PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals

DANGER
Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Wear goggles, or face shield. Wear protective clothing and rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

FIRST AID
If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

POISON CONTROL CENTER
1-800-222-1222

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN
Probable mucosal damage may contraindicate the usage of gastric lavage.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other water unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS
Strong oxidizing agent. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat. Liberation of hazardous gases and possible generation of fire explosion. In case of contamination or decomposition do not reseal container. If possible isolate container in open area or well ventilated area. Flood with large volume of water if necessary.

Chemetall
Chemetall US, Inc., 675 Central Avenue, New Providence, NJ 07974
STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. Keep product dry in tightly closed containers when not in use. Store in a cool dry, well-ventilated area away from heat or open flame. Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal:
Nonrefillable container. Do not reuse or refill this container.

Fiber Drums with Liners: Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of liner in a sanitary landfill or by incineration if allowed by state and local authorities, by burning. If burned, stay out of smoke. If drum is contaminated, dispose of it in the manner required of its liner.

Plastic Containers: Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water and recap. Drain for 10 seconds after the flow begins to drip. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then puncture and dispose of in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

DIRECTIONS FOR USE
It is a violation for federal law to use this product in a manner inconsistent with its labeling.

CLEANING
Apply 1 ounce per gallon solution by circulation for CIP cleaning, by brushing, swabbing or soaking for manual operations. For stubborn soils, use a stronger solution. Following washing, rinse all surfaces thoroughly with potable water.

SANITIZING
1 ounce of Oakite Chlor-Tergent per 3 gallons of water (1/3 oz/gallon of water) provides 100 ppm of available chlorine. For sanitizing CIP equipment the solution must be discarded when the available chlorine drops to 75 ppm and fresh solution made up. Discard spent solution and prepare fresh solution.

Solutions of Oakite Chlor-Tergent containing 100 ppm available chlorine applied by either CIP methods, brushing, swabbing or soaking must be allowed to contact equipment surfaces for at least 2 minutes. Equipment must then be allowed to drain thoroughly before use.

Where Oakite Chlor-Tergent may be Used:
• Breweries
• Bottlers
• Canners
• Food Processors
• For use wherever sanitizing and deodorizing are required for food, beverage and dairy processing equipment.

Authorized by USDA for use in federally inspected meat and poultry plants.

Shell Egg Destaining and Shell Egg Washing
Use Oakite Chlor-Tergent at 1 to 2 ounces per gallon of water and a maximum temperature of 120°F (49°C) to destain shell eggs and/or shell egg washing. Following use of this product, eggs must be thoroughly rinsed with potable water.

Shell Egg Sanitizing
Thoroughly clean all eggs. Thoroughly mix 1/3 oz of this product with 1 gallon of warm water to produce a 100 ppm of available chlorine solution. The sanitizer temperature must not exceed 130 degrees Fahrenheit. Spray the warm sanitizer so that the eggs are thoroughly wetted. Allow the eggs to thoroughly dry before casing or breaking. Do not apply a potable water rinse. The solution must not be re-used to sanitize eggs.
