PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals

DANGER
Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Wear goggles, or face shield. Wear protective clothing and rubber gloves. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

FIRST AID
If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 minutes. Call a poison control center or doctor for treatment advice.

If in eyes: Hold eyes open and flush with plenty of water for 15-30 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person take a glass of water. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth. If possible, call a poison control center or doctor for further treatment advice.

POISON CONTROL CENTER
1-800-227-1222

Note: This product contains alcohol, which is a flammable liquid. Probable material damage may result from exposure to gasoline fumes.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, wells, ditches or other water bodies in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has not been notified in writing prior to discharge. Do not discharge effluent containing the product into sewer systems without previously notifying the local sewage treatment plant authority. For general information, call your State Water Board or Regional Office at the EPA.

PHYSICAL AND CHEMICAL HAZARDS
Strong oxidizing agent. May be explosive. Use soap, dry utensils. Do not mix with this product to any disposal device containing any other product. Such mix may cause a violent reaction leading to fire or explosion. Combinations with inorganic acids, aromatic or other chemicals may also lead to a violent reaction. May react with sodium hydroxide or alkaline phosphates. Combustion products contain oxides of nitrogen. 

ACTIVE INGREDIENT: 5.0% Sulfur dioxide, 4.0%
INSERT INGREDIENT:
(Acidulated Chlorine 4.05%)

NET CONTENT: 227 KG/500 lbs.

KEEP OUT OF REACH OF CHILDREN.

DANGER
(See Side Panel for Additional Precautionary Statements.)

OAKITE
CHLOR-TERGENT

THE MODERN CHLORINATED DETERGENT
CLEANS • SANITIZES • DEODORIZES...IN ONE OPERATION

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. Store product in tightly closed containers when not in use. Store in a dry, well-ventilated area away from heat or open flame. Toxic residues are left. Improper disposal of empty containers, empty containers, or waste is a violation of federal law. If these vases cannot be disposed of by non-hazardous waste disposal, contact your local public works or environmental control agency or the hazardous waste representative of the nearest EPA Regional Office or office.

Glassware: Dispose of completely empty by breaking and placing clear and broken glass in small disposable plastic bags. Do not throw away into the trash. Properly dispose of small plastic bags. Disposal of liquid in a sanitary landfill or by incineration allowed by State and local authorities. If clean and contaminated, do not incinerate. Disposal in landfills in the same manner.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with the labeling.

CLEANING
Apply 1 volume per gallon solution by following a CIP cleaning, by brushing, scrubbing or soaking for manual operation. For additional information, see the user guide. This product should be allowed to drain thoroughly before use.

SANITIZING
1 ounce of Oakite Chlor-Tergent per 100 gallons of water (100 parts of Oakite Chlor-Tergent) provides 100 ppm of available chlorine. For sanitizing CIP equipment, the solution should be discarded when the available chlorine drops to 35 ppm and fresh solution made up. It is not recommended to add to paper products.

Solutions of Oakite Chlor-Tergent containing 100 ppm available chlorine applied by either CIP methods, brushing, scrubbing or soaking should not be allowed to contact equipment surfaces for at least 3 minutes. Equipment should then be allowed to drain thoroughly before use.

Where Oakite Chlor-Tergent may be used:

- Sanitary facilities
- Bathrooms
- Restrooms
- Kitchens
- Restaurants
- Cafeterias
- Catering
- Food Processing
- Meat Plants
- For use wherever sanitizing and deodorizing are required for food preparation and dairy processing equipment

Authorized for use on food for human consumption and poultry in food preparation areas.

Shell Egg Disinfecting and Shell Egg Washing
Use Oakite Chlor-Tergent as 1 to 2 ounces per gallon of water and a temperature of 120°F. (48°C) in a mixture in a shell egg washer and shell egg washer. Following use of this product, eggs must be thoroughly washed with hot water.

Shell Egg Sanitizing
Thoroughly clean eggs. Thoroughly rinse a 10 oz. oz. mixture of Oakite Chlor-Tergent for 100 parts of available chlorine solution. The sanitizing temperature should never exceed 130 degrees Fahrenheit. Use the warm rinse to wash the eggs. The eggs should be thoroughly washed, rinsed with hot water before conveying, and then a suitable water rinse. The solution must then be thoroughly rinsed to wash off.
STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. Keep product dry in tightly closed containers when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of liner in a sanitary landfill or by incineration if allowed by State and local authorities. If drum is contaminated and cannot be reused, dispose of in the same manner.

DIRECTIONS FOR USE
It is a violation for federal law to use this product in a manner inconsistent with its labeling.

CLEANING
Apply 1 ounce per gallon solution by circulation for CIP cleaning, by brushing, swabbing or soaking for manual operations. For stubborn soils, use a stronger solution. Following washing, rinse all surfaces thoroughly with potable water.

SANITIZING
1 ounce of OAKITE Chlor-Tergent per 3 gallons of water (1/3 oz/gallon of water) provides 100 ppm of available chlorine. For sanitizing CIP equipment the solution should be discarded when the available chlorine drops to 75 ppm and fresh solution made up. It is not recommended to add upkeep to spent solutions.

Solutions of OAKITE Chlor-Tergent containing 100 ppm available chlorine applied by either CIP methods, brushing, swabbing or soaking should be allowed to contact equipment surfaces for at least 2 minutes. Equipment should then be allowed to drain thoroughly before use.

Where OAKITE Chlor-Tergent may be Used:
- Breweries
- Bottlers
- Canneries
- Food Processors
- Bakeries
- Restaurants
- Meat Plants
- For use wherever sanitizing and deodorizing are required for food, beverage and dairy processing equipment.

Authorized by USDA for use in federally inspected meat and poultry plants.

Shell Egg Destaining and Shell Egg Washing
Use OAKITE Chlor-Tergent at 1 to 2 ounces per gallon of water and a maximum temperature of 120°F (49°C) to destain shell eggs and/or shell egg washing. Following use of this product, eggs must be thoroughly rinsed with potable water.

Shell Egg Sanitizing
Thoroughly clean all eggs. Thoroughly mix 1/3 oz of this product with 1 gallon of warm water to produce a 100 ppm of available chlorine solution. The sanitizer temperature should not exceed 100 degrees Fahrenheit. Spray the warm sanitizer so that the eggs are thoroughly wet. Allow the eggs to thoroughly dry before casing or breaking. Do not apply the potable water rinse. The solution must not be re-used to sanitize eggs.
PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals

DANGER
Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Wear goggles, or face shield. Wear protective clothing and rubber gloves. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

FIRST AID
If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

POISON CONTROL CENTER
1-800-222-1222
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN
Probable mucosal damage may contraindicate the usage or gastric lavage.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other water unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer system without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS
Strong oxidizing agent. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire explosion. In case of contamination or decomposition do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary.
