Microban Disinfectant Spray Plus Fragrance Free

**GENERAL METHOD OF APPLICATION**

Surfaces and objects should be cleaned of gross dirt before disinfectant treatment. Spray surfaces and articles with thoroughness, as enough to completely wet the treatment area. Microban Disinfectant Spray Plus can be used on pre-cleaned hard non-porous surfaces such as tiled porcelain, waste receptacles, compactors, on, in and around rest room fixtures, toilet seats, tanks, floors, walls, ceilings, doors, doorways, cabinets, workbenches, counters, food preparation areas, dining areas, living rooms, offices, homes, in and around veterinary clinics, animal production areas, dairy operations, livestock confinement areas, abattoirs, and feedlots. For use in schools, hotels, motels, restaurants, offices, homes, or any other environment or situation. Microban Disinfectant Spray Plus is not intended for applications involving direct skin contact with skin irritants. Do not use for anything other than a nonporous surface. Do not IX-OR COVERING OR FABRIC. Tools, equipment, vehicles, motorboats, recreational vehicles, buildings, and other structures. For use on previously cleaned hard non-porous surfaces of furniture, upholstery, leather, vinyl, plastic, metal, porcelain, and other such surfaces. Microban Disinfectant Spray Plus can be used on pre-cleaned hard non-porous surfaces such as tiled porcelain, waste receptacles, compactors, on, in and around rest room fixtures, toilet seats, tanks, floors, walls, ceilings, doors, doorways, cabinets, workbenches, counters, food preparation areas, dining areas, living rooms, offices, homes, in and around veterinary clinics, animal production areas, dairy operations, livestock confinement areas, abattoirs, and feedlots. For use in schools, hotels, motels, restaurants, offices, homes, or any other environment or situation. Microban Disinfectant Spray Plus is not intended for applications involving direct skin contact with skin irritants. Do not use for anything other than a nonporous surface. Do not IX-OR COVERING OR FABRIC. Tools, equipment, vehicles, motorboats, recreational vehicles, buildings, and other structures. For use on previously cleaned hard non-porous surfaces of furniture, upholstery, leather, vinyl, plastic, metal, porcelain, and other such surfaces. Microban Disinfectant Spray Plus can be used on pre-cleaned hard non-porous surfaces such as tiled porcelain, waste receptacles, compactors, on, in and around rest room fixtures, toilet seats, tanks, floors, walls, ceilings, doors, doorways, cabinets, workbenches, counters, food preparation areas, dining areas, living rooms, offices, homes, in and around veterinary clinics, animal production areas, dairy operations, livestock confinement areas, abattoirs, and feedlots. For use in schools, hotels, motels, restaurants, offices, homes, or any other environment or situation. Microban Disinfectant Spray Plus is not intended for applications involving direct skin contact with skin irritants. Do not use for anything other than a nonporous surface. Do not IX-OR COVERING OR FABRIC. Tools, equipment, vehicles, motorboats, recreational vehicles, buildings, and other structures. For use on previously cleaned hard non-porous surfaces of furniture, upholstery, leather, vinyl, plastic, metal, porcelain, and other such surfaces. Microban Disinfectant Spray Plus can be used on pre-cleaned hard non-porous surfaces such as tiled porcelain, waste receptacles, compactors, on, in and around rest room fixtures, toilet seats, tanks, floors, walls, ceilings, doors, doorways, cabinets, workbenches, counters, food preparation areas, dining areas, living rooms, offices, homes, in and around veterinary clinics, animal production areas, dairy operations, livestock confinement areas, abattoirs, and feedlots. Do not IX-OR COVERING OR FABRIC. Tools, equipment, vehicles, motorboats, recreational vehicles, buildings, and other structures. For use on previously cleaned hard non-porous surfaces of furniture, upholstery, leather, vinyl, plastic, metal, porcelain, and other such surfaces.
PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Not to be used on treated or finishing surfaces unless specifically approved by the manufacturer for such use. May cause staining on clothing and fabrics. Applicable to wool, nylons, and other wovens and fibers containing nitrogen bases.

