DIRECTIONS FOR USE / MODO DE EMPLEO:
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING. SEE THE ENTIRE LABEL INSIDE THIS PACKAGE FOR COMPLETE DIRECTIONS. DO NOT USE FOR CONTROL OF INSECTS OTHER THAN THOSE LISTED ON THIS LABEL.
SE CONSIDERA UNA VIOLACIÓN A LA LEY FEDERAL USAR ESTE PRODUCTO CON OTROS FINES QUE LOS INDICADOS EN LA ETIQUETA. VEA LA ETIQUETA ENTERA ADENTRO DEL PAQUETE PARA OBTENER LAS INSTRUCCIONES COMPLETAS. NO USE PARA EL CONTROL DE INSECTOS QUE NO SE HAYAN MENCIONADO EN ESTE RÓTULO.

1. To apply gel: Remove cap from tip, touch tip to surface and depress plunger. Gel can be applied only as spots or in a line along cracks or crevices. For first application, apply gel in 4 dime-sized spots or several 1½ to 6-inch lines per square yard. Recap tube after use.
Aplicación: Quitar la tapita. Aplicar el gel en las superficies presionando el disparador. El gel se puede aplicar sólo haciendo marcas o dibujando una línea a lo largo de grietas y hendiduras. Vea la grafica de cantidad de aplicación. Para primer aplicación aplique el gel en 4 gotas o en varias franjas de 1-1/2 a 6 pulgadas por yarda cuadrada. Tapar el tubo después de usarlo.

2. Place many spots or dabs of gel near areas of roach traffic and suspected nesting areas. Gel can be placed in cracks, crevices, corners and spots where roaches occur.
Aplique el gel en áreas donde circulan frecuentemente las cucarachas y en lugares donde pueden albergar sus nidos. El gel se puede aplicar en hendiduras, grietas, esquinas y lugares donde puede haber cucarachas.

3. Inspect gel after one month and reapply if it is no longer visible. Refresh with a new application after 3 months. Gel cleans up with a damp paper towel. Discard towel after use.
Al cabo de un mes inspeccionar el gel aplicado y re aplicar si ya no es visible. Reaplicar después de 3 meses. El gel se limpia con una toalla de papel humedecida. Tirar la toalla de papel una vez usada.

FOR INDOOR USE: Do not apply gel to areas that have recently been sprayed with insecticide, and do not spray insecticide over gel as it may cause the bait to become repellent. Do not apply gel to surfaces where food is handled or prepared. Do not contaminate food or utensils with gel.

PARA USE INTERNO: No aplique el gel en zonas que recientemente hayan sido rociadas con insecticidas. No rocíe insecticida en aerosol sobre el gel, ya que esto hará que el cebo repela a las hormigas. No aplique el gel en superficies donde se maneja o prepara comida. No contamine alimentos ni utensilios con el gel.

PARA USO EXTERNO: (adyacente a la casa o estructura) Coloque el producto en área donde las cucarachas pueden tener sus nidos o pueden procrear. Aplique el tratamiento en lugares estratégicos de entrada de cucarachas como aleros, bordes y ángulos. Aplique el producto en áreas protegidas cuando sea posible, pues la luz directa y agua reducirá la efectividad residual. Un mes después, revise el estado del gel y aplique nuevamente si ya no es visible. Deberá hacer una nueva aplicación cada 3 meses.
TOP PANEL

• Starts working in hours  
• Fast control of even large roaches  
• For hard-to-reach places such as cracks and crevices  
• Long residual action  

El gel atrae las cucarachas en busca de comida y agua a la trampa.  
Las cucarachas se comen el gel y regresan a morir a su nido.

HOW COMBAT® SOURCE KILL MAX R3 WORKS:  
COMO FUNCIONA:  
The gel attracts roaches in search of food and water to the bait.

BOTTOM PANEL

Product may stain textiles and clothing. PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS. CAUTION: Keep gel away from foods and food contact surfaces. Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes and clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. FIRST AID: IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of soap and water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice. IF IN EYES: Hold eye open, rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor or going for treatment.  

PHYSICAL OR CHEMICAL HAZARDS: Do not use this product in or on electrical equipment due to the possibility of a shock hazard. STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. STORAGE: Store in a cool, dry area out of reach of children. DISPOSAL: If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency. If you have questions regarding the use of this product, please call the Combat® helpline at 1-800-426-6228 for information.

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not use for control of insects other than those listed on this label.

COMBAT® Defense System Brand Source Kill Max R3 may be used as a spot or crack and crevice treatment for the indoor and outdoor (adjacent to homes & structures) control of cockroaches in residential areas. Do not apply gel to surfaces where food is handled or prepared. Do not contaminate food or utensils with gel.

GENERAL DIRECTIONS: Application rate is dependent on level of infestation and species to be controlled. Gel can be applied only as spots or as a bead or in a line or in a strip in cracks and crevices. The lower application rate should be used for low to moderate infestations or re-treatments, and the higher rate for more severe infestations or where the population occurs in inaccessible areas, such as in walls. Gel placements should be made at or near harborage or aggregation areas, such as corners, areas of movement or cracks and crevices. Numerous smaller placements will provide better control than fewer larger spots, especially for German cockroach control.

Do not apply gel to areas that have recently been sprayed with insecticide, and do not spray insecticide over gel as it may cause the bait to become repellent.

FOR INDOOR USE: Do not apply gel to surfaces where food is handled or prepared. Do not contaminate food or utensils with gel.

1. To apply gel: Remove cap from tip, touch tip to surface and depress plunger. Gel can be applied only as spots or in a bead or a line or a strip along cracks or crevices. See application rate chart. For first application, apply gel in 4 dime-sized spots or several 1½-inch beads or lines or strips per square yard. Reapply tube after use.
2. Place many spots or strips of gel near areas of roach traffic and suspected nesting areas. Gel can be placed in cracks, crevices, corners and spots where roaches occur.
3. Inspect gel after one month and reapply if no longer visible. Refresh with a new application after 3 months. Gel cleans up with a damp paper towel. Discard towel after use.

FOR OUTDOOR USE (adjacent to home or structure): Place gel in areas adjacent to structures where roaches may nest or breed. Apply gel to places where roaches may enter your home, such as eaves, slits and expansion joints. Apply gel in protected areas whenever possible, as direct sunlight and water will reduce the residual effectiveness.

- Easy to use
- No vapors or fumes
- For hard-to-reach places such as cracks and crevices
- Fast control of even large roaches
- Long residual action
- Ideal for use with COMBAT® bait stations
- Starts working in hours

- COMBAT® Source Kill Max R3 kills roaches fast.
- Roaches eat the gel and die in the nest.
- COMBAT® Source Kill Max R3 has a specific combination of roach food attractants and a fast-acting active ingredient to create a highly effective tool in the fight against roaches.
- The gel attracts roaches in search of food and water to the bait.
- Roaches ingest the bait and return to die in their nest.

Please recycle empty carton.
