DIRECTIONS FOR USE:
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

HOW TO APPLY:

1. Soak: Always apply this product with pump and filter operating to ensure complete mixing and good distribution. This product is completely soluble and dissolves quickly, so re-pumping is not required. Disperse this uniformly over the surface of the spa water. Apply when spa is in use.

2. For most spas with normal filtration, this product should be added after every use, and once each week for maintenance, at a dose of 1 to 1.5 oz. per 300 gallons of spa water. Each 1 oz. dose of this product will raise free chlorine concentration by about 1 ppm in 300 gallons of spa water. More frequent and/or heavier doses may be required during periods of extremely heavy use. Test chlorine level prior to re-entry to make sure the residual concentration in the spa is between 2 and 5 ppm. Re-test if prohibited above levels of 5 ppm chlorine due to fish or baby safety.

Note: When being in conjunction with solar sanitizers, this product will support additional bromine by chlorine-bond transference soft to active bromine oxidant. Both chlorine and bromine will be present for a short period of times. Test chlorine level prior to re-entry to make sure the residual concentration in the spa is between 2 and 5 ppm.

PRECAUTIONARY STATEMENTS:

NARROW TANK AND DOMESTIC ANIMALS:

DANGER: Corrosive. Causes irreparable eye damage or skin burns. Harmful if swallowed, or absorbed through skin.

Do not get in eyes, on skin or on clothing. Wear goggles and rubber gloves. For additional protection of eyes, wear long-sleeve and long pants.

Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco or going to the toilet.

Keep out of reach of children.

KEEP OUT OF REACH OF CHILDREN

DANGER:

Corrosive and improper use may cause fire or explosions or the release of toxic gases. Do not allow product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react to cause explosion or the release of toxic gases. Do not mix this product with a small amount of water. Only add directly to your pool or spa. Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin.