TEST FABRIC OR SURFACE IN AN INCONSPICUOUS AREA FOR COLOR FASTNESS OR ADVERSE REACTION.

TYPICAL APPLICATIONS: Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is Also Effective Against Fungi, Mold & Mildew, and Odors Caused by Bacteria and Viruses. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as specified below. It is a respiratory irritant. Do not apply by hand. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

Microban Disinfectant Spray Plus is to be used in a manner consistent with its labeling. It is not to be used in a manner inconsistent with its labeling.

**SPECIAL INSTRUCTIONS FOR APPLICATORS:**

Microban® Disinfectant Spray Plus, when used as directed, is effective in decontaminating bedding, mattresses, textiles, drapes, upholstered furniture, rugs, carpets and in storage areas to control mold, mildew, fungus and odors wherever they are a problem. Microban Disinfectant Spray Plus should not stain those materials not stained by water. Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is also effective against fungi, mold & mildew, and odors caused by bacteria and viruses. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as specified below. It is a respiratory irritant. Do not apply by hand. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

**USE IN RESIDENTIAL STRUCTURES:**

Microban Disinfectant Spray Plus is to be used in a manner consistent with its labeling. It is not to be used in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is also effective against fungi, mold & mildew, and odors caused by bacteria and viruses. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as specified below. It is a respiratory irritant. Do not apply by hand. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

**DIRECT USE ON PERSONS OR CLOTHING:**

Microban Disinfectant Spray Plus is to be used in a manner consistent with its labeling. It is not to be used in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is also effective against fungi, mold & mildew, and odors caused by bacteria and viruses. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as specified below. It is a respiratory irritant. Do not apply by hand. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

**USE IN FLOOD WATER-IMMERSED AREAS:**

Microban Disinfectant Spray Plus is to be used in a manner consistent with its labeling. It is not to be used in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is also effective against fungi, mold & mildew, and odors caused by bacteria and viruses. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as specified below. It is a respiratory irritant. Do not apply by hand. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

**USE IN SEXUALLY TRANSMITTED DISEASE PREVENTION AND INFECTION CONTROL:**

Microban Disinfectant Spray Plus is to be used in a manner consistent with its labeling. It is not to be used in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is also effective against fungi, mold & mildew, and odors caused by bacteria and viruses. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as specified below. It is a respiratory irritant. Do not apply by hand. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

**USE ON EUGENIC DISPOSAL AND INFECTION CONTROL (Human Cadaver Tissue and Human Products):**

Microban Disinfectant Spray Plus is to be used in a manner consistent with its labeling. It is not to be used in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is also effective against fungi, mold & mildew, and odors caused by bacteria and viruses. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as specified below. It is a respiratory irritant. Do not apply by hand. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

**EQUIPMENT:**

Microban Disinfectant Spray Plus is to be used in a manner consistent with its labeling. It is not to be used in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is also effective against fungi, mold & mildew, and odors caused by bacteria and viruses. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as specified below. It is a respiratory irritant. Do not apply by hand. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

**USE IN COMMERCIAL, INDUSTRIAL AND COMMUNITY HOSPITALS AND GUARDIANS:**

Microban Disinfectant Spray Plus is to be used in a manner consistent with its labeling. It is not to be used in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is also effective against fungi, mold & mildew, and odors caused by bacteria and viruses. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as specified below. It is a respiratory irritant. Do not apply by hand. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

**USE IN WASTE WATER TREATMENT AND SEWAGE TREATMENT PLANTS:**

Microban Disinfectant Spray Plus is to be used in a manner consistent with its labeling. It is not to be used in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is also effective against fungi, mold & mildew, and odors caused by bacteria and viruses. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as specified below. It is a respiratory irritant. Do not apply by hand. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

**USE IN GANGLION CENTER, HOSPITALS, AND CORRECTIONAL INSTITUTIONS:**

Microban Disinfectant Spray Plus is to be used in a manner consistent with its labeling. It is not to be used in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is also effective against fungi, mold & mildew, and odors caused by bacteria and viruses. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as specified below. It is a respiratory irritant. Do not apply by hand. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.
PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: May be harmful if swallowed (inhaled or absorbed through the skin). Do not breathe vapors (dust or spray mist). Do not get in eyes, on skin, or on clothing. May cause eye (and skin) irritation.

