm. Allow water to circulate at least 4 hours and then test for the free available chlorine level. When free available chlorine level is adjusted to 1-4 ppm, add the preventative algicide appropriate to your needs.

If using a plastic skimmer, add 16 ounces of this product (two tablets) per 10,000 gallons of pool water. Place tablets in skimmer basket. Allow water to circulate at least 4 hours before testing. Test for the free available chlorine level adding more tablets as necessary to establish a free available chlorine level of 1-4 ppm. When free available chlorine level is adjusted to 1-4 ppm, add the preventative algicide appropriate to your needs.

ROUTINE MAINTENANCE:
Add 16 ounces of this product (two tablets) per 10,000 gallons of pool water per week, or as often as needed, to the floater, feeder or skimmer to maintain a constant free available chlorine level of 1-4 ppm. Sunlight, rainfall, temperature, number of swimmers, and frequency of pool use affect the rate of chlorine residual loss so check the floater, feeder or skimmer often and refill as needed.

Entry into treated swimming pools is prohibited when free available chlorine levels are above 4 ppm due to risk of body injury.

STORAGE AND DISPOSAL: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Do not contaminate food or feed storage or disposal. CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. Triple rinse container (or equivalent) promptly after emptying.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS:
DANGER: Corrosive; Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or fumes. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or safety glasses, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash before reuse.

FIRST AID: IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call poison control center or doctor for treatment advice.
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. IN CASE OF MEDICAL EMERGENCY, CALL 1-877-899-5555.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

PHYSICAL OR CHEMICAL HAZARDS: CONTAINS A STRONG OXIDIZING AGENT. Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. When using automatic feeding devices, always follow manufacturer's directions as to the proper addition of sanitizer product to chlorinators. Use clean utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well-ventilated area, flood area with large volumes of water.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.
