PRECAUTIONARY STATEMENTS
HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS

DANGER
CORROSIVE. CAUSES IRREVOCABLE EYE DAMAGE AND SKIN BURNS. DO NOT GET IN EYES, ON SKIN, OR ON CLOTHING. WEAR PROTECTIVE EYEWEAR (GOGGLES, SAFETY GLASSES), PROTECTIVE CLOTHING AND PROTECTIVE GLOVES (CHEMICAL OR RUBBER). MAY BE FATAL IF SWALLOWED OR INHALED. DO NOT BREATHE VAPOR. WEAR A DUST/MIST FILTERING RESPIRATOR (MSHA/NIOH STANDARD APPROVAL NUMBER PBE]. OR A NIOSH APPROVED RESPIRATOR WITH ANY N, R, P OR HE FILTER. HARMFUL IF ABSORBED THROUGH THE SKIN. WASH THOROUGHLY WITH SOAP AND WATER AFTER HANDLING AND BEFORE EATING, DRINKING, OR USING TOBACCO. REMOVE CONTAMINATED CLOTHING AND WASH BEFORE REUSE.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL HAZARDS
DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE
Open dumping is prohibited. Store in original container in areas inaccessible to children.

PESTICIDE DISPOSAL
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsewater is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL
Nonrefillable container. Do not reuse or refill this container. Triple rinse as follows:
Empty the remaining contents into application equipment or a mix tank. Fill the container ⅔ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Tilt the container over onto its other end and tip it back and forth several times. Empty the rinse into application equipment or a mix tank or store rinsewater for later use or disposal. Repeat this procedure two more times. Then offer for recycling or reconditioning. If not available, puncture and dispose in sanitary landfill.

CHEMTREAT CL-2030
Twin-Chain Quaternary Ammonium Compound Concentrate
Low Foam Water Treatment Microbiocide
For Building and Industrial Cooling Water Systems and Decorative Fountains

ACTIVE INGREDIENT:
Dicyclohexyl diisocyanate chloride 50.0%
Other Ingredients:
58.6%
100.0%

KEEP OUT OF REACH OF CHILDREN
DANGER FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

Net Weight

The presence of foam in building and industrial cooling water systems, and decorative fountains impairs the performance and aesthetics of the unit. Loss of heat transfer and pressure fluctuations are two of the problems encountered when foam is present in the recirculating water systems.

One of the possible caustic agents in the microbiocide added to control algae, AND microbial slimes, CHEMTREAT CL-2030, is a low foaming microbiocide. When used as directed, CHEMTREAT CL-2030 will control algae, and microbial slimes found in building and industrial cooling water systems, and decorative fountains and not introduce a foam problem.

CHEMTREAT CL-2030 helps clean and leach slime debris from cooling system and decorative fountain surfaces. When used in slug dose, no other microbiocide is required.

CHEMTREAT CL-2030 is economical to use because it is concentrated. It should be handled with care.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

When used as directed, CHEMTREAT CL-2030 helps to control algae and microbial slime in industrial recirculating cooling water systems and decorative fountains. Product addition must be made with a metering pump. Product may be fed continuously or on an intermittent basis depending on the degree of system fouling and retention time.

RECYCLING COOLING TOWERS, AND BUILDING AND INDUSTRIAL COOLING WATER SYSTEMS
Initial Dose: Add 16 oz. per 1,000 gallons of water (60 ppm active). Should the above dosage not give satisfactory results, use 21 fluid ounces per 1,000 gallons of water. Repeat the initial dose every seven days or increase the frequency if needed.

Heavily contaminated or fouled systems must be precleared.

Maintenance Dose: Once control is achieved, add 6 to 9 oz. per 1,000 gallons of water weekly or as needed to maintain control. Cooling water systems that are inherently low in microbial growth may be adequately controlled by the lower range of these dosages. Slug feed every seven days.

The product must be added at a point in the system where it will be uniformly mixed and distributed such as the tower sump.

DECORATIVE FOUNTAINS
When used as directed, CHEMTREAT CL-2030 controls algae and microbial slime in decorative fountains. For maximum effectiveness, fountains containing heavy algae growth should be cleaned prior to using CHEMTREAT CL-2030. The product must be added at a point in the system where it will be uniformly mixed and distributed throughout the fountain.

Initial Dose: Fountains having visible algae growth require an initial dose of 16 oz. per 1,000 gallons of water (60 ppm active). Should the above dosage not give satisfactory results, use 21 fluid ounces per 1,000 gallons of water. Repeat the initial dose every seven days or increase the frequency if needed.

Maintenance Dose: Once control is achieved, add 6 to 9 oz. per 1,000 gallons of water weekly or as needed to maintain control.