FOR AIR DUCT USAGE:

PERSONAL PROTECTION EQUIPMENT REQUIREMENTS FOR HANDLERS: All handlers must wear protective eyewear, long pants, long-sleeved shirts and chemical resistant gloves.

SPECIAL INSTRUCTIONS FOR APPLICATORS: Applicators treating the inside of an air duct system with this product must wear chemical resistant coveralls, chemical resistant gloves, and chemical resistant goggles. In addition, the ductwork must be ventilated with an airflow of approximately 50 CFM per square foot of duct cross section. If this is not possible, OSHA confined space regulations must be followed and the requirements for a permit required space apply. These requirements include testing the atmosphere and use of adequate respiratory protection. If the level of contamination cannot be determined, then maximum respiratory protection (SCBA or airline with an escape bottle) must be used. If needed, the full-face respirator should also be equipped with a spray mist pre-filter in addition to the chemical filters.

ENGINEERING CONTROLS: During ULV, mist or spray application, the duct system interior must be maintained at slight negative pressure (0.015 to 0.025 in. WG) with an outdoor exhaust or using a negative air machine equipped with HEPA filter. Avoid higher pressure differentials that would be likely to disrupt the coverage pattern.

STORAGE AND DISPOSAL

Storage: Keep from freezing. Store in ventilated areas. Do not contaminate water, food or feed with storage and disposal. Dispose leftovers in landfill approved for pesticides.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent). Then Offer for recycling, if available or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning.

GENERAL METHOD OF APPLICATION

Surfaces and objects must be cleaned of gross filth with suitable detergent before treatment. Spray surfaces and articles until thoroughly wet, use enough so that treated surfaces and objects remain wet for at least 10 minutes. May be applied with a sponge to impervious covers of objects and surfaces, allowing to dry for 10 minutes. For fogging and other large volume applications use appropriate spraying equipment, protective clothing, gloves and respirator. Heavily treated spaces should be adequately ventilated and not re-entered for at least one hour after treatment. As a MILDewedcide, Fungicide, Broad Spectrum DISINFECTANT AND VIRUCIDE*: (Kills influenza virus). In lobbies, hallways, washrooms, mop rooms, and veterinary clinics; in schools, hotels, motels, restaurants, offices, homes and industrial buildings.

AS A BACTERIOSTAT, FUNGISTAT AND DEODORIZING AGENT

Apply Microban Disinfectant Spray Plus directed to floors, walls, ceilings that have been damaged by smoke, fire, floods and sewage backups. For cleanup operations in areas such as attics, wall voids, basements, areas above suspended ceilings and similar inaccessible spaces in buildings. Spray attic, voids and remaining animal and human wastes and carcasses as directed above, prior to removal and disposal. Treat spaces and surfaces as specified in method of application. For use as a bacteriostatic, fungistatic and deodorizing agent on carpeting found in schools, hotels, motels, homes, shelters and commercial, industrial and public buildings. After a flood or water damage, vacuum or extract as much water as possible before application. Apply full strength with sprayer until carpet nap and rake or brush in. To treat the backing and padding, a fogger is recommended. Allow to remain until dry. For best results carpets should be cleaned before application.

