Replenish ~ Shock oxidizer, buffer and clarifier

FIRST AID:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after 5 minutes then continue rinsing eye. Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED: Call poison control center or doctor immediately for further treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Have product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may counterindicate the use of gastric lavage.

IN CASE OF EMERGENCY CALL: 1-800-654-6911

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

HOW TO APPLY:

For Spas:

Always add this product with pump and filter operating to ensure complete mixing and good circulation. This product is completely soluble and dissolves quickly, no premixing is required. Broadcast this uniformly over the surface of the spa water. Apply when spa is not in use.

For most spas with normal browning loads, this product should be added after every use, and once each week for maintenance, at a dose of 1-1.5 ounces per 300 gallons of spa water. Each 1 ounce dose of this product will raise the free chlorine concentration by about 2 parts per million (ppm) in 300 gallons of spa water. More frequent and/or heavier doses may be required during periods of extremely heavy use. Test chlorine level prior to re-entry to make sure the residual concentration in the spa is between 3-5 ppm. Residue is prohibited above levels of 5 ppm chlorine due to risk of bodily injury.

For high load spas, or spas with severe browning conditions, this product should be added after every use, and once each week for maintenance, at a dose of 1-1.5 ounces per 300 gallons of spa water. Each 1 ounce dose of this product will raise the free chlorine concentration by about 2 parts per million (ppm) in 300 gallons of spa water. More frequent and/or heavier doses may be required during periods of extremely heavy use. Test chlorine level prior to re-entry to make sure the residual concentration in the spa is between 3-5 ppm.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage or skin burns. If swallowed, harmful if inhaled. Harmful if dissolved or absorbed through skin.

WARNING: Use this product only in the manner intended.

HAZARDS TO FISH OR AQUATIC ORGANISMS

DANGER: Corrosive. Causes irreversible eye damage or skin burns. Harmful if swallowed, harmful if dissolved or absorbed through skin.
