Why Fertilize the Lawn?

Promote a dense and deep root system that is better able to reach water and find nutrients during rough and dry seasons. Your lawn stays greener, longer, and bounce back faster.

Thicken lawn with additional blades of grass, making it more resistant to bare spots and thinnings.

Help prevent weeds by making it difficult for weed seeds in the air to find soil to root, as well as crowd out existing weeds.

DIRECTIONS FOR USE

2. Thicken lawn with additional blades of grass, making it more resistant to bare spots and thinnings.

3. Help prevent weeds by making it difficult for weed seeds in the air to find soil to root, as well as crowd out existing weeds.

INSTRUCIONES

1. Promociona un sistema de raíces profundo y denso que está en mejores condiciones para llegar al agua y encontrar nutrientes durante el calor y la sequía y que el césped se mantenga más viva durante todo el año.

2. Replece el césped con hojas adicionales de gramíneas, haciéndolo más resistente a las situaciones de sequía y lluvia.

3. Ayuda a prevenir las malas hierbas haciendo que la semilla de las malas hierbas en el aire no encuentre su lugar para germinar, así como a desplazar las malas hierbas existentes.

APPENDIX C:

PRECAUTIONARY STATEMENTS

In case of contact with the lawn, wash thoroughly with soap and water immediately.

FIRST AID

If in eyes:
Flush eyes open and rinse slowly and gently with water for 15-30 minutes.

If on skin:
Gently wash with soap and water; see physician.

If swallowed:
Give two glasses of water; see physician.

If inhaled:
Move to fresh air; if not breathing, give artificial respiration.

Environmental Hazards
This product is toxic to birds and to some fish species. Follow directions carefully when applying and handling. Do not contaminate bodies of water during applications. Apply to turf only. Do not contaminate water.

STORAGE AND DISPOSAL

1. Store in a cool, dry place. Do not store in direct sunlight or near heat sources. Use only as directed.

2. Use all the contents of the bottle each time you use it. Do not use undiluted.

NOTICE: To prevent cross-contamination between products, keep all No Rust brand products in separate containers and do not use the same equipment to apply more than one product type.

VIGOR-GUARANTEED

This product is manufactured under the highest quality control measures. See the label for instructions on how to apply it correctly.

TOTAL SYSTEM CONTROL

For a complete system, use a combination of this product and other products that complement the lawn care. See the label for instructions on how to mix the products correctly.

WHEN TO USE

Apply any time during the growing season. Apply to grass, turf, and other vegetation before the grass takes off and before any weeds get established.

When applying to trees and shrubs, avoid contact with flowers, fruit, and vegetables.

Applying the product to the lawn is effective for controlling weeds and grasses that are present in the area.

Applying the product as a soil treatment is effective for controlling weeds that are present in the soil.

Applying the product as a foliar treatment is effective for controlling weeds that are present on the plant itself.

Applying the product as a root treatment is effective for controlling weeds that are present in the root system.

Applying the product as a cuticular treatment is effective for controlling weeds that are present on the cuticle of the plant.

Applying the product as a systemic treatment is effective for controlling weeds that are present in the systemic system of the plant.

Applying the product as a foliar treatment is effective for controlling weeds that are present on the plant itself.

Applying the product as a root treatment is effective for controlling weeds that are present in the root system.

Applying the product as a cuticular treatment is effective for controlling weeds that are present on the cuticle of the plant.

Applying the product as a systemic treatment is effective for controlling weeds that are present in the systemic system of the plant.

Applying the product as a foliar treatment is effective for controlling weeds that are present on the plant itself.

Applying the product as a root treatment is effective for controlling weeds that are present in the root system.

Applying the product as a cuticular treatment is effective for controlling weeds that are present on the cuticle of the plant.

Applying the product as a systemic treatment is effective for controlling weeds that are present in the systemic system of the plant.
Crabgrass & Weed Preventer

Previene el zacate mano de cangrejo y las malezas

Prevents weeds up to 4 months!
¡Previene las malezas hasta por 4 meses!

Controls crabgrass and 23 other grassy and broadleaf weeds before they start!
Controla el zacate mano de cangrejo y otras 23 malezas graminosas y de hoja ancha antes de que germinen.

Pre-emergence & early post emergence control of crabgrass
Control del zacate mano de cangrejo antes de germinar y al inicio después de la germinación.

Non-staining formula!
¡Fórmula que no mancha!
Covers 5,000 SQ FT

For Outdoor Residential Use Only:

ACTIVE INGREDIENT:
Oxytetracycline HCl..........................0.17%
OTHER INGREDIENTS.........................99.83%
TOTAL...........................................100.00%

Why Fertilize the Lawn?  
¿Por qué fertilizar el césped?

While it is easy to see that satisfying deep green when you fertilize, regular feedings can actually do much more...

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling for outdoor use only.

Using these Directions: These "Directions for Use" are designed to help you determine the appropriate application procedure for this product. Before using this product, make sure that you read the entire "Directions for Use" section of this label.

Before You Use

Read and follow these precautions when using this product:

- All labels and instructions contained within this document must be followed carefully to ensure safe use of the product.
- Do not reuse the product in coastal waters or areas that have been flooded or salted by other chemicals.
- Do not mix with other chemicals that may result in harmful reactions.
- Do not apply the product in coastal waters or areas that have been flooded or salted by other chemicals.
- Do not apply the product in coastal waters or areas that have been flooded or salted by other chemicals.
- Do not apply the product in coastal waters or areas that have been flooded or salted by other chemicals.
- Do not apply the product in coastal waters or areas that have been flooded or salted by other chemicals.

When To Use

- Apply the product at least 2 weeks before the grass is mowed.
- After applying the product, allow the grass to dry completely before mowing.
- Avoid applying the product in direct sunlight or extreme temperatures.
- Avoid applying the product when the grass is wet.
- Avoid applying the product when the grass is wet.

When To Apply

- In coastal waters or areas that have been flooded or salted by other chemicals.
- Do not apply the product in coastal waters or areas that have been flooded or salted by other chemicals.
- Do not apply the product in coastal waters or areas that have been flooded or salted by other chemicals.
- Do not apply the product in coastal waters or areas that have been flooded or salted by other chemicals.

How To Use

- Apply the product at a rate of 1.5 to 2.0 lbs per 1,000 sq. ft. (0.18 to 0.24 oz/gal).
- Apply the product at a rate of 1.5 to 2.0 lbs per 1,000 sq. ft. (0.18 to 0.24 oz/gal).
- Apply the product at a rate of 1.5 to 2.0 lbs per 1,000 sq. ft. (0.18 to 0.24 oz/gal).
- Apply the product at a rate of 1.5 to 2.0 lbs per 1,000 sq. ft. (0.18 to 0.24 oz/gal).
**IMPORTANT**

It is important to follow directions as indicated on the label before use as over-application may cause injury to your lawn. Sprayer settings are approximate and differences may occur due to condition of grass, wind speed, wind direction, equipment, operator skill, and other factors. Follow directions for optimal results.