TO DISINFECT FARM PREMISES, POULTRY HOUSES, ANIMAL PENS AND VEHICLES

Remove all animals and feed from premises, vehicles and enclosures. Remove all litter and manure from floors, walls and surfaces of pens, barns, stalls, chutes and other facilities and fixtures occupied or traversed by animals. Empty all troughs, racks and other feeding and watering appliances. Thoroughly clean all surfaces with soap or detergent and rinse with water. Saturate all surfaces with the recommended disinfecting solution for a period of ten minutes. Immense all hallers, ropes and other types of equipment used in handling and restraining animals, as well as oats, shovels and cloths used for removing litter and manure. Ventilate buildings, barns and other closed spaces. Do not house live stock or employ equipment until treatment has been absorbed, set or dried. Thoroughly scrub all treated feed racks, mangers, troughs, automatic feeders, tobacco, and warepools with detergent or soap before potable water before reuse. Apply Microban Disinfectant Spray Plus full strength as directed in the general method of application until thoroughly wet. Allow all surfaces to dry thoroughly, ventilate enclosed spaces adequately. Do not house animals in treated areas until thoroughly dry and free from odors.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Microban Disinfectant Spray Plus should be applied with hand or power operated sprayers, foggers, automated metering systems or gravity drip dispensers as a broad spectrum, mold and mildewcide, fungicide and deodorizing agent to previously cleaned and disinfected surfaces. Spray areas until thoroughly moist, giving special attention to cracks and crevices. Allow ten to twenty minutes to dry. Do not induce-ventilating unless told to do so by a poison control center or doctor. Do not apply anything by mouth to an unconscious person on or on clothing.

CLOTHING:

FIRST AID: IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a Poison Control Center or doctor for further treatment advice. IF SWALLOWED: Call a Poison Control Center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person on or on clothing.

Hazards:

• Odor Control Se

• Movie booths

• Restoration Se

• Refuse trucks

• Upholsterers Shops

• U.S. Patent No. 3,458,629

• Water Damage Service

• Waste Compactors

• Condensation collection & Drainage areas

• Storage areas and Basements

• Laundry receiving stations

• Disinfection Service

• Waste Removal Service

USE DIRECTIONS FOR AIR DUCTS: IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING. THE PERSON APPLYING THIS PRODUCT IS LIABLE FOR FOLLOWING THESE DIRECTIONS UNDER BOTH STATE AND FEDERAL LAWS.

1.0 General. MICROBAN DISINFECTANT SPRAY PLUS is designed to be used as one component of a comprehensive HVAC and duct maintenance program. The purpose of such a program is to assure that the HVAC system and ducts function in the manner they were intended to, remain free from mold and other microbial growth and other contamination, and continue in that condition. This product must only be used in only those cases where visible microbial growth has been detected in the system and then only after removing that growth and identifying and correcting the conditions that led to that growth. If you need help in understanding any part of these instructions or have additional questions after reading these instructions, DO NOT APPLY THIS PRODUCT until you have received the answers for all of your questions.

2.0 Inspection. Prior to inspecting, cleaning, treating, repairing or otherwise working on a duct section, the HVAC system should be turned off or the section under repair physically isolated from sections in active use. Prior to any application of MICROBAN DISINFECTANT SPRAY PLUS the system must be inspected for cleanliness and mechanical condition. When initiating any measures to repair, clean or treat ducts and associated HVAC system components, industry standards from the National Air Duct Cleaners Association (NADCA) and other organizations must be followed. HVAC systems should be routinely inspected for cleanliness by visual means. The NADCA Standard, Assessment, Cleaning and Restoration of HVAC Systems (ACR 2002 or the latest revision), provides minimum recommended inspection frequency schedules for ducts and other system components. More information on NADCA standards can be obtained from the NADCA web site at www.nadca.com.

2.1 Cleanliness Inspection. According to NADCA Standards, HVAC system cleaning must be performed when any of the following conditions are found in the cleanliness inspection. If any of these deficiencies are found during inspection, cleaning in accordance with industry standards must be performed prior to the application of MICROBAN DISINFECTANT SPRAY PLUS.

2.1.1 Contamination. HVAC systems should be operated in a clean condition. If significant accumulations of contaminants or debris are visually observed within the HVAC system, then cleaning is necessary. Likewise, if evidence of microbial growth is visually observed or confirmed by analytical methods, then cleaning is required.

• If the HVAC system discharges visible particulate into the occupied space, or a significant contribution of airborne particles from the HVAC system into the indoor ambient air is confirmed, then cleaning is necessary.
• Heat exchange coils, cooling coils, air flow control devices, filtration devices, and air-handling equipment determined to have restrictions, blockages, or contamination that may cause microbial growth, air flow degradation, or that may significantly affect the operation of the HVAC system.
• Drain pans or stands that may be prone to corrosion and provide a habitat for microorganisms.
• Fans and fan housings must be free from bird nests, accumulations of organic matter, and particle matter.

If you need help in understanding existing industry standards, consult a qualified professional or contact ProRestore® Products at 800-332-6037 for guidance and further direction or contact the information at www.epa.gov (search on “air ducts”). In addition, the following association and society standards and guidelines have been developed:

ACCA – www.acca.org
ASHRAE – www.ashrae.org
NADCA – www.nadca.com
NAMA – www.nama.org
SMACNA – www.smacna.org

2.2 Mechanical Inspection. MICROBAN DISINFECTANT SPRAY PLUS must be used only on ducts and other HVAC system components in sound mechanical condition as defined in 2.2.1 and 2.2.2 (below). The HVAC system components must be designed and installed in conformance with industry standards and guidelines. Prior to using the product, inspect the ducts and assure that they are in sound mechanical condition. The following general guidelines, supplemented by industry standards from SMACNA, NAMA, ASHRAE, ACCA and other organizations, must be followed.

2.2.1 Air Leaks and Mechanical Defects. The ducts must be free from air leaks and other mechanical defects. Air leaks will promote condensation of water that causes microbial growth and will lead to failure of MICROBAN DISINFECTANT SPRAY PLUS to protect the system adequately.

2.2.2 Design and Installation. ASHRAE, SMACNA, NAMA and other industry organizations have established guidelines and standards for the design and installation of HVAC and duct systems. You should determine that the duct system you wish to treat conforms to industry practice. If you are not knowledgeable of industry guidelines and standards, consult a qualified professional or contact ProRestore® Products at 800-332-6037 for assistance.

In some situations, the inspection of the duct system may reveal that the duct system is badly damaged or is in such poor operating condition that it cannot be corrected through cleaning and/or minor repair. In these situations, the system should be replaced or rebuilt in conformity to the applicable industry standards prior to using MICROBAN DISINFECTANT SPRAY PLUS. Some (but not all) of the conditions that would indicate the need for major repairs or replacement of the system are:

• Improper size of ducts – Must be sized to correct airflow. When air-handling equipment is changed or new vents or outlets added, the size of all components in the system must be recalculated and revisions made as needed.

• Physical damage – Crushed or deformed air ducts will restrict airflow and may leak (especially at joint areas). Damaged sections should be replaced or if there is extensive damage, the entire system should be replaced.

• Rusted, corroded metal duct sections, housings, coil assemblies, drain pans, and fan housings and heat exchanger surfaces.

• Loose, damaged, frayed or missing insulation – Insulation is important in preventing moisture condensation and subsequent growth of mold and other organisms. If insulation (either interior or exterior) is damaged, missing or not properly fastened it must be repaired or replaced or the associated duct sections replaced. Air handler mixing, and HVAC box housings are also normally insulated and this insulation should be checked for damage in a like manner.

Removals components that are contaminated with mold and other microbial growth may spread contamination while being removed from the building. To prevent this, smaller items should be placed in plastic bags that should then be sealed before being removed. Larger items that cannot be safely packaged should be treated before being moved through occupied spaces. An appropriately labeled disinfectant can be used during treatment. Care must be taken during treatment to assure that fumes from the agent being used are not released into occupied spaces. Products used should be used according to their label directions. Please contact ProRestore® Products at 800-332-6037 for guidance on the appropriate disinfectant to use for treatment.

2.3 General Directions for MICROBAN DISINFECTANT SPRAY PLUS Usage. MICROBAN DISINFECTANT SPRAY PLUS effectively controls by inhibiting growth of odor-causing bacteria, fungi, and other odor, stain or damage causing organisms in air ducts in residential, commercial, institutional, and industrial buildings. MICROBAN DISINFECTANT SPRAY PLUS also eliminates odors associated with bacteria, mold, mildew, smoke, animals, cooking, spoilage, musty and other odors and removes odor-causing organisms when used as per label instructions. MICROBAN DISINFECTANT SPRAY PLUS is a bactericidal, fungistat (mold and mildew), mildewstat and deodorizer for use in residential, commercial and industrial settings. It will not stain or bleach materials or fabrics and will not harm or damage HVAC system components.

MICROBAN DISINFECTANT SPRAY PLUS is formulated for use in all kinds of ducts and HVAC components including:

- Unlined sheet metal
- Air supply and return ducts and plenums fabricated with plywood, OSB or other wood-like material
- Flexible air ducts fabricated of metal or plastic
- Air distribution components such as air_handlers, mixing boxes, transfer boxes, transitions, turnovers, vanes, fans and housings and associated components
- Coordinate drain pans.

Follow the directions below for the specific type of duct or component being treated. It is vital that the following directions be carefully read and understood prior to using the product. If you have any questions, need further information, require clarification, or do not understand any of the directions, call ProRestore® Products at 800-332-6037 prior to use.

3.0 Application Instructions. Sprays apply until thoroughly moist, giving special attention to cracks and crevices. Allow ten to twenty minutes for drying. It is not necessary to wipe the sprayed surface. MICROBAN DISINFECTANT SPRAY PLUS should not stain those materials not stained by water.

3.1 Application Equipment and Devices. Refer to the precautionary statements for the Personal Protective Clothing and other special instructions that must be followed.

3.1.1 Brush, Mop or Wipe Application. MICROBAN DISINFECTANT SPRAY PLUS Application may be specified by some facility maintenance or remediation plans. These techniques are generally more labor intensive than other methods and are normally used only when specifications require. These methods are suitable for only smooth uniform surfaces. Do not use on porous or non-uniform surfaces. If in doubt about a given surface, contact ProRestore® Products at 800-332-6037 before proceeding. When using brush or mop application, tools and materials used should be reserved only for application of MICROBAN DISINFECTANT SPRAY PLUS, kept clean and protected between uses and replaced when worn or visibly soiled. Natural fiber brushes are preferred especially if any quality brush is acceptable. Mops should be those that leave minimal lint behind. Micro-fiber or other non linting cloths are preferable. Where other types of cloths are used, they must be so soft that they absorb a sufficient amount of liquid to provide uniform application. During Brush, Mop or Wipe Application, the applicator should require entering the duct in order to reach such areas, application must start from the point the most distant from the point of entry into the duct. The applicator will then work from that point back to the entry point covering a 3-foot length of duct at a time. Apply to the top of the duct first, followed by the sides then the floor of the duct. Overlay applications to assure complete coverage. Completely avoid while operating or cleaning.

3.2 Application Sprayers. Sprayers apply either on a large surface that is easily accessible (such as in long runs of large diameter ducts, coil assemblies and the interior of cabinets and housings with removable access panels). The spray equipment should provide a consistent fine (1-300 micron) particle size and uniform spray pattern. Powered medium pressure sprayers are preferred. However, airless sprayers are suitable.

When airless sprayers are used, the most satisfactory spray pattern will be achieved using a 0.51 spray tip. For other brands and options contact ProRestore® Products at 800-332-6037.

Pump up garden type sprayers can be used but care must be taken to maintain maximum pressure by pumping frequently and the spray nozzle must be adjusted for the finest spray pattern possible. During application achieve complete uniform coverage. Avoid excessive wetting and do not allow the spray to run or pool.

3.3 ULV or Mist Generating Sprayers. ULV or mist or other small water particle application is preferable where surfaces are irregular or less accessible. Equipment capable of generating particles in the 15 to 60 micron range is most satisfactory. Avoid use of thermal fog generators. Type fog generators may emit products that may cause discomfort or irritation to employees working in the vicinity. There are a number of automated spraying systems on the market including those that are carried by a “robot” through air ducts. These may provide an excellent option for application of MICROBAN DISINFECTANT SPRAY PLUS where the condition of the system produces the correct spray pattern and application quantity. These systems are generally viewed by people using video or other means while applying spray so proper application rate will be maintained. Please contact ProRestore® Products at 800-332-6037 regarding a specific device should you have questions.

3.4 Application Techniques. MICROBAN DISINFECTANT SPRAY PLUS should be sprayed into openings at intervals throughout the duct system or on components that are accessible through removable panels or access doors. Spray into openings every 1 foot minimum. Existing supply openings can be used where they provide a clean view of the surfaces being sprayed so that uniform application can be achieved. However, additional penetrations will have to be made as needed, so enough openings will be available to achieve total and uniform coverage.

Spray application is not an acceptable technique where openings are greater than 8 feet apart, additional openings cannot be made, and/or the duct geometries do not allow for uniform coverage. In such cases, application from within the ducts must be made until treated. This will involve entering the ducts. The ducts must be free from air leaks and other mechanical defects. Air leaks will promote condensation of water that causes microbial growth and will lead to failure of MICROBAN DISINFECTANT SPRAY PLUS to protect the system adequately.

4.0 Return the System to Operation following Application. When the above directions are followed properly, there will not be significant concentrations of MICROBAN DISINFECTANT SPRAY PLUS to the spaces served by a system being treated. It is recommended that affected areas of the building be unoccupied during treatment. Care must be taken during treatment to assure that fumes from the agent being used are not released into occupied spaces. Products used should be used according to their label directions. Please contact ProRestore® Products at 800-332-6037 for guidance on the appropriate disinfectant to use for treatment.
FIRST AID

IF INHALED: Move person into fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Do not attempt to induce vomiting. If vomiting occurs, move victim to a sitting or lying down position. If victim is unconscious, call 911 or an ambulance and transport victim to hospital. If breathing stops, provide CPR immediately. Do not give anything by mouth to an unconscious person. 0.5 LITRE INTEGRATION Clothing: Take off contaminated clothing. Skin immediately wash with plenty of water. Do not apply oil or petrol on skin. If a person suffering from a skin lesion or for dressing purposes, then only use with 0.5 LITRE INTEGRATION Center or doctor for further treatment advice. IF SWALLOWED: Give large amounts of water to drink. If the person is unconscious, do not give water and call 911 or an ambulance. If they are conscious, give 0.5 LITRE INTEGRATION or water or milk. DO NOT试图 give anything by mouth to an unconscious person. If the victim is not breathing, give artificial respiration, preferably by mouth-to-mouth, if possible. Expose chest to fresh air. Do not attempt to induce vomiting. Vomiting can cause further choking. If vomiting occurs, move victim to a sitting or lying down position. If victim is unconscious, call 911 or an ambulance and transport victim to hospital. If breathing stops, provide CPR. Do not give anything by mouth to an unconscious person. 0.5 LITRE INTEGRATION

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Do not let this product contact eyes, mouth or clothing. May cause eye irritation or skin sensitization.

INHALATION HAZARDS:

Flammable liquid and vapor. Avoid contact with heat, sparks and open flame.

PRINCIPAL INGREDIENTS:

Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is Also Effective Against Fungi, Bacteria, Virus and Odor. Caused by Bacteria, Viruses, and Chemicals. The active ingredient is dimethyl benzyl ammonium chloride, which is a quaternary ammonium disinfectant.

Microban Disinfectant Spray Plus is a Broad Spectrum Disinfectant and is Also Effective Against Fungi, Bacteria, Virus and Odor. Caused by Bacteria, Viruses, and Chemicals. The active ingredient is dimethyl benzyl ammonium chloride, which is a quaternary ammonium disinfectant.

KEEP OUT OF REACH OF CHILDREN

TO DISINFECT FARM PREMISES, POULTRY OR ANIMAL PENS AND VEHICLES

Remove all animals and feed from premises, vehicles and enclosures. Thoroughly clean all the feed, water and feeders before use. Usual methods of disinfection may be used separately or in conjunction with the method described below. Thoroughly clean or sanitize all feeders, mangers, troughs, automatic feeders, fountains and waterers. Allow to dry for 10 minutes. Immerse all halters, ropes and other types of equipment used in handling and restraining animals, as well as forks, shovels and scrapers used for removing manure. Ventilate buildings, cars, boats and other closed spaces. Do not house livestock or employ equipment until treatment has been absorbed.

STORAGE AND DISPOSAL

Storage: Keep from freezing. Store in ventilated area. Avoid prolonged exposure to heat. Do not store near heat or hot surfaces (above 50°C/122°F).

STORAGE AND DISPOSAL

Store in an area protected from the elements. Do not store near heat or hot surfaces (above 50°C/122°F). Do not store near or in combination with food or pet feed.
